Minutes and Actions

DECISION: Approve minutes and review actions

Chair & Secretariat

10 mins

Minutes and Actions

1. Approval of [PSG 03 April 2024 Headline Report](#)
2. Review of actions:

| Ref | Action | Owner | Due | Latest Update |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PSG18-05 | Look into the assurance process for LDSOs for the accuracy of data for DUoS billing | IPA (Richard Shilton) | January 2024 | ONGOING REMAINING ITEM: IPA to present on DBT2 under agenda item 8. PRIOR ITEM UPDATE FOR INFORMATION: DNO constituency rep has asked further questions on DUoS billing accuracy checks which the Programme has responded to. |
| PSG21-05 | Programme to discuss with IPA the potential inclusion of IPA test assurance activities alongside programme plan information, to assist participants' view of effort requirements | Programme and IPA | Q1 2024 | ONGOING: IPA test assurance activities incorporated into the new MHHS Transition Timeline and Implementation Approach and will be published in advance of June 2024 PSG. In the meantime, participants are encouraged to contact the IPA for any queries on IPA assurance activities. |
| PSG28-01 | Elexon to provide detailed update on the progression of the Settlement Analysis Scoping Working Group (SASWG) outputs. | Elexon (John Abbott) | 07/02/2024 | ONGOING: Elexon to provide update in meeting. |
| PSG30-05 | Ofgem to advise whether changes to the Change Control Approach require Ofgem approval | Ofgem | 03/04/2024 | ONGOING: Ofgem to provide update in meeting. |
| PSG31-01 | IPA to update appeals process following improvements recommended as an outcome of the lessons learned | IPA (Richard Shilton) | 01/05/2024 | RECOMMEND CLOSED: Updated document provided incorporating lessons learned shared at PSG on 03 April 2024. Document to be uploaded to MHHS website . |

CR047 Ratification

DECISION: Decision on ratification of CR047

Programme (PMO)

10 mins

Objective:

PSG to review the outputs of the issued CR048 Impact Assessments and ratify the Change Board's decision to approve the Change Request.

Headlines:

- Overall: **7 respondents supported the change; 1 respondents rejected the change; and 4 respondents abstained.**
- **Those who supported the implementation of the Change Request did so on the following basis:**
 - The revised Qualification L3 Milestones dates are more realistic than the existing plan.
 - The change gives additional and welcome clarity on Qualification Testing deliverables and the revised timelines are supported.
 - Programme activities are being completed within the timeframes referenced in the Change Request, so no change in activity will be triggered.
- **Those who rejected the implementation of the Change Request did so on the following basis:**
 - The change extends the deadline for Test Readiness from the end of July to the end of September, but there are still then a number of supplier/in house costs to be considered in order to achieve Qualification, and a number of risks to consider. *The Programme is working with LDSOs to understand and manage these risks.*
- **Further comments:**
 - A number of risks were been raised that may potentially impact non-SIT LDSO's ability to deliver to the revised milestone plan. The Programme is working directly with LDSOs to manage these risks.
 - Suggested amendments submitted by responding Participants have been addressed by the Programme in the following slides.
- **Implementation:**
 - Implementation can be completed imminently, as the change requires only minor amendments to the Programme Plan.

CR047 – Submitted Impact Assessments

| Programme Parties | CR047 Recommendations | | | |
|-------------------|-----------------------|----------|----------|------------|
| | Yes | No | Abstain | No Reply |
| Large Suppliers | - | - | 1 | 4 |
| Medium Suppliers | - | - | 1 | 6 |
| Small Suppliers | - | - | - | 33 |
| I&C | - | - | - | 41 |
| DNOs | 4 | 1 | - | 1 |
| iDNOs | 1 | - | - | 12 |
| Ind. Agents | - | - | - | 47 |
| Supplier Agents | - | - | - | 7 |
| S/W Providers | - | - | - | 25 |
| REC Code Manager | 1 | - | - | - |
| National Grid ESO | - | - | - | 1 |
| Consumer | - | - | - | 1 |
| Elexon (Helix) | - | - | - | 1 |
| DCC | - | - | 1 | - |
| SRO / IM & LDP | 1 | - | - | - |
| IPA | - | - | 1 | - |
| Avanade | - | - | - | 1 |
| Totals | 7 | 1 | 4 | 180 |

Notes:

The classification of Independent and Supplier Agents is maintained by the Programme Party Coordinator and is subject to change.

Rationale for being marked down as abstained:

- One Large and one Medium Supplier abstained from providing a recommendation as due to not being a non-SIT LDSO, they cannot provide an impact.
- The IPA and DCC abstained from providing recommendations as they are not impacted by the proposed changes.

CR047 Impacts – Views on the proposed approach (Page 1)

| Programme Parties | Range of respondents' views on benefits and concerns (related to the approach in CR047) |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Large Suppliers | <ul style="list-style-type: none"> The one responding Large Supplier abstained from providing a recommendation as they are not an LDSO. |
| Medium Suppliers | <ul style="list-style-type: none"> The one responding Medium Supplier abstained from providing a recommendation as they are not an LDSO. |
| Small Suppliers | <i>Did not respond.</i> |
| I&C | <i>Did not respond.</i> |
| DNOs | <ul style="list-style-type: none"> + Four of the five responding DNOs support the implementation of the Change Request. + The revised Qualification L3 Milestones dates are more realistic than the existing plan. + The change gives additional and welcome clarity on Qualification Testing deliverables and the revised timelines are supported. – One of the five responding DNOs rejected the implementation of the Change Request. – They raised a number of supplier/in house costs associated achieving Qualification which are being addressed by the Programme. • There is a lack of contingency available in the programme plan between the end of Qualification Testing and M10 Migration go-live. This is being managed by the Programme with comms and engagement through bi-laterals and the establishment of the LDSOWG. • The MPRS Sprint 9 is currently be running behind schedule and may not be available until September 2024. This is incompatible with the new L3 milestone 'Non- SIT LDSO submission deadline for final PIT Test Completion Report (Functional and Migration)'. The Programme requests that Functional and Migration PIT are completed by the end of August with Non-Functional and Operational complete by the end of September. MPRS could be included in the scope of the September milestone. • The programme should ensure that the dependencies between SIT completion, non-SIT LDSO PIT completion and non-SIT LDSO Qualification entry are mapped and tracked. Links with SIT are actively tracked and managed within the programme with all links monitored by the PMO. • <i>A number of risks were been raised that may potentially impact non-SIT LDSO's ability to deliver to the revised milestone plan. The Programme is working directly with LDSOs to manage these risks.</i> |
| iDNOs | <ul style="list-style-type: none"> + The one responding iDNOs supported the implementation of the Change Request. |
| Agents | <i>Did not respond.</i> |
| S/W Providers | <i>Did not respond.</i> |

CR047 Impacts – Views on the proposed approach (Page 2)

| Programme Parties | Range of respondents' views on benefits and concerns (related to the approach in CR047) |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| REC Code Manager | <ul style="list-style-type: none"> + RECCo are supportive of the implementation of the Change Request. • They suggest the title of Line 19 'BSC PAB & REC Manager approval of Qualification for Non-SIT LDSOs (Functional, Migration, NFT, Operational) Completion (Start of Migration for Qualification Participants)' is simplified to 'BSC PAB & REC Manager approval of Qualification for Non-SIT LDSOs'. Agreed, this will be amended. • The second table in the supporting documents does not appear to be fully aligned to the proposed milestones. RECCo suggests that this is removed from the CR proposal. Agreed, this will be amended. |
| National Grid ESO | <i>Did not respond.</i> |
| Consumer | <i>Did not respond.</i> |
| Elexon (Helix) | <i>Did not respond.</i> |
| SRO / IM & LDP | <ul style="list-style-type: none"> + The Programme is supportive of the implementation of the Change Request. + Work is being completed within the timeframes referenced in the Change Request, so no change in activity will be triggered. + Implementation will require minor updates to the Programme plan. |
| IPA | <ul style="list-style-type: none"> • The IPA abstained from providing a recommendation as the change does not impact their activities. |
| Avanade | <i>Did not respond.</i> |

PSG decision on CR047 'Implementation of 'Amending Qualification Milestones for non-SIT LDSO QT'

CR047 was approved by the Change Board, subject to PSG ratification, on the basis that:

- A majority of LDSOs expressed support for the change through Impact Assessment responses
- The proposed milestone changes contained within CR047 had been discussed with participants via the Qualification Advisory Group (QAG) and Qualification Working Group (QWG)
- The Impact Assessment comments had been addressed / were addressable
- Certain existing qualification milestones were already beyond their baseline completion dates and required change to rebaseline to the new forecast dates

The Change Board Headline Report and meeting recording can be found on the [Change Board area of the Programme Collaboration Base](#)

The PSG are requested to advise the SRO on whether CR047 should be approved:

| | |
|-----------------|---------------------------------------------------------------------------|
| DECISION | SRO to approve/reject CR047 and associated implementation approach |
|-----------------|---------------------------------------------------------------------------|

Confirmation of next steps will be provided following the decision

CR048 Ratification

DECISION: Decision on ratification of CR048

Programme (PMO)

10 mins

Objective:

PSG to review the outputs of the issued CR048 Impact Assessments and ratify the Change Board’s decision to approve the Change Request.

Headlines:

- Overall: **7 respondents supported the change; 0 respondents rejected the change; and 4 respondents abstained.**
- **Those who supported the implementation of the Change Request did so on the following basis:**
- The updated timelines for Qualification are required, and need to be part of the MHHS Programme Plan.
 - Having the Programme Plan milestones reflecting the latest Qualification Approach & Plan provides greater clarity and certainty to support the delivery of MHHS.
 - Programme activities are being completed within the timeframes referenced in the Change Request, so no change in activity will be triggered.
- **Further comments:**
 - A number of comments and suggested amendments were raised by responding participants, which have been addressed by the Change Raiser in the following slides.
- **Implementation:**
 - Implementation can be completed imminently, as the change requires only minor amendments to the Programme Plan.

CR048 – Submitted Impact Assessments

| Programme Parties | CR048 Recommendations | | | |
|-------------------|-----------------------|----------|----------|------------|
| | Yes | No | Abstain | No Reply |
| Large Suppliers | 3 | - | - | 2 |
| Medium Suppliers | 1 | - | - | 6 |
| Small Suppliers | - | - | - | 33 |
| I&C | 1 | - | 1 | 39 |
| DNOs | - | - | 2 | 4 |
| iDNOs | - | - | - | 13 |
| Ind. Agents | - | - | - | 47 |
| Supplier Agents | - | - | - | 7 |
| S/W Providers | - | - | - | 25 |
| REC Code Manager | 1 | - | - | - |
| National Grid ESO | - | - | - | 1 |
| Consumer | - | - | - | 1 |
| Elexon (Helix) | - | - | - | 1 |
| DCC | - | - | - | 1 |
| SRO / IM & LDP | 1 | - | - | - |
| IPA | - | - | 1 | - |
| Avanade | - | - | - | 1 |
| Totals | 7 | 0 | 4 | 181 |

Notes:

The classification of Independent and Supplier Agents is maintained by the Programme Party Coordinator and is subject to change.

