MHSP-BP-008 – Change of Energisation- v5.1

Business Process Description
This BPMN diagram describes the 'Change of Energisation' Business Process. For a detailed description of each step in the BPM, please refer to the accompanying Business Process Descriptions [BPD] document for this Business Process.

Actors
Supplier
LDSO
Registration Service
Data Integration Platform
Data Service (SDS, ADS, UMSDS)
Metering Service (MSS, MSA, UMSO)
Central Settlements (LSS, MDS)
EES

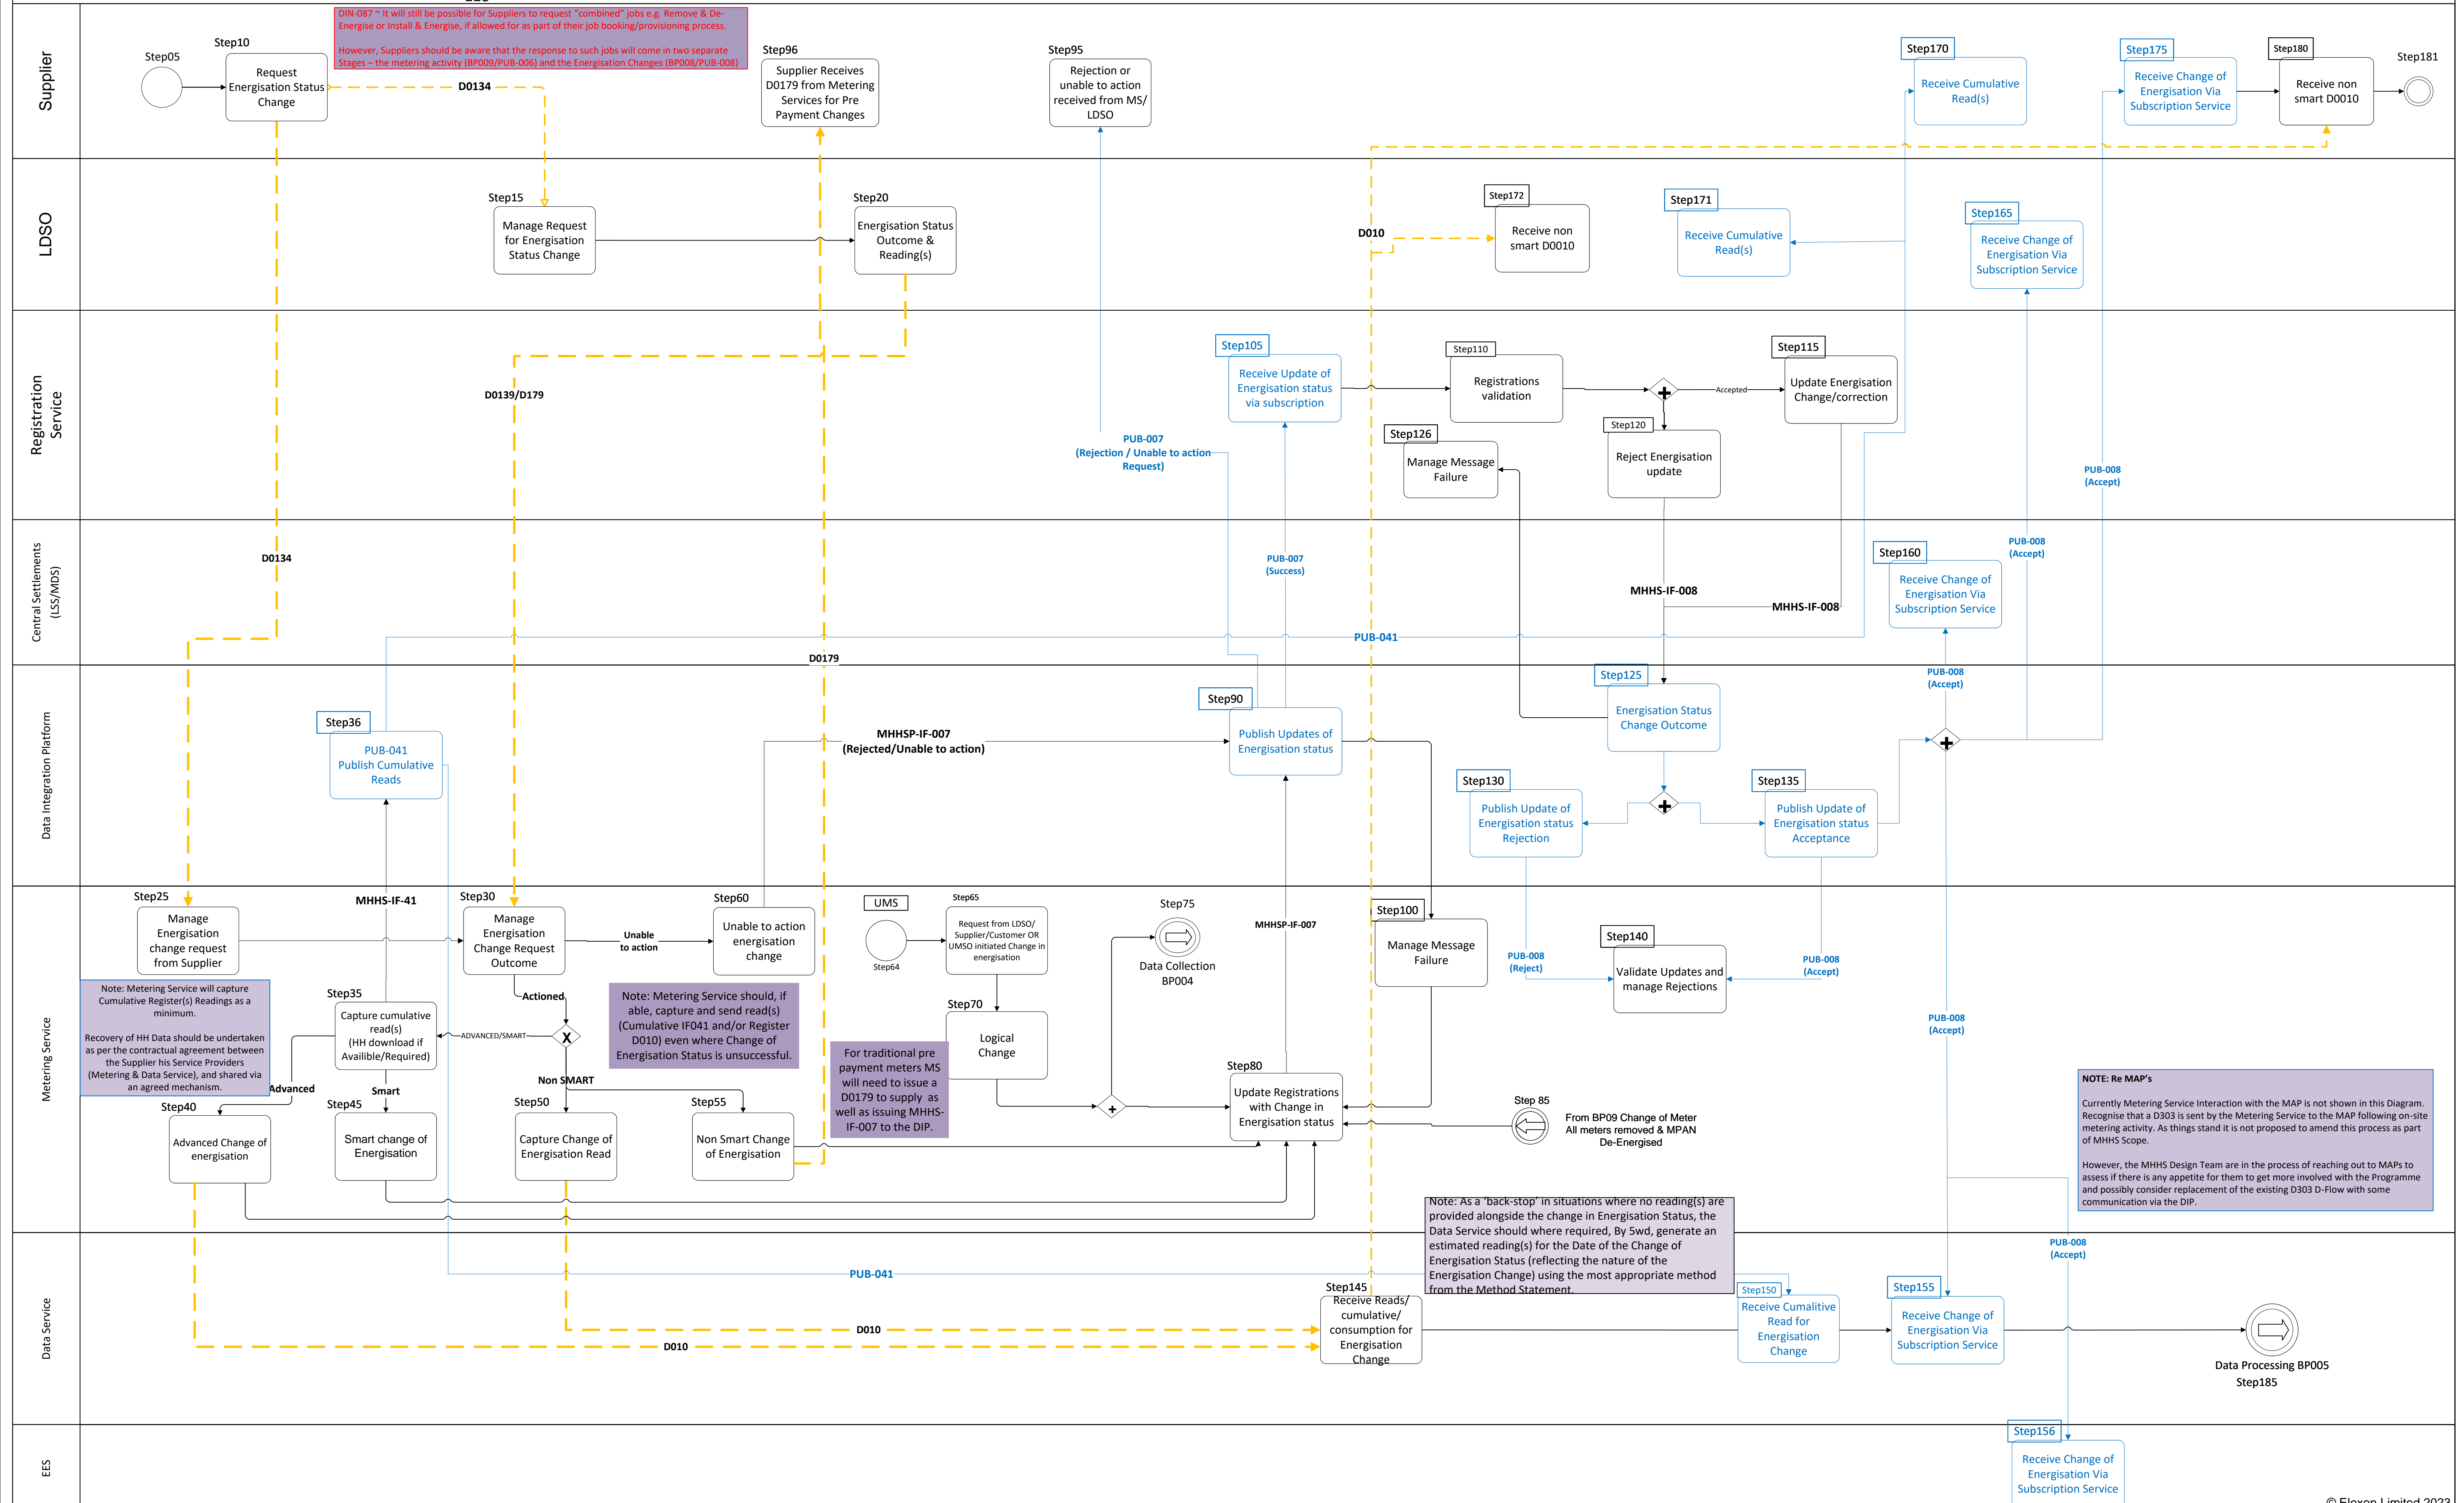

MHHS Interfaces
MHHS-IF-007 Update of Change of Energisation Status Outcome to Registration
MHHS-IF-008 Registration Service Notification of Change of Energisation Status
MHHS-IF-041 Cumulative Meter Reading

Publication List
PUB-007 Update of Change of Energisation Status Outcome to Registration
PUB-008 Registration Service Notification of Change of Energisation Status
