

DCP 456 ‘MHHS Incremental changes for go live’

Introduction

This document includes the legal text amendments to cater for the transition to MHHS for changes made post M6 (catered for by DCP 445) and required by M8 (code implementation date – September 2025).

The version of DCUSA used to produce this document is based on DCUSA v17.1 issued on the 1st of April 2025 (which incorporates changes made by DCP 433 ‘Limitation for backdating of rebates/charges under Schedule 32’ that was implemented in v16.6 of the DCUSA and which necessitated the updates made to Schedule 32 as part of this change). It also includes any changes impacting this document that are approved and awaiting implementation and occur on or before M8 as at the date of this document. This is:

- DCP 445 - Implementation of Market-wide Half Hourly Settlement (MHHS) Arrangements.

DCUSA legal text amendments post M6 and required for M8

Amend Schedule 16 Paragraph 128 as follows

128 For MPANs that are to be charged on an aggregated basis (as further described in Paragraph 132C), Use of System Charges will be via the Supercustomer approach which for non-MHHS MPANs uses data from the D0030 industry data flow and is based on Settlements Classes comprising:

- (a) Line Loss Factor Class (LLFC);
- (b) Profile Class (PC);
- (c) Standard Settlement Configuration (SSC); and
- (d) Time Pattern Regime (TPR),

and which for MHHS MPANs uses data from the REP-002 industry data flow based on DUoS Tariff ID.

.....

Amend Schedule 32 Paragraph 6.10 as follows:

6.10 On or before 15 September of the Annual Allocation Review, the DNO/IDNO Party shall provide each Supplier Party with a list of each and every MPAN associated with a Non-Domestic Premises that is connected to the DNO/IDNO Party's Distribution System that has been reallocated to a New Charging Band as a result of the Annual Allocation Review, identifying the Old Charging Band and the New Charging Band and LLFC Id or for MHHS the DUoS Tariff ID to which each such MPAN has been reallocated.

Amend Schedule 32 Paragraph 6.11 as follows

If DCP439 is not approved

- 6.11 The New Charging Band will be effective from the later of 1 August of the prior year or the date on which the Old Charging Band was applied. Charging band reallocations are actioned by amending the LLFC Id [or for MHHS the DUoS Tariff ID](#) assigned to the MPAN, which must be completed by the DNO/IDNO Party before the date of the Final Reconciliation Settlement Run (as defined in the BSC) for 1 August of the prior year.

If DCP439 is approved

- 6.11 No change required to this Paragraph since DCP439 removed the reference to LLFC.