Rationale for being marked down as abstained:

- Two non-SIT LDSOs abstained from providing a recommendation as they are unaffected by the change.
- One I&C Supplier abstained from providing a recommendation as they do not believe the Change Request includes adequate information to do so.
- The IPA abstained from providing a recommendation as they are not impacted by the proposed changes.

CR048 Impacts – Views on the proposed approach (Page 1)

| Programme Parties | Range of respondents' views on benefits and concerns (related to the approach in CR048) |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Large Suppliers | <ul style="list-style-type: none"> + All three responding Large Suppliers supported the implementation of Change Request. + The updated timelines for Qualification are required, and need to be part of the MHHS Programme Plan. + Having the Programme Plan milestones reflecting the latest Qualification Approach & Plan provides greater clarity and certainty to support the delivery of MHHS. • The following comments were noted: <ul style="list-style-type: none"> • T3-QU-0068 Operational Testing elements of Qualification Approach & Plan v4 approved by REC PAB & BSC PAB has an incorrect task description “The approval by BSC PAB and REC PAB of the Non-Functional Testing Approach & Plan for Qualification” This will be amended. • Qualification Wave 1 Participants have submitted PIT Test Completion Report and evidence for QT Entry is outlined as 20/12/2024 - this completion of PIT is aligned with continued SIT Functional regression, Migration regression, Non-Functional and Operational testing. As such there is a risk that the release used in this testing may be not be the final SIT release driving additional regression testing and a risk on Qualification testing. This should be added to the Programme RAID log. |
| Medium Suppliers | <ul style="list-style-type: none"> + The one responding Medium Supplier supported the implementation of the Change Request. |
| Small Suppliers | <p><i>Did not respond.</i></p> |
| I&C | <ul style="list-style-type: none"> + One responding I&C supplier supported the implementation of the Change Request. • One responding I&C supplier abstained from providing a recommendation. • The significant movement of T3 milestones since the baseline, which feed into T2 static dates, gives Participants less time to plan for the unchanged T2 dates. • The scheduling impact has not been clearly set out, and therefore the Change Request does not give enough information to provide a recommendation. The milestones are based on the POAPs which have been shared and worked from since last November at QWG and PSG. |
| DNO | <ul style="list-style-type: none"> • The two responding DNOs abstained from providing a recommendation as the change does not impact them. |
| iDNO | <p><i>Did not respond.</i></p> |
| Agents | <p><i>Did not respond.</i></p> |
| S/W Providers | <p><i>Did not respond.</i></p> |

CR048 Impacts – Views on the proposed approach (Page 2)

| Programme Parties | Range of respondents' views on benefits and concerns (related to the approach in CR048) |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| REC Code Manager | <ul style="list-style-type: none"> + RECCo are supportive of the implementation of the Change Request. • They made the following comments: <ul style="list-style-type: none"> • The date formatting is mixed and includes both dd/mm/yyyy and mm/dd/yyyy. This needs to be amended to be consistent and avoid misinterpretation. This will be amended. • They suggest that T3-QU-0062 and T3-QU-0068 are combined, as the operational updated to the QA&P is expected to also be the final update. This will be amended as long as removing one of the milestones doesn't require any additional admin. • If retained, the description of T3-QU-0068 should be amended as it does not match the title. The description should be amended to reference operational testing. Agreed and will be amended, dependent on the above. • New milestone – row 11 – 'Pre-Qualification Submission and PIT Test Plan Deadline for Submission': should be amended to 'PIT Test Plan' to 'PIT Approach and Plan' to match the description in the QA&P. This will be amended. • New milestone – row 47 – 'Qualification Wave 4 Participants have submitted their final QAD' – date should be 12/12/2025 to match the QA&P. This is an error with the QA&P, which will be updated to align with the CR. |
| National Grid ESO | <i>Did not respond.</i> |
| Consumer | <i>Did not respond.</i> |
| Elxon (Helix) | <i>Did not respond.</i> |
| SRO / IM & LDP | <ul style="list-style-type: none"> + The Programme are supportive of the implementation of the Change Request. + Work is being completed within the timeframes referenced in the Change Request, so no change in activity will be triggered. + Implementation will require minor updates to the Programme plan. |
| IPA | <ul style="list-style-type: none"> • The IPA abstained from providing a recommendation as the change does not impact their activities. |
| Avanade | <i>Did not respond.</i> |

PSG decision on CR048 'Implementation of 'Amending Qualification Milestones for non-SIT Supplier and Agent QT'

CR048 was approved by the Change Board, subject to PSG ratification, on the basis that:

- Impact Assessment respondents expressed unanimous support for the change
- The proposed milestone changes contained within CR047 had been discussed with participants via the Qualification Advisory Group (QAG) and Qualification Working Group (QWG)
- The Impact Assessment comments had been addressed / were addressable
- Certain existing qualification milestones were already beyond their baseline completion dates and required change to rebaseline to the new forecast dates

The Change Board Headline Report and meeting recording can be found on the [Change Board area of the Programme Collaboration Base](#).

The PSG are requested to advise the SRO on whether CR048 should be approved:

| | |
|-----------------|---------------------------------------------------------------------------|
| DECISION | SRO to approve/reject CR048 and associated implementation approach |
|-----------------|---------------------------------------------------------------------------|

Confirmation of next steps will be provided following the decision

CR044 Decision

DECISION: Decision on implementation following escalation from DAG

Programme (PMO)

10 mins

CR044 – Implementation of ‘Data Refresh’ Message IF-051 - Impact Assessment Summary

Objective:

PSG to review the outputs of the issued CR044 Impact Assessments and advise SRO on their decision to approve or reject the Change Request.

Headlines:

- Overall: **16 respondents supported the change; 5 respondents rejected the change; and 3 respondents abstained.**
 - A significant number of respondents, both those who supported and those who rejected the change, noted that they supported the implementation of the change, but did not see this being possible ahead of M10.
- **Those who supported the implementation of the Change Request did so on the following basis:**
 - A CSS failure in July last year highlighted the importance of having the tools available to be able to align and retrospectively correct supply start and end dates. If the change is not implemented, this carries a significant risk should this event be repeated.
 - The existing ECOES refresh mechanism is utilised under current arrangements for this same purpose and works well, and so it would be sensible to provide this equivalent functionality under MHHS operation.
 - The change is a pre-migration contingency measure and is required before go-live, so that if any incidents occur the solution can be called upon in early life.

Those who rejected the implementation of the Change Request did so on the following basis:

- It was questioned what benefit this change would deliver prior to migration, as it is believed that the data cleanse and migration activity will resolve many issues.
 - Given existing Programme commitments, the delivery of this Change Request prior to the M10 milestone may impact the success of other MHHS deliverables. There is no capacity to deliver this functionality prior to the M10.
 - The MHHS design is based on the principle of a single view of truth. This change disregards the requirement to align the rest of the industry to the registration services truth following such an incident.
- **Further comments:**
 - Only one rejecting respondents stated that they did not support the implementation of the change at some stage. Other concerns were based entirely on delivery timelines.
 - A number of respondents suggested implementing the change in the first post-M10 release.

CR044 – Implementation of ‘Data Refresh’ Message IF-051 - DAG Recommendation and Risk Analysis

The Design Advisory Group (DAG) approved the design and solution of CR044 in principle. However, the DAG recognises that there are risks associated with the implementation of CR044 due to the proximity of M10. Additionally, CR044 does not meet the change freeze criteria.

The Programme recommends that the change is implemented post M10. The associated risk with doing so are listed below.

The Programme will work with the Code Bodies to understand when implementation will be possible. Implementation will be completed as close to M10 as possible, whilst managing the safety and stability of the new system.

| Risk Statement | Risk Detail | Risk Mitigation |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>If this CR is implemented post M10, there is a risk that should a significant systems outage occur which give rise to a need to realign data between the Registration Service / DIP / EES / and/or MDS, there will be no predefined mechanism to refresh/realign data</p> | <ul style="list-style-type: none"> • If core data were to become misaligned through a significant systems outage there would be no pre-planned mechanism/process to correct the issue. • The further the Programme progresses into migration the greater the impact to delivery timescales should a significant systems outage occur. • This CR provides a mitigation in the form of an agreed set of data to realign Registration, EES and MDS. • The CR does not cover the operational recovery process of managing the incident recovery to how information is resynchronised. • Support Team(s) would need to ‘improvise’ a mechanism and process across industry to realise a fix to the data. | <ul style="list-style-type: none"> • The Programme will continue to assess the potential downstream impacts of the solution and agree with DAG. • The Programme will work with Code Bodies and engage them as the programme transitions to BaU |

FOR DECISION

The PSG is requested to accept the recommendation, while recognising the associated risk of implementing this change after M10

CR045 Decision

DECISION: Decision on implementation following escalation from DAG

Programme (PMO)

10 mins

CR045 – Supply Start Date (SSD) Correction Tool – Impact Assessment Summary

Objective:

PSG to review the outputs of the issued CR045 Impact Assessments and advise SRO on their decision to approve or reject the Change Request.

Headlines:

- Overall: **16 respondents supported the change; 9 respondents rejected the change; and 4 respondents abstained.**
 - Of the 9 rejecting respondents, 4 support the implementation of the solution, but have raised concerns regarding the ability to implement ahead of M10.
- **Those who supported the implementation of the Change Request did so on the following basis:**
 - The change will ensure that the correct supplier is liable for all obligations without any ambiguity around responsibility because of a discrepancy between CSS & central registration systems and services.
 - The change ensures continuity between current and future arrangements and reduces post-implementation risk.
 - There should be a mechanism to correct MPRS/ERDS where the information held does not align with the CSS. Not retaining a solution to correcting registration errors within the MHHS solution would cause data issue and settlement inaccuracies.
- **Those who rejected the implementation of the Change Request did so on the following basis:**
 - There is no capacity to deliver this functionality prior to the M10 milestone without impacting other MHHS deliverables. A more realistic timeline is to develop this functionality to go live in the early months following M10.
 - A fundamental element of the MHHS design is to hold a single view of the truth. Mismatches between CSS and the Reg Service should be corrected rather than introducing a workaround.
- **Further comments:**
 - A number of queries were raised in response to the Change Request. Many of these are answered by the appendix issued with the Change Request. Others have been responded to by the Programme in the following slides.

CR045 – Supply Start Date (SSD) Correction Tool – DAG Recommendation and Risk Analysis

The Design Advisory Group (DAG) approved the design and solution of CR045 in principle. However, the DAG recognises that there are risks associated with the implementation of CR045 due to the proximity of M10. Additionally, CR045 does not meet the change freeze criteria.

The Programme recommends that the change is implemented post M10. The associated risks with doing so are listed below.

