# **Message Flow Details**

# MM00051 - Non Half-hourly Traditional Meter Technical Details

# Market Message Information

Market Message Reference	MM00051
MM Description	Meter <u>T</u> technical <u>D</u> details for <del>Non Half</del> - hourly <u>Traditional <del>m</del>Metering Assets</u> .
Local Catalogue Reference	D0150
Version	002
Notes	See Annex C for Flow NotesUsed for all Non Half Hourly meters for Non-MHHS Migrated Metering Points or Traditional Metering Assets for MHHS Migrated-Metering Points

#### **Scenario Variants**

Scenario Variant	Name	Source	Target	Owner	Api Route	Api Method
SV00051	<u>Iraditional</u> Meter Technical	Network Operator	Electricity Meter Equipment Manager	Retail Energy Code Company		
SV00052	Non Half hourly <u>Traditional</u> Meter Technical Details	Meter	Distribution Network Operator	Retail Energy Code Company		

**Commented [SJ1]:** Mop Up Update - to reflect agreed definitions within Schedule 1

SV00053	Non Half hourly Traditional Meter Technical Details	Meter	Electricity Meter Equipment Manager	Retail Energy Code Company	
SV00054	Non Half hourly <u>Traditional</u> Meter Technical Details	Meter	Non Half Hourly Data Collector	Retail Energy Code Company

# **Flow Structure**

# SV00051 - Non Half-hourly Meter Technical Details - Message Structure

Group ID	Group Description	Range	Condition	L1	L2	L3	BL4	L5	L6	L7	L8	Data Item Name	Data Item Rule
288	MPAN Cores	1-*		G									
					1							MPAN Core	
					1							Effective from Settlement Date {MSMTD}	The Effective from Settlement Date {MSMTD}value must equal the date on which the most recent change to any data item within the Non Half-hourly Meter Technical Details message became effective.
					0							Measurement Class Id	Where the MPAN is MHHS MigratedFor MHHS Metering Points, this field the value should be null
					1							Energisation Status	

**Commented [SJ2]:** Mop Up Update - to reflect agreed definitions within Schedule 1.

289	SSCs	1-1	G					
				1			Standard Settlement Configuration Id	If Non Half-hourly Meter Technical Details message generated following the recieptreceipt of Smart Meter Configuration Details message, Standard Settlement Configuration Id value must equal the Standard Settlement Configuration Id value within the Smart Meter Configuration Details message.
				1			Effective from Settlement Date {SCON}	If Non Half-hourly Meter Technical Details message generated following the recieptreceipt of Smart Meter Configuration Detail message, Effective from Settlement Date {SCON} value must equal the Effective from Settlement Date {SCON} value withi the Smart Meter

j			11				
							Configuration Details
							message.
							If Non Half-hourly
							Meter Technical
							Details message
							generated following
							the recieptreceipt of
							Smart Meter
							Configuration Details
							message, Metering
						Metering System Non	System Non
			0			Settlement Functionality	Settlement
						<u>Code</u>	Functionality Code
							value must equal the
							Metering System Non
							Settlement
							Functionality Code
							value within the
							Smart Meter
							Configuration Details
							message.
							If Non Half-hourly
							Meter Technical
							Details message
							generated following
					F	Effective From Settlement	the recieptreceipt of
			0			Date {MSNSFC}	Smart Meter
							Configuration Details
							message, Effective
							From Settlement Date
							{MSNSFC} value
							must equal the

									Effective From Settlement Date {MSNSFC} value within the Smart Meter Configuration Details message.
762	Metering Point Maintenance History	0-1		G					
					1			Maintenance Date	
					1			Nature of Maintenance	
290	Meter/Retrieval Method Details	0-*	Meter/Retrieval Method Details message collection is Mandatory if a meter is installed at the Metering Point; or, Meter/Retrieval Method Details message collection is Not Present if a meter is not installed at the Metering Point.	G					
					1			<u>Meter Id (Serial Number)</u>	If Non Half-hourly Meter Technical Details message generated following the <u>recieptreceipt</u> of Smart Meter Configuration Details message, Meter Id

			(Serial Number) value
			must equal the Meter
			Id (Serial Number)
			value within the
			Smart Meter
			Configuration Details
			message; or, If
			Notification of
			Mapping Details
			message generated
			following the reciept
			of Smart Meter
			Configuration Details
			message from an
			Electricity Supplier in
			conjuction conjunction
			with a Switch event,
			Meter Id (Serial
			Number) value must
			equal the Meter Id
			(Serial Number) value
			within the Smart
			Meter Configuration
			Details message,
			unless the value is
			equal to NK, then,
			Meter Id (Serial
			Number) value must
			equal the Meter Id
			(Serial Number) value
			within the Non Half-
			hourly Meter
