Minutes and Actions

DECISION: Approve minutes. Update on open actions, closing where appropriate

Chair and Secretariat

5 mins

Minutes and Actions review

1. **Approval of Minutes** from 19 July TMAG
2. **Open Actions and Actions from previous TMAG** (actions will be discussed by exception. Please review the action updates ahead of the meeting)

Ref	Date	Action	Owner	Due	Status	Latest Update
TMAG19-02	31/05/23	Programme to produce a plan-on-a-page for the Migration deliverables (including lower-level artefacts).	Programme (John Wiggins)	16/08/23	Recommend Closed	To be included in the appendices.
TMAG20-02	19/06/23	Programme to discuss End-to-end Testing Integration Strategy, and provide a plan to socialise when industry will see this document.	Programme (Lee Cox)	16/08/23	Open	Target update for the End-to-end Testing Integration Strategy is October TMAG.
TMAG21-01	19/07/23	Programme to include a verbal update for each of the top risks relevant to TMAG at the next meeting.	Programme	16/08/23	Recommend Closed	Top Programme risks related to TMAG to be provided as a rolling update.
TMAG21-02	19/07/23	Elexon Qualification Lead to provide update on R525 at the next TMAG.	Elexon (Anna Millar)	16/08/23	Recommend Closed	To be provided during agenda item 11.
TMAG21-03	19/07/23	Programme to raise a dependency in the Programme Plan around the SDEP requirements in the Data Cleanse Plan.	Programme (John Wiggins)	16/06/23	Recommend Closed	This has been actioned. <u>D163</u> : There is a dependency on SDEP being improved to enable it to be used as set out in the Data Cleanse Plan. It needs to be improved so that data cleanse messages can be separated out from BAU messages and also it needs to be made accessible to all Market roles.

*R281: There is a risk that there may not be sufficient time for later Qualified Participants to complete their migration activities between M14 and M15.

R525: There is a risk that Suppliers with large portfolios of MPANs could be allocated to later qualification tranches as a result of the 'first come first served' approach, which would not leave enough time to migrate a large portfolio before the M15 deadline.

Programme Updates

INFORMATION: Provide updates from L2/3 governance groups and wider Programme activity

Governance group updates

Programme Steering Group (PSG)

Updates from PSG 02 August 2023

- Route to M9:** PSG received an overview of activities required and the process for approval in the sign-off of M9 (System Integration Test Start). This included the route to SIT readiness, SIT CIT & SIT Functional timelines and an overview of decision choreography & high-level criteria.
- SIT Assurance Observations:** PSG received an overview of observations gathered as part of delivery and design assurance in readiness for M9 (System Integration Test Start)
- Core Capability Provider Update:** PSG members received focused delivery updates from SCS, DCC and RECCo
- IPA Testing Assurance:** The IPA provided an update on the outcome of the P1 Test Assurance report and timelines for P2.

PSG papers available [here](#).

Testing and Migration Advisory Group (TMAG)

Update from TMAG 19 July 2023

- Data Cleanse Plan:** The TMAG approved version 0.3 of the Data Cleanse Plan and the setting up of a new Data Cleanse Working Group.
- Milestone changes for approval:** The TMAG approved milestone changes to the Environment Approach and Plan (with the caveat of further iteration on the two latter dates), CIT Scenarios and SIT Functional Test Scenarios
- Overarching Test Data Approach and Plan:** The TMAG approved version 0.8 of the Overarching Test Data Approach and Plan.
- CIT Test and Test Data Approaches & Plans:** The TMAG approved version 0.4 of the CIT Test Approach and Plan & version 0.5 of the CIT Test Data Approach and Plan.
- Working Group Progress Updates:** The Programme provided an update on the Qualification and E2E Sandbox Working Group.
- IPA Test Assurance Update:** The IPA provided an update on the outcome of the P1 Test Assurance report and timelines for P2.