The Programme will work with the industry to understand when implementation will be possible. Implementation will be completed as close to M10 as possible, whilst managing the safety and stability of the new system.

| Risk Statement | Risk Detail | Risk Mitigation |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Post M10 the existing SSD correction tool will not work and MPANs migrated to the new settlement arrangements at M11 will fail.</p> <p><i>(Current information provided to the Programme indicate the volume of MPANs in this period is 100-200 per month).</i></p> | <ul style="list-style-type: none"> • There are several known ‘issues’ with the current CSS / Registration Service interactions that give rise to the need to change MPAN Supply Start / End Dates. • The current MHHS Design does not provide for a mechanism whereby the Change of Supplier Date (Supply Start/End Dates) can be changed within the Registration Service. • No automated route to correct CSS/Registration data issues. Support processes would need to be utilised to sort a data fix in Registration Service. Manual processes would be required to inform participants and they would need to sort a manual fix in their systems. • The further the Programme progresses through migration the greater the impact to the misalignment of Supply Start/End Dates. • Currently LDSO Registration Service Super users have access to a tool that allows the changing of Supplier Start / End Dates and issues a D0204 flow off the back of this change. • This existing Super User Tool will cease to work for sites following migration to the MHHS Settlement Regime. | <ul style="list-style-type: none"> • The programme will continue to progress the design solution and agree with DAG. • The programme will work with Code Bodies and engage them as the programme transitions to BaU |

FOR DECISION

The PSG is requested to accept the recommendation, while recognising the associated risk of implementing this change after M10

M10/M11 Cutover Governance Approach

INFORMATION: Updates on cutover governance plan

Programme (Matthew Breen)

15 mins

Background

- The Programme has recently been working on the development of the M10 / M11 Cutover Plan through the Transition and Operational Readiness Working Group (TORWG). As part of this work, we have proposed a governance approach to help manage the cutover period and the approval process for these milestones.
- This approach includes the introduction of some additional governance meetings and the introduction of two additional T3 milestones (*shown on the next slide*) which mark the recommendation from the Migration and Cutover Advisory Group (MCAG) to move ahead with the M10 and M11 Cutover activities, respectively.
- Currently, the M10 / M11 Cutover Plan is out for consultation with Programme Participants, but as this plan relates to Tier 1 milestones, we wanted to bring this to the PSG for discussion and seek your opinion on the governance approach that has been proposed.

The next slide shows the proposed governance approach, while the subsequent slides have been included for information and show the inputs and the approvals / recommendations that we are looking for as an output from each governance meeting.

Overview of Proposed M10 / M11 Decision Choreography

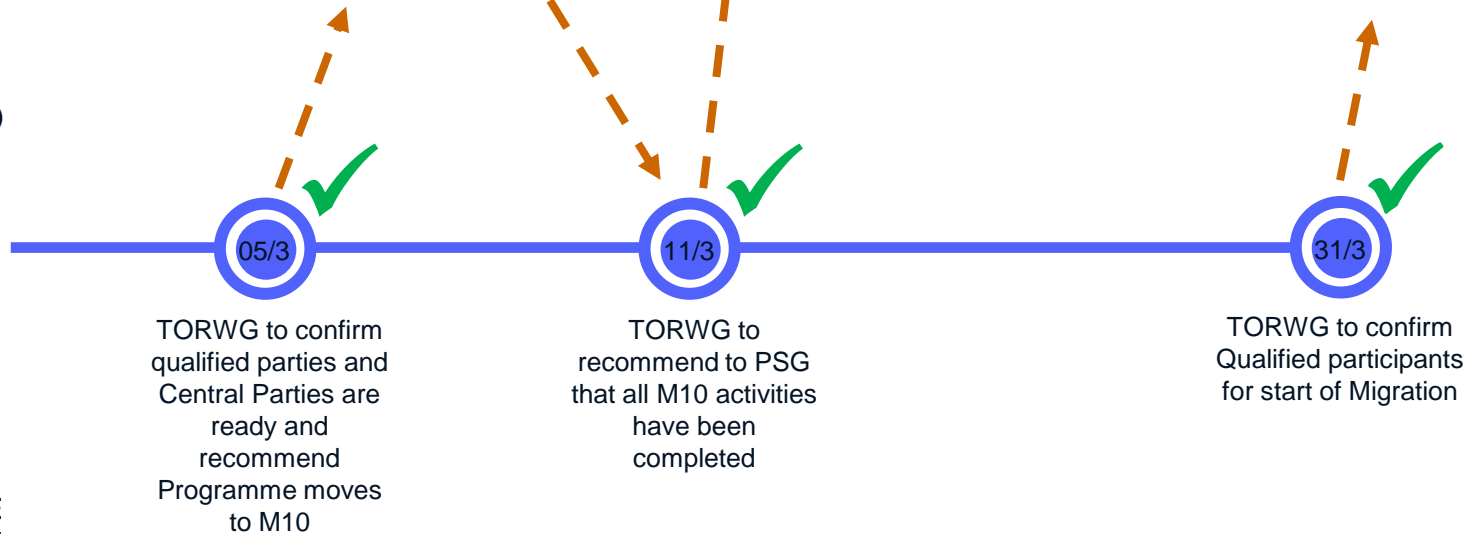

Tier 1 Milestones
(PSG-governed)

Tier 3 Milestones
(MCAG-governed)

(TORWG-governed)

M8 (Code Go-live) will be directed by Ofgem as part of their M7 (Significant Code Review Powers) direction, for implementation of the MHHS Code. We are not expecting any additional governance activities (e.g. Advisory Groups) to be required for M8 implementation, but that the Ofgem direction will align M8 with M10 delivery date.

x/x
Implementation Group

An Implementation Group that sits outside of this Governance structure will also be established to manage the activities that take place in the lead up to and over the cutover period.

Inputs and Approvals / Recommendations from Governance Meetings for M10

Approvals / Recommendations in bold are key outputs from the meetings

| TORWG 05/03 | |
|-------------------------------------------------------------------------------------------|----------------------------------------------------------------|
| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Confirmation of Qualification Status for SIT MVC | Recommendation to MCAG that the Programme can enter M10 |
| Confirmation of Qualification Status for Non-SIT LDSOs | |
| Confirmation of Qualification Status of at least one Supplier and their contracted Agents | |
| Declaration from all Central Parties that they are in a position to move forwards. | |
| Confirmation that Pre-migration Data Cleanse Activities have successfully taken place | |
| Market-wide Participant MHHS Migration Supporting Functionality is Live | |

| MCAG 07/03 | |
|----------------------------------------------------------------|---------------------------------------------------------|
| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Recommendation from TORWG that the Programme should enter M10. | MCAG to approve that the Programme can enter M10 |

| TORWG 11/03 | |
|--------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Self-Declaration from all Central Parties that Cutover activities have been successfully carried out | Recommendation that PSG approves M10 and M13 |
| Confirmation that DIP and ECS have been deployed, Service management is active, ISD has been populated | |
| Self-Declarations against all M10 Data Cleanse Activities | |
| Early life Support Model is in place | |
| MCC Operational | |
| IF-047 has been sent | |

| PSG 12/03 | |
|-------------------------------------------------------|----------------------------------------------------------------------|
| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Recommendation from TORWG that PSG should approve M10 | PSG to approve that M10 and M13 have successfully taken place |

Inputs and Approvals / Recommendations from Governance Meetings for M11

Approvals / Recommendations in bold are key outputs from the meetings

| TORWG 31/03 | |
|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Confirmation of Qualified Parties from Code Bodies | TORWG to report to MCAG on complete list of Qualified Parties ahead of M11 / M12 |
| Self-Declaration that MHHS Functionality will be deployed to Production by Qualified parties. | |
| Production Service Activation Activities have taken place. | |

| MCAG 02/04 | |
|----------------------------------------------|-----------------------------------------------------------------------|
| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Confirmation of Qualified Parties from TORWG | Recommendation to PSG that the Programme can approve M11 / M12 |

| PSG 04/04 | |

| <u>Inputs</u> | <u>Approvals / Recommendations</u> |
| Recommendation from MCAG that the Programme can approve M11 / M12 | Approval of M11 / M12 |

DBT2 (Consequential Change) Risk Assessment

INFORMATION: IPA overview of DBT2 risk assessment

IPA (Richard Shilton)

10 mins

DBT2 (Consequential Change) Risk Assessment

Executive Summary

To enable effective functioning of the electricity market following transition to the new settlement arrangements, Programme Participants need to make DBT2 or “consequential changes” to their systems and processes impacted by MHHS. Given the potential risks to the market and consumers if these changes are not successfully delivered, the IPA performed an assessment to:

- Understand the scope of the consequential changes to form a preliminary view of the associated industry and consumers risk; and
- Recommend a level, nature and timing of assurance required to build confidence in their delivery proportionate to the risk.

As part of the exercise we interviewed selected Participant stakeholders as agreed with the Programme (Appendix A highlights interview list). The exercise did not seek to define the full scope of consequential changes or provide guidance on how they should be delivered.

Overall, at the time of our assessment in March 24, there was **not a consistent understanding of consequential changes and in order to support individual Participants in defining their consequential changes scope, further clarity around DBT1 scope was required.**

It is noted that the responsibility of individual Participant to impact assess MHHS changes and define the scope of their consequential changes.

The consequential changes that were communicated to us by the interviewed Participants broadly fall across the following areas:

- Changes in relation to an individual Participant's internal systems and back-office processes as a result of MHHS; and
- Changes to industry processes such as DUoS billing.

These changes may have a material impact to the anticipated MHHS benefits and the consumer, as they are linked in key areas such as billing accuracy, charging arrangements and contract pricing. We noted that some Participants have commenced change impact assessment, including developing design, build and test plans, whereas others are yet to start.

Key recommendations

1. Code Bodies and the Programme to **clearly document and communicate the definition of DBT1** via QAG to support individual participants to define their consequential changes. This also includes providing clarity on responsibilities for testing each component of the DUoS process (**Note:** this action is underway as part of a corresponding QAG action) - **Target Date: 16 May 24**
2. **Consequential Changes Assurance Recommendation - Target Date: 31 May 24:**
 - Participants should impact assess consequential changes and submit the progress, completion status and self-assessment via Programme Readiness Assessments which will be subject to independent assurance via sample based reviews

Examples of potential consequential change scope areas raised by Participants

- Industry billing processes (e.g. DUoS)
- Reconciliation processes (due to links to DUoS)
- Supplier billing systems
- Back-office processes, such as hedging strategy, demand forecasting, contracts pricing, and charging arrangements
- Customer tariffs
- Meter point administration
- Customer communications

Qualification Testing Updates

INFORMATION: Updates on Qualification Testing from the Programme and Elexon

*Elexon (Laura Kennedy),
& Programme (Nicola Farley)*

5 mins

Overall Qualification:

- After participant feedback, it was agreed at QAG that in addition to QWG two sub-groups would be formed to focus on Non-SIT LDSO QT and Non-SIT Supplier and Agent QT
- New Entrant process presented at QWG and QAG for clarification
- CR47 and CR48 IA responses have been received and will be presented to programme governance for approval

Non-SIT Supplier & Agent Qualification:

- Non-SIT Supplier & Agent QT Test Approach being updated post consultation - targeting approval at May QAG
- Initial Batch of Non-SIT Supplier & Agent QT Test Scenarios being updated post consultation.
- Second Batch of Non-SIT Supplier & QT Test Scenarios out for consultation (closes 20/04).
- Analysis ongoing with MHHSP to review requirement coverage across SIT and QT.

