FREEZE IMPACTS TO REC CHANGE

Affects Change Proposals which could impact the scope or delivery of the MHHS Programme.

MHHS Core Systems, also affected by the Code Freeze planned from November 2024. REC Services impacted:

- Central Switching Service (CSS)
- Electricity Retail Data Service (ERDS)
- Electricity Enquiry Service (EES)
- And consequentially the Secure Data Exchange Service (SDES)

A review of in-flight CPs and new ones as they are raised has identified some changes that are impacted.

CPs being put on hold until it is appropriate to progress the change. This may differ slightly between each Change Proposal depending on the nature of the change. These have been updated on the Horizon Scanning log.

Horizon Scanning REC Change Updates – Change Freeze and Change Proposals On Hold

Top Programme Risks related to CCAG

Theme	Summary	Mitigation Approach Overview	RAG Status	
Top risks to the Code Workstream	The main risk to Code delivery is late changes, which Code needs to reflect, eg through PCRs and/or testing or issues during the SCR process	<ul style="list-style-type: none"> Monitoring triggers to Design and Code change and ensuring there are mechanisms to make changes within the Programme timescales Front load SCR processes, so that issues are identified earlier and within timescales that don't delay the milestone timescales 	Previous RAG	(35 Risks)
			Current RAG	(39 Risks)

Key Risks

R202	There is a risk that Programme testing (CIT/SIT) may identify changes to baselined code and require code updates and further code releases after initial code changes have been approved																														No change	1) Monthly meeting in place between Test and Code to monitor likely volume of changes to Design and by association Code 2) To ensure the change control process is followed correctly and test item volume known by Code team 3) Ongoing engagement on how code change will be managed
R485	There is a risk that the Design or queries related to Design are not completed or provided in time and as a result do not provide the information required to enable Code drafting delivery																														No change	1) Design process (DIN Process) set up to resolve Design queries 2) Amend Code Drafting Plan to accommodate outstanding Design areas 3) Monitor DIN Volumes 4) Code is baselined against a point in time and after this time, changes are picked up by a CR or post M6 agreed process.
R455	There is a risk that the SCR consultation process highlights issues that require resolution in the Programme																														No change	1) MHHS Programme Code finalisation and consistency check will consult participants to ensure that due process has been followed to mitigate the risk of any party raising concerns in the later SCR consultation