Design Advisory Group (DAG)

Updates from DAG 09 August 2023

- CR024 Decision:** The DAG Chair approved [CR024 \(Data Item Names and Descriptions\)](#). The change will now be scheduled for release via the Design Issues Notification (DIN) Log and the release date confirmed in due course.
- CR023 & CR027:** Decisions on approval of [CR023 \(Standardisation of Interfaces within the Smart and Advanced Data Services Roles\)](#) and [CR027 \(Distribution Use of System \(DUoS\) E-Billing Data Integration Platform \(DIP\) message for MHHS\)](#) were deferred to the September 2023 DAG meeting, pending the provision on implementation plans by the Programme.
- CR028, CR029 & CR030:** These new CRs were approved for issuance to Impact Assessment (IA) subject to minor amendments. Each CR will be issued for IA in due course with notification to be provided to all Principal Contacts and view The Clock.
- DES-196 D-Flow and Interface Mapping:** DAG approved the issuance supplementary documents relating to data flows for consultation.

Cross Code Advisory Group (CCAG)

Update from CCAG 26 July 2023

- Horizon Scanning Log:** For the DCUSA, DCP416, DCP328 were discussed. The Programme clarified that DCP416 had been raised as a change and DCP328 had been rejected. For REC, R0117, R0132, R0133, R0043, R0062 were discussed. The REC also gave an update to the existing Code Body changes.
- CCAG Reporting:** The Programme provided updates on code drafting activities against approved code drafting plan, including updates on Registration and BSC Central Services consultation responses. There was further updates on Interfaces, Qualification, Migration, Code Drafting POAP and the plan for an additional Mop-up consultation in December.
- CR018 Code Drafting Approach:** The Programme provided an overview of their interpretation of how CR018 design changes are to be translated into code.
- CDWG Update:** The Programme provided an update from the Code Drafting Working Group (CDWG).

CCAG papers available [here](#)

Wider Programme updates

Readiness Assessment Three (RA3)

On **5 September 2023**, the Programme will run the third Readiness Assessment (RA3) and the Programme will issue questions, seeking responses from participants on their Programme readiness. We'll email the RA3 survey to Programme participants on **5 September** and participants have until **25 September 2023** to complete the survey.

Participant Checklist

- Interim Release 3 Design Artefacts are available on the [Baselined Design Artefacts page of the MHHS website](#). For ease we have also published [Red-lined Design Artefacts page](#) to make clear which sections have been updated. The **objection cut-off date for Interim Release 4 is Wednesday 16 August 2023**. A new version of the Design Issue Notification (DIN) Log and will be updated again following publication of the Interim Release 3 Design Artefacts. For more information please visit the [Design Review Process page of the MHHS website](#) and the [Master Consultations Dashboard](#)
- The Programme have published an updated version of the Environment Approach & Plan along with a Consolidated Comments Log. We've published two forms of the document:
 - Red-lined version showing the changes between v2.4 and v2.5
 - Clean uplifted version (v2.5) that reflects actioned comments

Both documents and the Consolidated Comments Log are available on the [Testing Overview page on the MHHS website](#).

- The MHHS Programme has received the documents: **ISD Participant Guidance Document** and **seven ISD Data Sample files** provided in csv format. They should be reviewed with the **DES138 Interface Catalogue** and **BP021 Industry Standing Data (Exxon Central Systems (ECS)) v5.0**, both of which are available as part of the [Baselined Design Artefacts](#).
- To support Programme participant testing across multiple versions of the Design, the Programme has released the DIP Simulator in both the **Design version 5** and the new **Design Interim Release 2**.

Guidance Documents:

- We've published the **Data Integration Platform (DIP) Certification Process Map** on the [DIP page of the MHHS website](#).
- We've launched a [Programme Knowledge Base](#) to help Programme participants.

Upcoming events:

- The next Design Advisory Group (DAG) is on **Wednesday 9 August 2023**.
- MHHS Webinar: Readiness Assessment Three (RA3) on 24 August 2023 12:30-13:15
- MHHS Webinar: Data Integration Platform (DIP) Onboarding on 7 September 2023 12:30-13:15
- 8 August:** Code Drafting Working Group (CDWG), Qualification and End to End Sandbox Working Group (QWG)
- 9 August:** Design Advisory Group (DAG), Extraordinary Systems Integration Testing Working Group (SITWG)

Environments Approach and Plan

DECISION: Approve version 2.5 of the Environments
Approach and Plan

Programme (Simon Berry)