Non-SIT LDSO Qualification:

- Qualification Approach & Plan Annex 1 Non-SIT LDSO Test Approach out for consultation – update includes information on non-functional and operational testing
- Non-SIT LDSO Test Data Approach being updated post consultation - targeting approval at May QAG
- Migration Test Scenarios and Test Cases have been issued for LDSO review
- LDSOs are on track to submit their PIT test plans by 26/4. Sessions held with LDSO to support their submissions

Qualification Deliverable milestones - 2024

| Milestone ID | Task Name | Baseline Date in Programme Plan | Date as per CR48* | Status |
|--------------|---------------------------------------------------------------------------------------------------|---------------------------------|-------------------|------------------------------------------------------------------------------------------------------------|
| T3-QU-0063 | Functional Testing elements of Qualification Approach & Plan v2 approved by REC Manager & BSC PAB | 31/10/2023 | 28/03/2024 | Milestone approved at April QAG. |
| T3-QU-0064 | Migration Testing elements of Qualification Approach & Plan v2 approved by REC PAB & BSC PAB | 06/03/2024 | 28/03/2024 | Milestone approved at April QAG. |
| T3-QU-0066 | Qualification Assessment Document v1 approved by REC PAB and BSC PAB | 16/04/2024 | 28/03/2024 | Milestone approved at April QAG. |
| T3-QU-0065 | Non-Functional Testing elements of Qualification Approach & Plan v3 approved by REC PAB & BSC PAB | 30/05/2024 | 27/06/2024 | On track, update to be completed once SIT Non-Functional Approach and Plan published. |
| T3-QU-0068 | Operational Testing elements of Qualification Approach & Plan v4 approved by REC PAB & BSC PAB | 14/08/2024 | 29/08/2024 | On track, update to be completed once SIT Operational Approach and Plan published. |
| T3-QU-0062 | Final Qualification Approach & Plan v4 approved by REC PAB & BSC PAB | 14/08/2024 | 29/08/2024 | On track. |
| T3-QU-0067 | Qualification Assessment Document v2 approved by REC PAB and BSC PAB | 25/10/2024 | 29/08/2024 | At risk of slippage due to dependency on SIT Non-Functional and Operational Test Scenarios and Test Cases. |

Qualification Wave (Non-SIT Suppliers and Agents) milestones - 2024

| Milestone ID | Task Name | Baseline Date in Programme Plan | Date as per CR48* | Status |
|--------------|-------------------------------------------------------------------------------------------------------|---------------------------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| T3 TBC | Pre-Qualification Submission and PIT Test Plan Deadline for Submission | New | 26/04/2024 | On track, Qualification Wave Participants due to submit PQS by 26/04/24. Webinar held and drop in sessions set up to support completion, alongside update of PIT Guidance. |
| T3-QU-0012 | Confirmation of participant Qualification Wave allocation | 08/06/2024 | 28/06/2024 | On track, dependency on PQS being received from Qualification Wave Participants by 26/04. |
| T3-QU-0017 | Qualification Wave 1 Participants' have started DIP Onboarding | 04/11/2024 | 01/11/2024 | On track |
| T3 TBC | Qualification Wave 1 Participants to provide status of PIT completion and submit QT Test Plan | New | 29/11/2024 | New milestone added to support participant planning. |
| T3 TBC | Qualification Wave 1 Participants have submitted PIT Test Completion Report and evidence for QT Entry | New | 20/12/2024 | New milestone added to support participant planning. |
| T3-QU-0016 | Qualification Test Plans for Wave 1 Participants approved | 04/11/2024 | 20/12/2024 | On track. |
| T3 TBC | Qualification Wave 1 Participants have submitted their Initial QAD | New | 20/12/2024 | New milestone added to support participant planning. |

Qualification Non-SIT LDSO QT milestones – 2024 (1/2)

| Milestone ID | Task Name | Baseline Date in Programme Plan | Date as per CR47* | Status |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| T3-QU-0011 | Confirmation of participants for Non-SIT LDSO Qualification Testing | 15/02/24 | 18/04/2024 | Milestone approved at March's QAG |
| T3 | Non-SIT LDSO QT Test Data Plan Approved by QAG | New | 26/04/2024 | Non-SIT LDSO QT Test Data Plan consultation has concluded. Feedback is being worked through and will be discussed at May's QWG ahead of request for approval at May's QAG. |
| T3 | Non-SIT LDSO submission of PIT Approach and Plan (functional and migration) | New | 26/04/2024 | Update PIT guidance shared and additional session to be scheduled. Sessions with LDSO to support them developing their PIT plans. |
| T3 | Non-SIT LDSO submission of PIT Approach and Plan (non-functional and operational) | New | 14/06/2024 | Annex 1 has been updated for non-functional and has been issued for consultation. |
| T3 | Batch 1-3 Non-SIT LDSO QT Functional Test Scenarios and Test Cases approved | New | 18/04/2024 | Approved at April's QAG. |
| T3 | Non-SIT LDOS QT Non-Functional, Operational and Migration Test Scenarios and Test Cases approved | New | 18/07/2024 | Migration Test Scenarios and test cases have been shared with LDSO for review |
| T3 | Non- SIT LDSO submission deadline for final PIT Test Completion Report (Non-Functional and Operational and agreed functional scope) | New | 30/09/2024 | New milestone added to support participant planning |

Qualification Non-SIT LDSO QT milestones – 2024 (2/2)

| Milestone ID | Task Name | Baseline Date in Programme Plan | Date as per CR47* | Status |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|-------------------|---------------------------------------------------------------------------------------------|
| T3-QU-0008 | Qualification Testing for Non-SIT LDSOs (Functional, Migration, NFT, Operational) Test execution schedule approved | 15/05/2024 | 15/08/2024 | Tracking red against programme plan baseline. Tracking green against new plan dates (CR47). |
| T3-QU-0009 | Qualification Testing for Non-SIT LDSOs Participants' environments)Ready to start DIP onboarding (incl. certificates and security compliance) | 15/05/2024 | 05/08/2024 | Tracking red against programme plan baseline. Tracking green against new plan dates (CR47). |
| T3 TBC | MHHSP/Code Bodies approval of non-SIT LDSO QT participants test plans | New | 20/06/2024 | On track – conversations ongoing on high level test scope |
| T3-QU-0007 | Qualification Testing for Non-SIT LDSOs (Functional, Migration, NFT, Operational) Programme Test Readiness confirmed | 24/07/2024 | 30/09/2024 | Tracking red against programme plan baseline. Tracking green against new plan dates (CR47). |
| T3 TBC | Non-SIT LDSO QT participant Test Environments connection confirmed to UIT environment | New | 18/09/2024 | On track |
| T2 TBC | Non-SIT LDSOs Qualification Testing Participants (Functional, Migration, NFT, Operational) Test Readiness confirmed (Final Test Readiness Review for LDSO) | New | 30/09/2024 | On track |
| T3 TBC | Non-SIT LDSO QT Participants have submitted their initial QAD | New | 10/10/2024 | On track |
| T3 TBC | Non-SIT LDSOs submission deadline for their QT Test Completion Report to MHHS Programme | New | 20/12/2024 | On track |
| T3-QU-0010 | Qualification Testing for Non-SIT LDSOs (Functional, Migration, NFT, Operational) 1 End | 24/01/2025 | 24/01/2025 | On track |

Migration Update

INFORMATION: Programme updates on Migration plan and progress

Programme (Warren Fulton)

5 mins

Consultation 1 is progressing according to plan

- The consultation closed on 8 April 2024
- 245 comments were received from 18 organisations – thank you
- Comment responses and updated artefacts were issued on 19 April 2024
- The Assurance meeting is scheduled for 26 April and MCAG approval for 8 May 2024
- There were no material changes or concerns raised by Participants
- Three themes will undergo further development as part of Consultation 2

The schedule for Consultation 2 will be discussed with MWG at the 26 April meeting

Programme Reporting

INFORMATION: Updates from the Programme on System Integration Testing (SIT)

Programme (Adrian Page)

10 mins

SIT Functional

- All PPs have now started Cycle 1 test execution in line with their agreed start date
- Progress is steady
- No major defect blockers have been encountered so far
- MI reporting being provided to Cohorts (PPs + CCPs) - summary on subsequent slide
- Complexity of reporting has hampered provision of some MI reporting
- Cycle 1 progress and impact on next SIT stages being monitored at FTIG
- Cycle 2 inc Settlement testing readiness is in progress (starts 10-Jun)

SIT Migration

- Starts 10-Jun-24 on IR7.1 in SITA environment
- Start is dependent on achieving the Cycle 1 outcome on CoS and CoA coverage
- One set of RTTM and Test Scenarios remain outstanding
- Test Scenarios and Test Cases – Themes 2 & 3 approved at recent SITAG with 2 work off items, so all themes agreed
- Placing Reliance submission updates provided and sent to Code Bodies
- PIT completion due 10-May, however several parties agreeing later dates with the test team so likely to see a staggered start like SIT Functional

Other SIT Stages

- Non-Functional - Approach & Plan consultation completed and on track for May SITAG approval. Test Scenarios and Test Cases development approach approved at Apr SITAG and shared with FTIG
- Operational – Approach & Plan consultation completed and on track for May SITAG approval. Test Scenarios and Test Cases development approach approved at Apr SITAG and shared with FTIG

SIT Functional Test Status (23rd Apr 24)

Cycle 1 Outcome Objectives:

- Business Processes tested (not passed) utilising Single MPAN Data, established using a summation of all 8 Cohort Test progress achievements**
- SIT Migration dependant Processes executed and passed, with any exceptions documented and agreed**

| Cohort | Total | To Be Executed | Total Executed | Passed | Failed | In Progress | Paused | Blocked | N/A | Total Executed % | Passed % | Failed % | Paused % | N/A % |
|-------------------------------|------------|----------------|----------------|-----------|-----------|-------------|------------|------------|-----------|------------------|------------|-----------|------------|-----------|
| SITF Cohort A | 105 | 48 | 57 | 20 | 13 | 0 | 12 | 12 | 0 | 54% | 19% | 12% | 11% | 0% |
| SITF Cohort B | 83 | 45 | 38 | 14 | 3 | 0 | 6 | 12 | 3 | 46% | 17% | 4% | 7% | 4% |
| SITF Cohort C | 83 | 43 | 40 | 16 | 5 | 0 | 7 | 12 | 0 | 48% | 19% | 6% | 8% | 0% |
| SITF Cohort E | 83 | 47 | 36 | 7 | 0 | 0 | 10 | 16 | 3 | 43% | 8% | 0% | 12% | 4% |
| SITF Cohort F | 83 | 44 | 39 | 9 | 2 | 0 | 21 | 7 | 0 | 47% | 11% | 2% | 25% | 0% |
| SITF Cohort G | 105 | 55 | 50 | 7 | 2 | 0 | 19 | 19 | 3 | 48% | 7% | 2% | 18% | 3% |
| SITF Cohort H | 83 | 44 | 39 | 4 | 2 | 0 | 13 | 17 | 3 | 47% | 5% | 2% | 16% | 4% |
| SITF Cohort J | 105 | 58 | 47 | 12 | 5 | 0 | 22 | 8 | 0 | 45% | 11% | 5% | 21% | 0% |
| SITF Shared Cohort A and C | 37 | 26 | 11 | 0 | 4 | 0 | 5 | 2 | 0 | 30% | 0% | 11% | 14% | 0% |
| SITF Shared Cohort A, G and J | 4 | 4 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0% | 0% | 0% | 0% | 0% |
| SITF Shared Cohort B and E | 35 | 30 | 5 | 0 | 0 | 0 | 0 | 5 | 0 | 14% | 0% | 0% | 0% | 0% |
| SITF Shared Cohort F and J | 37 | 29 | 8 | 0 | 2 | 0 | 6 | 0 | 0 | 22% | 0% | 5% | 16% | 0% |
| SITF Shared Cohort G and H | 37 | 21 | 16 | 0 | 6 | 0 | 4 | 6 | 0 | 43% | 0% | 16% | 11% | 0% |
| Total | 880 | 494 | 386 | 89 | 44 | 0 | 125 | 116 | 12 | 44% | 10% | 5% | 14% | 1% |

Headlines (in week 7 of 11):

- All Cohorts, PPs and Market Roles are PIT complete and now able to progress, no major defect blockers encountered so far
- Test execution has continued to maintain a steady trajectory from the outset, with the rate of tests exercised trending well
- **Objective 1** - whilst the overall Pass rate is tracking below the desired target for the majority of (but not all) individual Cohorts, using the summation of all Cohorts activity Objective 1 is currently on target to be achieved within Cycle 1 timescales (**164 unique Cycle 1 test cases** in scope):

| Category (= status in at least 1 Main Cohort, or Paired Cohort) | Total | % |
|----------------------------------------------------------------------------------|------------|------------|
| Unique tests <u>exercised</u> i.e. either with a Passed, Failed or Paused status | 106 | 65% |
| Of which; | | |
| Unique tests with at least 1 Cohort in a Passed status | 29 | 18% |
| Unique tests with at least 1 Cohort in a Failed status | 31 | 19% |
| Unique tests with at least 1 Pass <u>and</u> 1 Fail | 8 | 5% |
| Unique tests with either a Pass or Fail status (or both) | 68 | 42% |
| Unique tests with at least 1 'Paused' status (but no Passed or Failed) | 38 | 23% |
| And; | | |
| Unique tests yet to be exercised by any Cohorts | 58 | 35% |

- **Objective 2** – traction in 'Paired' testing is yet to be seen, a risk has been raised, and this is being monitored...

How do the Cohorts Compare? (23rd Apr 24)

| Cohort Pass Rate | | | | | | | | |
|------------------|-------------|--------|--------|--------|-----------|----------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cohort | Total Tests | Passed | Failed | Paused | Exercised | Defects Raised | Unmetered In Scope | Commentary |
| A | 105 | 20 | 13 | 12 | 45 | 48 | Unmetered | Executing the most tests, raising the most defects, both highest Passed and Failed rates. Has been above Target Pass Velocity, but dipped below more recently |
| C | 83 | 16 | 5 | 9 | 28 | 24 | N/A | Steady rate of execution, relatively low failure rate, 2 nd highest Pass rate, joint 2 nd place for defects raised, Currently on Target Pass Velocity |
| B | 83 | 14 | 3 | 9 | 23 | 27 | N/A | 3rd place for Pass rate, demonstrating good progress despite ADS delay having impacted circa 50% ADS involved test cases (unblocked since 12 th Apr) |
| J | 105 | 12 | 5 | 10 | 25 | 27 | Unmetered | Good steady all round progress , 4 th place for Passed rate, joint 2 nd place for number of defects raised and average execution rate amongst the main cohorts |
| F | 83 | 9 | 2 | 19 | 32 | 11 | N/A | Commenced 2 weeks later due to delay in MSS role PIT completion , impacted circa 70% test cases for the Cohort, now unblocked since 12 th Apr. Despite later start is currently 2nd place for execution rate , 5 th place for Pass rate, with relatively low failure rate |
| E | 83 | 7 | 0 | 6 | 17 | 21 | N/A | Commenced 2 weeks later, circa 50% tests impacted due to SDS not able to commence until 15th April , in the bottom 2 of main cohorts for execution rate, and bottom 3 for Pass rate, lowest Failed rate |
| G | 105 | 7 | 2 | 17 | 28 | 18 | Unmetered | Joint 3rd of the main Cohorts for execution rate , bottom 3 for Passed rate and low Failed rate |
| H | 83 | 4 | 2 | 10 | 23 | 21 | N/A | Of the main cohorts has comparatively low execution and Failure rates, and lowest Pass rate |
| A & C | 37 | 0 | 4 | 2 | 6 | 17 | Unmetered | Execution activity beginning to progress in line with strong position of both main Cohorts , with the highest number of Paired cohort defects raised |
| B & E | 35 | 0 | 0 | 5 | 5 | 4 | N/A | Activity is gearing up |
| F & J | 37 | 0 | 2 | 0 | 2 | 6 | Unmetered | Limited traction to date, but activity is increasing |
| G & H | 37 | 0 | 6 | 6 | 12 | 11 | Unmetered | Highest amount of Paired cohort activity to date , including 2 nd highest defects raised |
| A,G & J | 4 | 0 | 0 | 0 | 0 | 1 | Unmetered | Limited activity, dependent Cohort members to progress |

Delivery Dashboards

Risk theme 2: SIT Migration Readiness

RAID (3 of 7)
Updated to 01/05/2024

| Theme | Summary | Mitigation Approach Overview | RAG Status | |
|-------------------------|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|
| SIT Migration Readiness | The theme explores the factors that could impact the Programme being ready to start SIT Migration | <ul style="list-style-type: none"> PP Bilaterals enable ongoing monitoring and will allow the Programme to identify early if there are any PP's that are at risk of being unable to start SIT Migration Discussions with DCC to ensure clarity regarding CSS support for reverse migration activities. | Previous RAG | New slide |
| | | | Current RAG | Amber (3 items) |

| Key Risks | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|----|----|----|----|----|----|------|----|----|----|----|----|----|--------|----|----|----|----|----|----|-----|---|---|---|---|---|---|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Risk ID | Risk Description | Risk Score Assessment | | | | | | | | | | | | | | | | | | | | | | | | | | | | Current score movement since last PSG | Mitigation Plan |
| | | Critical | | | | | | | High | | | | | | | Medium | | | | | | | Low | | | | | | | | |
| | | 30 | 29 | 28 | 27 | 26 | 25 | 24 | 23 | 22 | 21 | 20 | 19 | 18 | 17 | 16 | 15 | 14 | 13 | 12 | 11 | 10 | 9 | 8 | 7 | 6 | 5 | 4 | 3 | | |
| R830 | There is a risk that PPs will not be ready to start SIT Migration | | | | | | | | | | | | | | | | | | | | | | | | | | | | | New Item | 1. This has been discussed with specific PPs in their bilaterals and will continue to be monitored closely. SIT Team will look at contingency planning to see if we can accommodate some later entry. |
| R837 | There is a risk that following the production of test cases, DCC will have to play more of an active role than previously thought in migration testing. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | New Item | 1. Discussions with DCC to agree what support is required from CSS to support reverse migration activities. Test planning will be undertaken to reduce the impact on DCC resources, meaning DCC involvement in test initiation will be limited to a set number of days in the migration test phase. |
| R838 | There is a risk that Rec Co might not be able to support the proposed use of Rec Co test MP ID's | | | | | | | | | | | | | | | | | | | | | | | | | | | | | New Item | 1. Agreement with Rec Co that their DTS gateway can be used for the purposes of migration testing |

| R653 | There is a risk that the programme do not mobilise test environments or harnesses in support of Non-SIT LDSO QT | Red | | | | | Yellow | | | | | Green | | | | | Green | | | | | Score remains at 12 | 1. Discussions held with DIP and DIP are working towards a DIP UIT environment being available by 1 August 2024. 2. LDP has delivery plan for delivery of test harnesses which they are confident in. Conversations ongoing on incorporating Helix into scope (Key reason for the current score reducing) | | | | | | |
| R276 | There is risk of Elexon BSC and/or RECCo having limited capacity to manage the volume of Participants going through Qualification testing at any one time | Red | | | | | Yellow | | | | | Green | | | | | Green | | | | | Score remains at 15 | 1. Code Bodies are asking PPs to submit a pre-qualification submission which will be used to allocate waves so that the Code Bodies have a view through Qualification and can adjust resourcing levels as needed to support this. 2. Once PQS responses have been received, Code Bodies will review any potential capacity constraints that they may have and make adjustments, where reasonably possible, so as to avoid the need to move non-SIT parties into later Qualification Waves | | | | | | |
| R332 | Suppliers may require maximum amount of time to complete their DBT, resulting in backlog in final waves of Qualification | Red | | | | | Yellow | | | | | Green | | | | | Green | | | | | Score remains at 15 | 1. Initial assessment of Qualification Wave preferences undertaken by PPC. 2. Code Bodies have asked Non-SIT Suppliers and Agents to provide a Pre-Qualification Submission by 26 April. This will provide a view on supplier's plans for Qualification and preferred Qualification Wave. Once this information is received then Code Bodies will review any potential capacity constraints and make adjustments, to allow them to manage participant's preferred Qualification Wave. This information will also be made available to the Programme so that it can understand the impact of supplier's plans on their Migration start dates. | | | | | | |