PUB-041 Cumulative Meter Readings

BPM included as part of the process
MHHS-BP009-Change of Meter

BPM Entry
N/A

Exit BPM
MHHS-BP004-Data Collection
MHHS-BP005-Data Processing

NOTE: Re MAP's
Currently Metering Service Interaction with the MAP is not shown in this Diagram. Recognise that a D303 is sent by the Metering Service to the MAP following on-site metering activity. As things stand it is not proposed to amend this process as part of MHHS Scope.
However, the MHHS Design Team are in the process of reaching out to MAPs to assess if there is any appetite for them to get more involved with the Programme and possibly consider replacement of the existing D303 D-Flow with some communication via the DIP.

Note: As a 'back-stop' in situations where no reading(s) are provided alongside the change in Energisation Status, the Data Service should where required, By Swd, generate an estimated reading(s) for the Date of the Change of Energisation Status (reflecting the nature of the Energisation Change) using the most appropriate method from the Method Statement.

From BP09 Change of Meter
All meters removed & MPAN De-Energised

For traditional pre payment meters MS will need to issue a D0179 to supply as well as issuing MHHS-IF-007 to the DIP.

Note: Metering Service should, if able, capture and send read(s) (Cumulative IF041 and/or Register D010) even where Change of Energisation Status is unsuccessful.

Note: Metering Service will capture Cumulative Register(s) Readings as a minimum.
Recovery of HH Data should be undertaken as per the contractual agreement between the Supplier his Service Providers (Metering & Data Service), and shared via an agreed mechanism.