10 mins

Environments Approach & Plan, v2.5

- Version 2.4 of the Environments Approach & Plan document was issued for review on 6th July, with the review period closing on 13th July.
- 118 comments were received. None of the comments were 'showstoppers'. All comments have been responded to and where required updates made to the Environments Approach & Plan, uplifted to v2.5.
- This document covers the test environment architecture for CIT.
- Further iterations of the document will be made in order to include;
 - SIT Functional Testing and non-SIT LDSO Qualification Testing
 - Non-Functional Testing (including; Migration, non-Functional and Operational testing)
 - Qualification and Sandbox
- One of the principles of the MHHS Programme is that we sign off documentation when we have the majority of content as 'known'. Further iterations of documents are permissible and will follow the MHHS Programme review process.
- The August EWG endorsed the recommendation to seek sign-off of the Environments Approach & Plan, v2.5.
- TMAG approval of the Environments Approach & Plan, v2.5 is requested.

DIP Onboarding / DCC PKI Certificates

- DIP Onboarding, nominating PKI Officers and requesting / receiving PKI certificates are key pre-requisites for CIT.
- Avanade and the SI have developed an onboarding plan.
- Communications have been issued that state the onboarding roadmap, including the timeline, any artefacts that will be issued and the date of the onboarding webinar in September.
- The elapsed period for completing the GlobalSign process is ~5 days, this includes the registration of webhooks.
- The milestone dates need to be included in the Programme Plan, these dates are;

Activity	Start date	End date	Notes
CIT Interval #1	9 th October '23	13 th October '23	
CIT Interval #2	16 th October '23	20 th October '23	
CIT Interval #3	30 th October '23	10 th November '23

SIT Functional Test Approach and Plan Approval

DECISION: Approve version 0.4 of the SIT Functional Test Approach and Plan

Programme (Lee Cox)

5 mins

Principal updates

- SIT Test Approach and Plan consultation on v0.2 27th July - 88 comments received from 11 participants.
- Assurance review on v0.3 red-line changes ended on 4th Aug - 9 comments received from 3 participants.
- 2 minor changes have been made in v0.4 (published 9th Aug):
 - Change in Section 5.1 Scope - 'Registration Services (MPRS)' has been changed to 'Registration Services (REGS)'.
 - Change in Section 9.1 Test Meetings - addition of Code Body representation at weekly test meetings.
- All comment responses were published along with version 0.4 (clean and red-line versions) on the [collaboration base](#).
- **Decision:** requesting TMAG Approval of the document

To approve T1-TE-1000

- Control Point 2 approved
- Readiness Assessment 3 acceptable
- IPA report supportive
- FTIG recommendation
- TMAG T2-TE-0250 and T3-TE-0060 decisions reviewed

These are indicative criteria (details to be reviewed and agreed by PSG)

To approve T2-TE-0250

SI	PPs
Designs assured	Environments in place
Delivery plans assured	Test data in place
PPs' PIT assured (IR2)	PKI certificates in place
Test tools in place / primed	Defect management understood
FTIG recommendation	
Resources in place and trained on ways of working	
Readiness forecast for CIT Intervals 2 to 6 starts is satisfactory	
Readiness forecast for SIT Functional start is satisfactory	

Details being worked through per timetable on slide 10

To approve T3-TE-0060

- T2-TE-0250 approved by TMAG (fully or conditional on work-offs before T3-TE-0060)
- Any work-off items from T2-TE-0250 complete and T3-TE-0060 fully approved or T3-TE-0060 approved based on agreed work-off plan
- Decision to start CIT Interval 1 is contingent on PSG M9 approval

Details being worked through per timetable on slide 10

Route to SIT Readiness

Principles:

- Build on artefacts already agreed with PPs via governance
- Role of governance groups SITWG & TMAG strongly supported by FTIG
- Repeatable process for each CIT interval, with regular look-aheads on readiness statuses
- Look ahead also to future SIT Functional start

SIT Component Integration Test Approach & Plan extract

7.1.6 Test Entry Criteria
The following deliverables have been produced by the SI, reviewed, assured and approved as appropriate for the test stage:

- Test Approach and Plan.
- Test Data Approach and Plan.
- Test Scenarios.
- Test Cases.
- Requirements Traceability Matrix.
- Test execution schedule (SIT participants will be consulted).

The following have been set up by the SI and confirmed as ready for test commencement:

- Test data has been allocated to participants.
- Test stubs & Harnesses.
- Test Management Tool
 - Tests have been loaded.
 - Tests have been loaded and assigned to relevant participants.
- Defect Management process.
- Environment Management process.
- Release Management process.
- Test governance.
- Test meetings.
- Test Reporting.