| Status & Outlook | Progress this Month: <ul style="list-style-type: none"> Continued supporting functional SIT Cycle 1 execution Recommending efficiencies within functional SIT execution Continued UAT testing of MPRS Sprint 5, 6 and 7 code Continued development and test of stage 0 data cleanse scripts Created functional SIT report to reflect number of retests not just test cases Assessed changes required to MPRS resulting from FSIT Preparation for Migration PIT Development of Migration impact assessment Assessment of Programme CRs (44, 45, 46) | | | Progress expected in the coming month: <ul style="list-style-type: none"> Continue supporting functional SIT execution Continue UAT testing of Sprint 5, 6, and 7 MPRS code Start UAT testing Sprint 8 code Complete preparation for Migration PIT and start execution Preparation for Migration SIT Planning of data loads for Migration SIT, Settlement Testing and SIT Cycle 2 Stand up SIT-B environments for SOUT and ETCL | | | Party Milestones & Deliverables MPRS ready for start of functional SIT | Original or Baseline Date 06-11-23 | Forecast date & RAG 14-02-24 |
| | | | | | | | MPRS ready for start of migration SIT | 01-06-24 | 01-06-24 |
| | Risk or Issue & RAG | | Mitigating or resolving action required | | | | | Target Date | Action owner |
| STC111 – ISSUE - The significant overrun of CIT interval 2 testing impacting subsequent test phases | | The programme reduced the scope of CIT tests but has not addressed the time lost, 'borrowed' from future test phases (UAT/CIT interval 6/functional SIT/migration SIT). Whilst Parties are looking at how they can accommodate such increasing Programme demands, the Programme to consider the parties having to commit significantly more time than planned and its impact on future programme milestones. DNOs are funding an increase in the size of the MPRS test team, quadrupling the size of the test team since the plan was baselined (CR022). | | | | | 30/04/2024 | Programme | |
| STCR60 – Complete MPRS migration solution may not be ready for planned start of migration SIT | | The complete MPRS migration solution is unlikely to be available at the start of migration SIT. With a little pragmatism from the programme, the migration SIT start date can still be met with sufficient MPRS migration functionality available. To minimise the impact of this, the programme should focus initial migration SIT tests on change of service provider migration, with both change of supplier and reverse migration coming later in the test cycle. By following this approach programme timelines would not be impacted (entry and exit of migration SIT). | | | | | Q2 2024 | SCS | |
| STCR46 - There is a risk that the Elexon/Ofgem Reporting requirements are not clarified in time to be developed and tested for M10 | | Existing industry reporting (to BSC/ Authority) provided by MPRS will need modifying to meet the changes implemented in MHHS. After M10, existing reports will become increasingly invalid and will not reflect the correct state of the electricity market if not modified. Reporting requirements have not been defined in the programme design | | | | | Q2 2024 | Programme | |
| STCR61 – There is a risk that Data Load for SIT-A environments for Cycle 2 & Migration could disrupt progress of Cycle 1 test execution | | NEW – Having to loading augmented data with SIT Cycle 1 in flight, it will not be possible to stop the generation and sending of large numbers of outbound IF messages triggered by the inbound PUB-031 & PUB-034 messages, leading to large numbers of messages being received by other participants. This could also cause legacy data flows being sent to LDSOs and CSS. Additionally, the current timing of loading during the SIT cycle 1 execution will remove the possibility of restoring back if there are issues with the data loading. Mitigate risk by delaying data loads until SIT 1 execution has completed | | | | | 30/04/2024 | Programme | |
| STCR14 - BAU issues divert resource from MHHS programme (such as FS changes) | | Faster Switching issues diverting resource from MHHS activities to resolving BAU issues. Forced to tolerate and manage. The Programme to recognise that BAU may be higher priority than MHHS | | | | | Ongoing | St Clements | |
| STCR59 - There is a risk that the 2 external industry CRs (REC-R0095 - to allow DNOs to reinstate de-registered MPANs & BSC - P459 - Allowing different supplier agents to be appointed to import and export MSIDs) will have a major impact on the MHHS design if approved | | NEW – The impact would be major rework which cannot be absorbed in the current Programme timescales. Programme have been made aware via horizon scanning, R0095 is currently at solutions development stage and P459 is at assessment stage. No current timescales for when these will be accepted/rejected | | | | | 30/04/2024 | Programme | |
| STCR58 - There is a risk that there is insufficient time available to fully test CR036 (Time change) ready for implementation into SIT functional cycle 2. | | Programme to accept the risk that, although the functionality could be made available, comprehensive testing through UAT/PIT is unlikely to be complete. This could lead to avoidable defects being identified and retesting required. | | | | | 30/04/2024 | Programme | |
| Assumption & RAG | | Action required to remove assumption | | | | | Target Date | Action Owner | |
| MPRS high level plan broadly remains the same following detailed IA | | Detailed IAs for later sprints (including migration) to be completed | | | | | Through to last sprint | SCS | |
| Scope of MPRS development does not extend | | Scope change (eg data cut/data cleanse/CRs) to impact milestones. Consider delaying when functionality is required for testing | | | | | Ongoing | Programme | |
| Governance/assurance does not impact MPRS delivery activities | | Light touch and targeted approach | | | | | Ongoing | Programme | |

| | | | |

| Ref. | Risk | Calculated Risk | Mitigation / Update | Owner | Area |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------|
| 1 | Risk to CSS performance if daily migration volumes exceed the 300k peak-of-peaks, for which there is no system-based control to prevent | High | DCC will work with Elexon Migration Delivery to identify the means to mitigate the likelihood of this occurring, and the actions to be taken in the event of an occurrence. | DCC/MHHS Programme | Migrations / Capacity |
| 2 | The current peak-of-peak migration thresholds defined in the Migration Thresholds document assume a peak-of-peak of 300K CoAs per day above “business as usual” (BAU) volumes. BAU volumes today may not reflect BAU volumes between April 2025 and October 2026 as we can anticipate MHHS to stimulate higher levels of switching as Suppliers offer new MHHS products and services. | Medium | CSS and DSP should be sized for a peak-of-peak CoA volume of 300K plus 291K (the original CSS peak-of-peak volume) to allow for growth in switching rates. | DCC | Migrations / Capacity |
| 3 | The changes required in CSS and/or DSP to achieve a peak-of-peak CoA volume of 591K may not be cost effective and/or technically feasible. | Medium | Include performance testing within the PRs raised with CGI and Landmark & Netcompany to confirm compliance with these volumes and make DCC commitment to associated SLAs contingent on successful completion of this testing. | DCC | Migrations / Capacity |
| 4 | Any changes which materially impact the Capacity Assumptions that form the basis of DCC’s MHHS Capacity increases may not be able to be met, due to the time required to deliver capacity increases | Medium | PPIR on MDR usage has been received & analysed by DCC. A formal letter will be sent to Ofgem in May detailing the assumptions on which DCC has built the capacity which will be available at MHHS implementation. | DCC/MHHS Programme | Capacity |
| 5 | To date, a limited number of tests have been progressed in SIT which require DCC evidence. If this testing is conducted in a concentrated period, there is a risk that DCC cannot support at the volume required, as resources were necessarily estimated on a consistent basis across the testing period | Medium | Engagement via SITAG/FTIG & Bilaterals. Any requirement from Programme to increase the cadence of testing to be requested asap to provide DCC with an opportunity to reschedule resources. | DCC/MHHS Programme | Test Support |

|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Status & Outlook | <p>Progress last month:</p> <ul style="list-style-type: none"> Helix continued to support SIT Functional Cycle 1 Release 9.6 to be completed which will support SIT Functional Phase 2 ISD Data fixes for majority of issues encountered released on 25th March. Prepared initial delivery plan and estimate for non-SIT participants. Qualification Approach reviewed and approved at PAB. Continuing engagement with RECCo and DCC to align overall service design and produce low level design agreements. All key business teams in Elexon have commenced business change engagement. E2E testing working group kick off sessions held and resource ramp up commenced. | <p>Progress expected in the coming month:</p> <ul style="list-style-type: none"> Continued support of SIT Functional cycle 1 and resolution of any defects that arise. Ramp up of teams to support SIT operational testing and Helix end to end test. Environment and data preparation for SIT functional Phase 2 and SIT migration test phases. Complete and present the high level Business Change impact analysis to the Elexon Senior Leadership Team. Shared clarification with MHHSP of DIP Transition planning. Begin PI10 development sprints across key work packages in parallel to test support activities. Commence first development sprint of the Qualification Testing Framework (QTF) |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