Code Change Going Forward

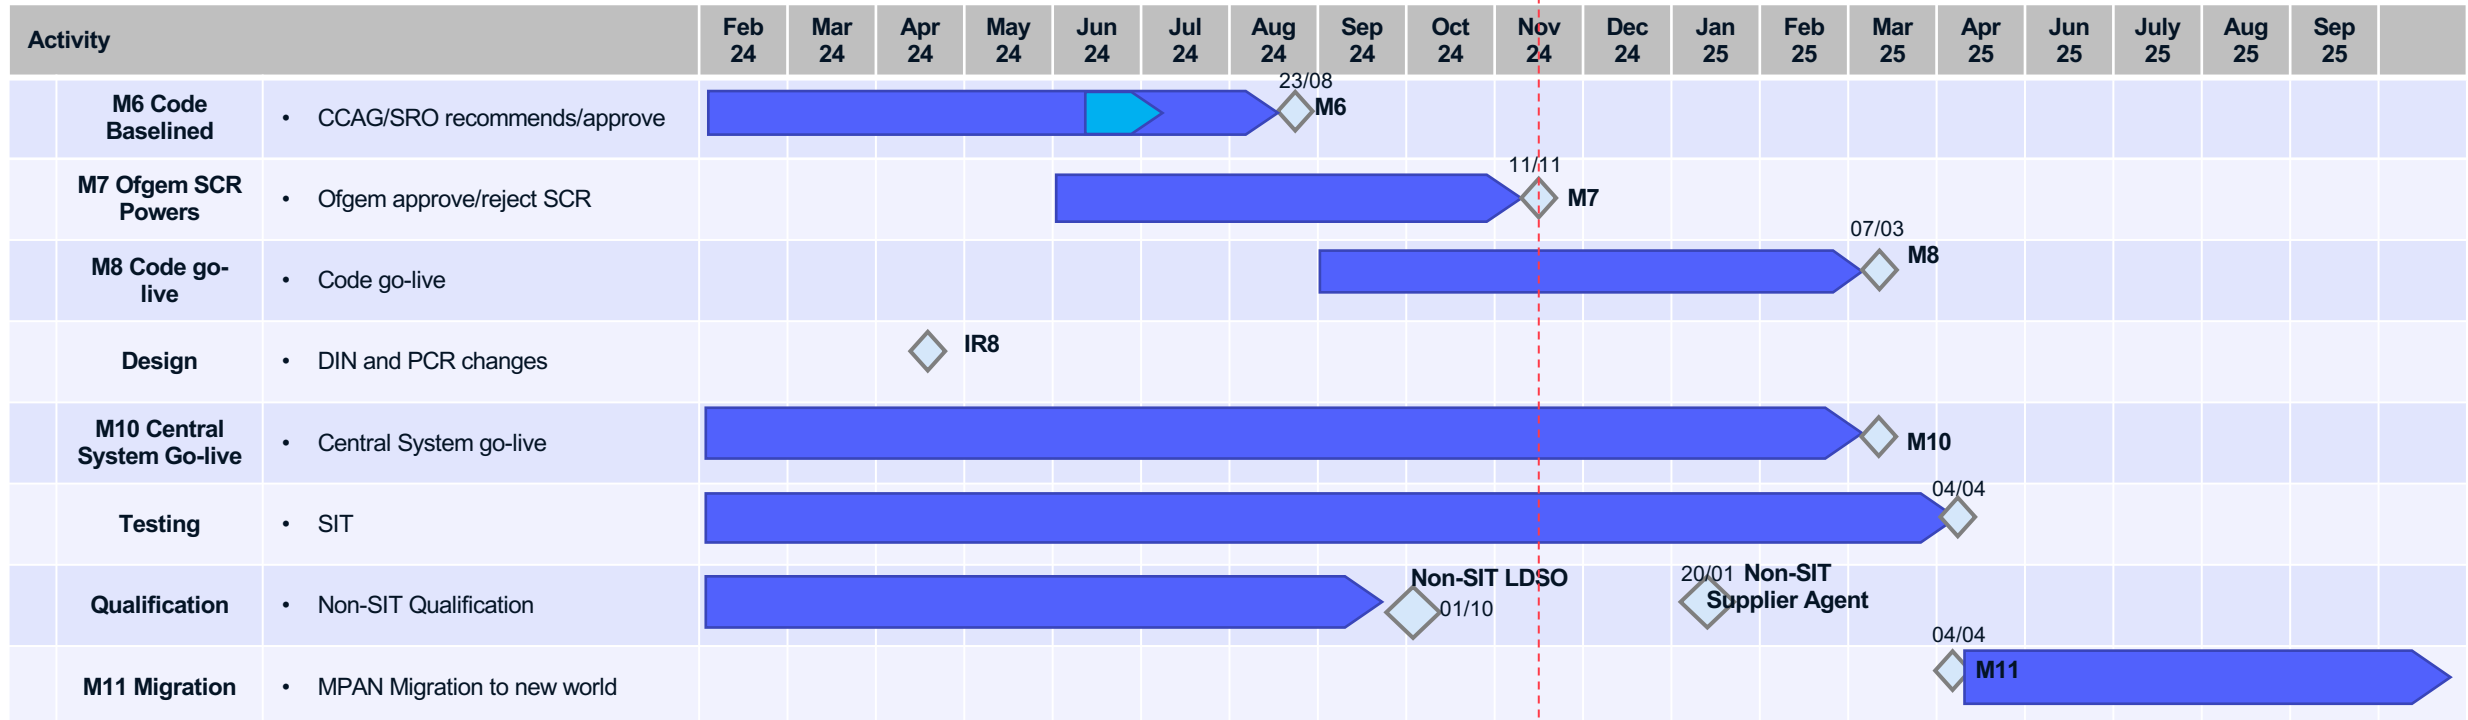

Code change is within Programme control until M7, then Code Body's control

Key Points

- M6 Baseline Code Artefacts – SCR process can then begin
- PCR can amend Code before M7 – Ofgem directs PCR via SCR Powers
- After M7, Code amendments will be via Code Bodies eg Mods/CPs
- **Closer to M10 – design/systems fixed first and Code update can follow**
- After M8/M10 – BAU process

Code 'change' mechanism

Details of exact timings still in development and to presented in May

M6 - Success Criteria

Code Baseline Success Criteria:

- 100% of Design Artefacts correctly translated into the relevant Code text
- Code changes incorporate all approved CRs and DINs
- Code meets the plain English test
- Due Process followed
- Approved by SRO following CCAG recommendation

Key Dependencies:

- Design and inflight DIN and CRs are complete/released
- Code bodies correctly draft the Code in time for M6 baseline
- Due process and governance followed

Key Artefacts:

- BSC/BSCPs, REC Schedules and DCUSA text

What questions should we ask to confirm due process has been followed?

We need Ofgem Legal guidance -

1. Have parties been able to be engage with the Code Workstream?
2. Have parties been able to input into -
 - a) Code meetings?
 - b) Code Artefact consultations?
 - c) Code decisions?
3. Have comments from parties to correct text been addressed?
4. Have the Design Artefact been correctly translated into Code?
5. Do the Code Artefacts make sense? - Plain text test!
6. What are the Code Workstream lessons learnt?

Recommendation Summary

CCAG will continue to at least M8 – if agendas are light, meetings can go ex-committee

CDWG meetings will stop at M6 and stood up only when required

Subgroups will continue to be stood up and down as required – output will be presented to CCAG