For Participants entering SIT:

- Evidence of successful PIT Completion for the CIT stage off plans agreed and tracked - please refer to [REF-02] for details of the PIT exit criteria.
- Environment Connectivity proving has been successfully completed.
- Test Data allocation has been loaded, verified, and assured.
- Participant users have been onboarded to the MHS Test Environment.
- Participants have confirmed they have resources with the test environment and defect management process.

Qualification Update

INFORMATION:

- Update on discussions with code delivery bodies on qualification and activity at the QWG

Elexon & REC Performance Assurance

5 mins

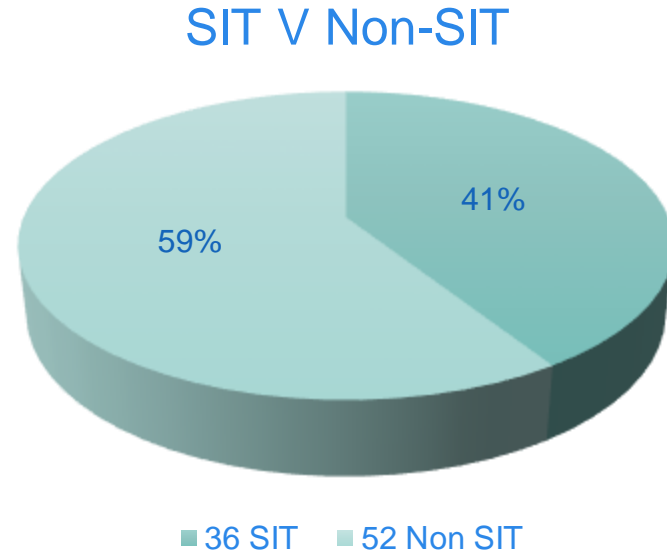

Responses received:

- Elexon did not request information from participants expecting to undertake the Metering Service role but received updates from some. Where these were received, they have been included in the information provided on expectations here
- Responses at organisational level - There could be more than one MPID for MHHS per response. Elexon were informed of 88 potential MHHS MPIDs from the 44 responses received
- Elexon is reviewing where responses were not received and will follow up via OSMs (majority small Suppliers)

The responses indicated the following percentage of MPID breakdown between the SIT and non-SIT routes:

- 10 of the 36 MPIDs expected to use the Placing Reliance Policy for SIT
- 13 of the 52 Non-SIT participants did not expect to use the Placing Reliance Policy
- 2 of the 52 Non-SIT participants expected to place full reliance
- 31 of the 52 Non-SIT participants expected to place at least some reliance
- The remaining 6 of the Non-SIT participants did not specify whether they expected to use the Placing Reliance Policy

The 52 Non-SIT MPIDs provided the following view of expected Tranche requests:

Tranche 1	Tranche 2	Tranche 3	Tranche 4	Tranche 5	Tranche 6	Tranche 7	Non-SIT LDSO	Not provided
10	0	2	7	2	1	2	14	14

- Code Bodies are currently in the process of understanding with the MHHSP environment and test capacity for the Qualification tranches

The QWG discussed the following areas this month:

- The purpose of Qualification Testing
- The Minimum Level of Testing for QT
- Environment Requirements for QT
- Participant preparation for QT
- QT Entry Criteria and Timescales
- Role Based Qualification
- General updates on changing tranches, the MHHS reporting and escalation process, Qualification artefact delivery and the impact of market movement on Qualification

IPA Test Assurance

INFORMATION: IPA update on the on the activities for Test Assurance

IPA

10 mins

The second IPA testing assurance periodic review, P2, will be performed during August to October 2023 and will form a key input to the PSG SIT entry decision on 30 October 2023. The scope will therefore focus on **readiness ahead of the start of SIT-CIT and how non-SIT participants are progressing**. We have identified a sample of 16 Participants across two cohorts to enable us to assess both SIT Participants and those following the Qualification route. Below are the key exam questions for these cohorts, along with a high level timetable. Participants selected as part of the sample have been contacted and we continue to work closely with the Programme to align on assurance activities to minimise any duplication and disruption for participants.