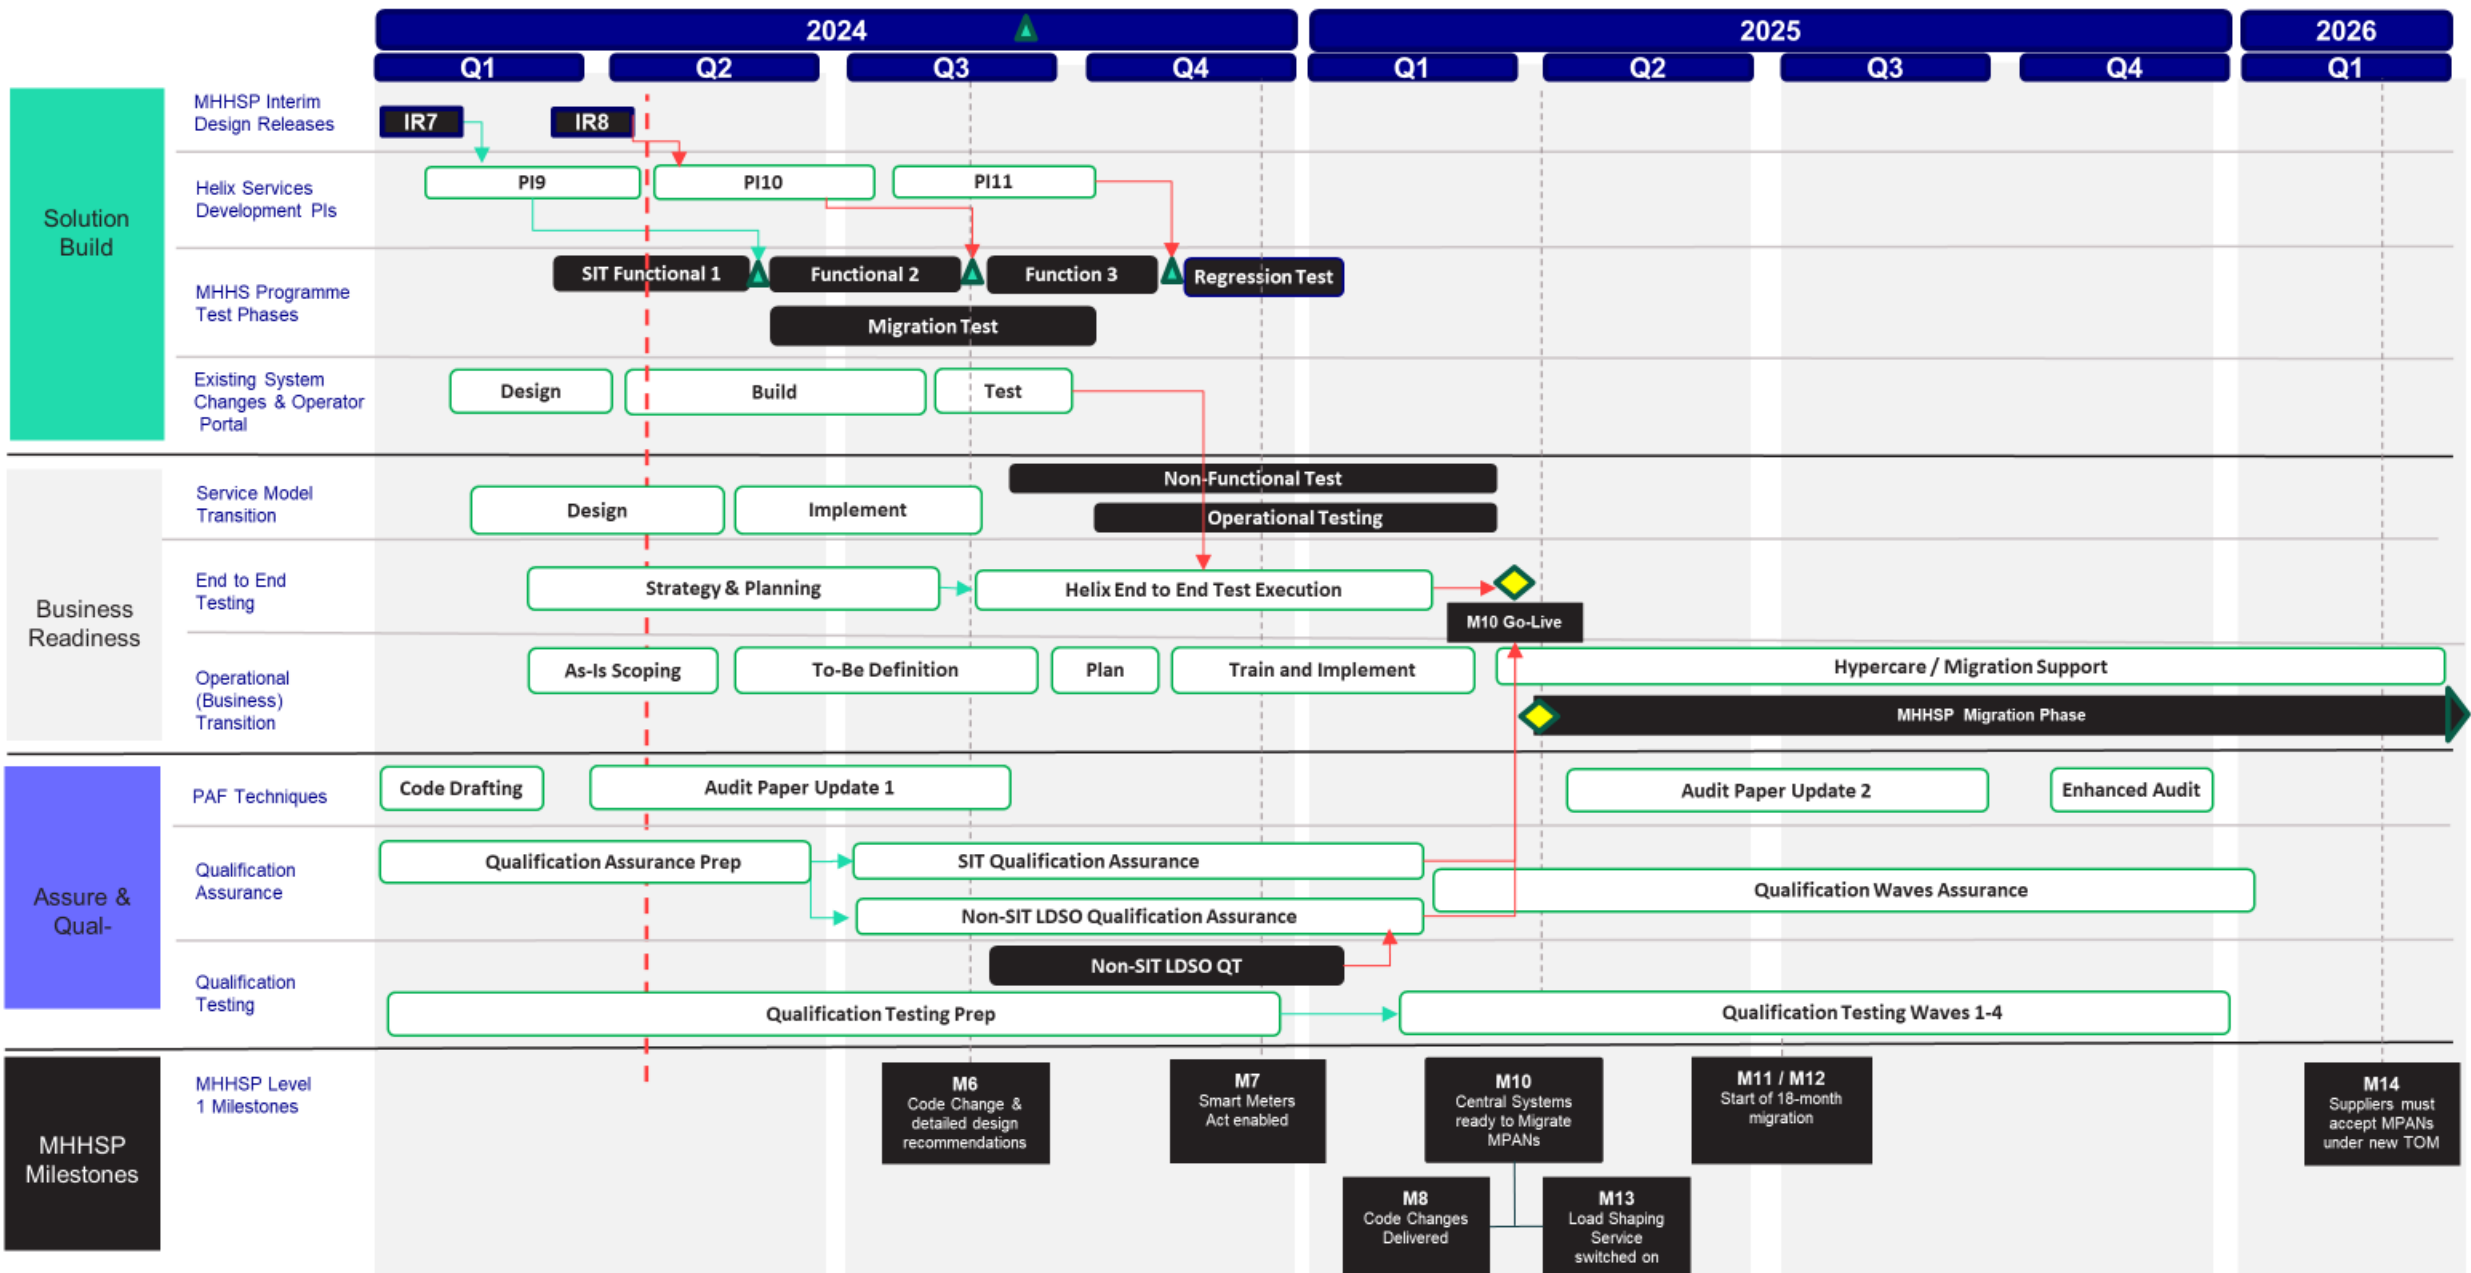

| Party Milestones & Deliverables | Plan Date | Forecast date & RAG |
|----------------------------------------------------------------------|-----------|---------------------|
| PIT completion report of SIT | 9/02/24 | Complete |
| Approval of the MHHS Service Strategy | 9/02/24 | Complete |
| Target Release of 8.6 to SIT functional environment. | 18/02/24 | Complete |
| QA&P approval by PAB | 28/03/24 | Complete |
| PI10 Planning for Solution Build | 19/04/24 | Complete |
| High-level business change impact assessment | 19/04/24 | In progress |
| First pass definition of operational business change plan | 30/04/24 | In progress |
| QT functional test scenarios approval | 23/05/24 | In progress |
| SIT functional phase1 ends | 28/05/24 | In progress |
| Target second code release for SIT to cover SIT phase 2 requirements | 31/05/24 | In progress |
| Publish Service Definition Document | 10/06/24 | In progress |

| RAID and RAG | Type | Mitigating or resolving action required | Date to be resolved\ updated |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| If further changes impact on the scope of Helix, they may impact on SIT preparation and will drive further cost into the programme. Update: We are continuing to see changes from MHHSP to Helix/participants. | Risk | Recognition that Helix has a materially complete code base with due consideration given to avoidance of refactoring of this code base within future change requests. Reduced the severity of this risk due to the change freeze being introduced by MHHSP. The change freeze is not effectively slowing down the pace of change from MHHSP and trending upwards. This remains a concern. | Ongoing |
| Elexon will implement ITSM ServiceNow ahead of SIT Operational Testing. There is a risk that if delivery targets slip ServiceNow will not be ready to rest from the start, meaning Service Assurance tests cannot be completed to the scope/standard expected. Could bring know-on impact to M10 readiness. | Risk | Engage a ServiceNow approved partner to deliver the solution. Implement 'out of the box', avoid bespoke development and implement 'green field' (no migrating). Prioritise the core ServiceNow processes needed (e.g. incident management) for SIT. Work with MHHS Resting to a) agree what design artefacts will be submitted for PIT assurance, and b) understand test sequence options for SIT start that (if needed) could place Service Assurance resting later in the schedule. | 30/04/24 |
| Rephasing of SIT to place Theme 8 settlement later in the plan increases the risk of overall date slippage by increasing the strain of later phases. | Risk | In the event of slippage to SIT, Helix will have to perform additional development to absorb additional costs. Any slippage to SIT dates would impact on the Assurance and Qualification workstream. MHHSP decision to switch from SIT-A to SIT-B is adding further resource contention and pressure to timelines. | 30/04/24 |
| If the transition plans for go-live of Helix and transition of MHHS are not advanced urgently there is a risk that this phase will not run smoothly. | Risk | Transition leadership team in place. Engagement plan has been rolled out to all Elexon operational teams. Impact analysis to be cascaded to Senior Leadership Team by end of April. | 30/04/24 |
| There is a Risk that the overall progress of migration does not work as Ofgem and MHHS desire if we do not have additional support for DIP onboarding and also management support to drive the queuing and progress of all Non-SIT participants | Risk | Helix and MHHSP team are working together to develop shared plans to manage this phase of work. The Helix team are currently onboarding additional resource to support DIP Onboarding and Migration planning. | 30/04/24 |

| DNO Key Milestones (in Round 3 plan) | Round 3 date & confidence level / RAG | Reasons for confidence levels |
|----------------------------------------------------------------------------------------------------------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For those intending to participate in Systems Integration Testing (SIT) - SSEN | | |
| SIT (Functional) start | 10-Jun-24 1 High confidence | SCS to carry out on behalf of SSEN for Registration Services. |
| M10 - readiness to support migration start, including Registration Services. Network Operators and UMSOs | 07-Mar-25 1 Medium confidence | <ul style="list-style-type: none"> Further outcomes of testing success required from SIT Functional before being 100% confident re migration testing. Proposed Migration volumes are still not proven by any empirical testing |
| For those intending to participate in non-SIT LDSO (qualification) testing | | |
| Non-SIT LDSOs testing start (Functional / Migration / NFT / Ops) | 02-Jul-24 5 Medium confidence | <ul style="list-style-type: none"> MPRS, Durabill and Adapter PIT dependent upon completion of SIT activities on time. Ongoing discussions regarding Qualification, PIT plan timelines, data requirements and test cases. |
| M10 - readiness to support migration start, including Registration Services. Network Operators and UMSOs | 07-Mar-25 5 Medium confidence | <ul style="list-style-type: none"> Qualification testing subject to completion of PIT testing which itself is subject to completion of SIT At this point we have rated as medium confidence, noting that these requirements are still to be agreed at Programme level. Ongoing Industry discussions regarding migration volumes & SLA's– consultation. |