SIT participant cohort

Drawn from:

SIT Participants and LDP

Overall Exam Questions

- A. Is the programme/participant on track to complete PIT Functional?
- B. Is the programme/participant on track to start SIT-CIT?
- C. Are there any issues not covered above?

Qualification participant cohort

Drawn from:

Non-SIT Participants and Code Bodies

Overall Exam Questions

- D. Are you clear on the steps you need to follow for qualification testing and are you on track?
- E. Are there any issues not covered above?

High Level Timetable

Mobilisation - In progress

- IPA have contacted selected participants
- IPA will hold bilateral briefing sessions with participants to explain process

Fieldwork - Mid August to Mid September

- Bilateral conversations with participants (in person or virtual - approx. 1.5 hours)
- Review of supporting evidence
- Follow up and validation

Reporting - 30 October 2023

- Presented to SRO ahead of decision to enter CIT
- Executive summary shared with PSG in advance of 1st November

Top Programme Risks Related to TMAG

Risk/ Issue ID	Risk description	Risk impact	RAG	Mitigation
R127	There is a risk that the programme doesn't have a legal basis to receive and share Personal Identifiable Information (PII) from MPANs, impacting CIT start	This may lead to delays to the start of CIT	High	<ol style="list-style-type: none"> DPIA has been completed by Elexon and shared with PPs Individual Data Sharing Agreements between Elexon and SIT participation are needed. Drafts have been shared with PPs for review and signature - deadline 28/08/2023. Update (01/08) PPC reaching out to PPs who have not responded to questionnaires. Working through any feedback with Elexon Legal PPs may have to complete their own DPIAs
R501	There is a risk of participants not providing data for SIT	This will mean that M09 can't start and an unmanageable effort will be needed to manufacture all data involved	High	<ol style="list-style-type: none"> Data cut reduced to SIT volunteers and only consisting of the c.4 million MPANs of the two DNOs who have volunteered – so a smaller data cut for PPs to provide First data cut deadline 19/08/2023 from PPs. MHHS to send first block of data back to PPs by 15/09/2023. MHHS Issued data cut guidelines to PPs 20/07.2023. Confirmation of GNG on data cut decision 16/08/2023 RECCo and Elexon-Helix agreed to share EES data and MDD/ISD to be used
R272	There is a risk that Core Capability Providers may be late arriving into their CIT Interval	This would result in a delay to CIT activities and may impact subsequent SIT timelines	High	<ol style="list-style-type: none"> Design, Delivery, Test assurance FTIG (and PSG) monitoring of participants' delivery progress and managing of obstacles to readiness Staggered PIT approach Account Management meetings
R525	There is a risk that Suppliers with large portfolios of MPANs could be allocated to later qualification tranches as a result of the 'first come first served' approach, which would not leave enough time to migrate a large portfolio before the M15 deadline	Suppliers with large portfolios may not have time to complete their migration in time for M15	High	<ol style="list-style-type: none"> Notification of tranches is managed by the Code Bodies and is currently under discussion at the Qualification Working Group. We expect that the Code Bodies will set out the timing for tranche notification in QWG and that Suppliers will comply with requests This is not in the control of the Programme – any enforcement of incomplete migration for Suppliers is a matter for Ofgem. Suggest that the Impact is reduced from 5 to 4 as this doesn't prevent the majority of the market from migrating MPANs, the impact is restricted to a small number of Large Suppliers who are not participating in SIT Legal advice from Elexon has been clear that the allocation of Programme Participants to tranches cannot be influenced by portfolio size For any Supplier that is in Tranche 7 of Qualification, there is still planned to be over 6 months to migrate MPANs. The capacity within the plan will be set at a level to enable suppliers in Tranche 7 to migrate within the >6 month period. (e.g. 35k av MPANs migrated by them each day, which will be a low percentage of the overall capacity).
R119	There is a risk that there may be a drive by participants to constrain testing by providing too few environments	This may result in poor test coverage and defects discovered in live operation	Medium	<ol style="list-style-type: none"> Environment approach and plan published specified instructions for PPs - approved in February TMAG version 2.2 - this specifies environment approach parties to take and number of environments. Seeking uplift to v2.5 at the August TMAG. Monitoring via Monthly Environments Working Group (EWG) and bilaterals. Monitoring each test phase during SIT stages - decreasing risk month by month. EOY checkpoint to see where we're at with SIT Non-functional approaches and plans.