| Decisions to be made by DNOs | Impact of no decision | Decision by when? |
|-------------------------------------------------------------|------------------------------------------|-------------------|
| Approach to Non-functional (performance and volume testing) | Test stubs not available for PIT testing | 01/06/2024 |

| Decisions required from the Programme | Impact of no decision | Decision by when? |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| SIT Non-Functional (PIT). Clarification on test cases required. Plus, agreement from Programme to align to IR7 not IR8 as per Annex 1 to meet program timelines & align with supplier's plans aligned to SIT | Problems completing SIT Non Functional tests | 10/05/2024 |
| Test approach/timing for REP-900 for DURABILL. | REP-900 delivery not due until August 2024. Testing required during SIT Settlements Testing Phase in June 2024. | 10/05/2024 |
| Test Data Requirements for NON-SIT LDSO - Qualification | Unable to plan testing and failure to qualify | ASAP |
| Clarity of 3rd Party Adaptor Service Provider in performing SIT Non-Functional & Operational Testing on behalf of DNO's | Failure to Qualify – unable to validate requirements | ASAP |
| Define scope of testing/evidence for proving central systems (data services / load shaping) | Risk to DNO recovery of DUoS charges if central systems do not provide 100% coverage of consumption data (accuracy and timeliness) to LDSO's | 15/05/2024 |
| Migration SIT will be executed on SIT-A but FSIT theme 8, Settlement, will be tested on SIT-B. This is not an efficient use of resources. With continued uncertainty whether St Clements is best positioned to execute non-functional SIT, this requires a whole new environment setting up for just one test case. | The programme must consider more cost-effective alternatives. | ASAP |
| Confirmation of CR's and Outstanding Design Decisions (DIN Log) specifically IR8 as raised by St Clements. | Delay to DBT and unable to achieve R3 SIT dates. Potential delay to DBT of UKPN internal downstream systems. | ASAP |

| Escalations (priority items for attention and support from the Programme) | Action by when? |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Qualification – clarity on scope of PIT for Migration & Non-Functional Testing & Qualification Scenarios based on placing reliance policy for each LDSO | ASAP |
| Decisions on outstanding DIN Log items, CRs, Design Queries and Non-SIT LDSO and timelines and data requirements for Qualification | ASAP |
| Migration, Non-Functional & Operational testing requirements are yet to be fully detailed - SIT / PIT/ QT. | ASAP |

| Risks or Issues | Impacts | Opportunities to resolve and deliver as soon as possible |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Volume testing requirements for PIT for SIT Non-Functional unclear. | SSEN ability to develop test data load tools/harnesses. | Work with SIT Non-Functional SI Lead. |
| Central systems (data services/load shaping) do not provide 100% coverage of consumption data to LDSO's | DNO's unable to fully recover DUoS charges. | Programme to clarify scope/approach for testing DUoS data in SIT. |
| Availability of core software products MPRS,UMSO etc to support NON-SIT LDSO PIT & Qualification is unclear | Unable to meet PIT/Qualification timelines | Change program guideline for Annex 1 plan from IR8 to IR7 for Non-SIT LDSO's to complete testing in line with suppliers' timelines. Provide product delivery plan for NON-SIT LDSO's to complete PIT |
| Potential impact on DNO budgets dependant on environment, testing requirements and timescales & new change requests | Potential under-recording of DNO cost impacts in the Programme benefits. DNOs will require approval of additional Programme funding | Require firm commitments on requirements for Environment requirements for Non-SIT LDSO testing. |
| The Reverse Migration Solution is too complex to enable Core Capability Providers to Achieve Testing & M10. | M10 timelines | N/A |
| Data Cleanse activity may take longer than aligned within program plan | Failed migration and/ or extended timelines and/ or poor-quality data | Question remains over whether import and export linkage is required (as per Elexon P459). |
| SIT testing of MPRS (incl Migration), Durabill and DIP Adapter does not complete in time for parties to complete their own PIT Functional and Migration testing and evidencing required for Qualification Testing (30/08) | Ability of DNO's to complete PIT testing/evidencing in line with CR047 timescales.. Ability of DNO's to enter Qualification Testing. | n/a outside of party control. Monitor programme SIT progress. |
| Issues identified during SIT result in delays to Programme milestones. | Ability to place reliance on SIT. | - |
| Misalignment between the Migration Design and Functional Design resulting in new design issues (DINs) for SCS requiring additional MPRS development effort. | Potential delay in MPRS product availability. | Resolve the design issues and replan the Migration SIT to accommodate the changes. |
| Placing reliance guidance document for Non-functional, Operational and Migration has not been published/ agreed with the parties. This could cause potential delay for scope identification and preparedness for PIT & QT. | Preparedness for PIT & QT. | Programme to publish the PIT guidance considering the placing reliance for different test phases. |
| The sandbox testing window has not been finalised, which may impact our plans for consequential impact testing, resource planning, etc. | Unable to plan for consequential impact testing, and associated costs. | Discuss the Sandbox testing window for LDSOs in the QWG and agree on a plan. |

| RAGs | Overall | Approach | Plan | Resources | Budget | Risk | | | | |

FTIG meetings

- Focus of sessions is on SIT Functional progress and readiness for future SIT stages
- Recent key topics:
 - Analysis on SIT Functional progress & defects raised
 - Environment set up for Settlement testing
 - SIT Migration Preparation readiness
- Continued good engagement from CCPs and PPs
- Open & transparent discussion on the above topics both in FTIG and in associated bilaterals
- Moved back to a weekly as requested by participants

Overall Status

- The Code Drafting Workstream is on track for M6 delivery in August 2024 and lower-level tier 3 milestones are all on track. M7M8 planning started and on track.

April Summary

- Mop-Up 2 consultation entered assurance review on 03/04 and will close on 22/04 - 5 comments received which have been actioned – ready to be sent to a May CDWG
- M7 Planning progressing with due process questions, cost RFI (via PPIR) questions and high-level post M7 change approach agreed (detailed timing and SCR interactions still in development).
- Progress Consistency Check activities

May Deliverables

- Receive CDWG Mop-up 2 recommendation to approved Mop-up 2 Code Artefacts
- Progress Consistency Check activities
- Progress M7 and M8 activities

| Mstn Ref | Drafting Milestones | Baseline date | Forecast date | Status |
|------------|----------------------------------------------------------|---------------|---------------|----------|
| T2-RE-0100 | Data Services approved at CCAG | 24/05/23 | 24/05/23 | Complete |
| T2-RE-0150 | Metering Services approved at CCAG | 24/05/23 | 24/05/23 | Complete |
| T2-RE-0250 | Registration approved at CCAG | 23/08/23 | 23/08/23 | Complete |
| T2-RE-0200 | BSC Central Services approved at CCAG | 27/09/23 | 27/09/23 | Complete |
| T3-RE-0300 | Governance, Migration and Qualification approved at CCAG | 22/11/23 | 22/11/23 | Complete |
| T3-RE-0350 | Transition Text and Interfaces approved at CCAG | 24/01/24 | 24/01/24 | Complete |
| T3-RE-0500 | Topic Area Mop Up approved at CCAG | 22/05/24 | 22/05/24 | Green |

| T3-RE-0550 | Finalise and consistency check approved at CCAG | 23/08/24 | 23/08/24 | Green |
| T3-RE-0550 | Code changes baselined (M6) | 23/08/24 | 23/08/24 | Green |
| T2-RE-0600 | Smart Meters Act powers enabled (M7) | 11/11/24 | 11/11/24 | Amber |
| T2-RE-0650 | Code changes delivered (M8) | 07/03/25 | 07/03/25 | Green |

Governance group updates

Programme Steering Group (PSG)

PSG 03 April 2024

Qualification Testing (QT) Updates: PSG received updates on the status of existing QT deliverables and new proposed QT milestones contained within Programme Change Requests (CR) 047 and 048.

Migration Updates: PSG received updates on the development of the Migration Control Centre framework and associated consultations.

Testing Updates: PSG received updates on the progress of System Integration Testing (SIT) Functional testing, and the status of future SIT stages including SIT Migration and SIT Operational.

Decision Appeal Lessons Learned: The IPA provided an overview of reflections on the appeals process following the CR036 appeal. The appeals process will be updated accordingly.

PSG papers available [here](#).

System Integration Testing Advisory Group (SITAG)*

SITAG 17 April 2024

SIT Migration Test Scenarios (TS) & Test Cases (TC): SRO approved the Themes 2 (Reverse Migration) & 3 (Import/Export MPANs & Exception Handling) TSs & TCs, excluding SIT-M-RM-COS-DfltVal v0.1 and ISD updates testing.

Environments Approach & Plan: SRO approve v2.13 of plan, incorporating latest non-SIT LDSO requirements.

SIT Functional Updates: SIT F readiness work-off item substantively complete. Steady progress on SIT F execution, but Programme requests increase in throughput.

SIT Delivery Plans: Overview of plans and deliverable dates for future SIT stages.

SITAG papers available [here](#).

Design Advisory Group (DAG)

DAG 10 April 2024

CR044 Decision: DAG recommended design changes should be made, however owing to potential challenges with implementation pre-M10 (Systems ready for migrating MPANs) determined the decision should be escalated to the Programme Steering Group (PSG).

CR045 Decision: DAG recommended design changes should be made, however owing to potential challenges with implementation pre-M10 and risks associated with not implementing pre-M10, determined the decision should be escalated to the PSG.

CR046 Decision: SRO approved CR046 ([Enabling Metering Point Energy Flow to be changed more than once](#)) for release in a future IR8.x release (date TBC) and with testing impacts (if any) to be discussed via the SIT workstream.

DAG papers available [here](#).

Qualification Advisory Group (QAG)*

QAG 18 April 2024

Functional Non-SIT LDSO Test Scenarios and Test Cases: SRO approved the Functional Non-SIT LDSO Test Scenarios and Test Cases

Focused Working Group for QT: Chair approved the creation of two new qualification subgroups, the Non-SIT LDSO and Non SIT Supplier & Agent Qualification Testing subgroups

Environments Approach and Plan: The Programme advised there would be further iterations of the document in future to incorporate Supplier & Agent QT and the environments sandbox.

QAG papers available [here](#)

Cross Code Advisory Group (CCAG)

CCAG 24 April 2024

Horizon Scanning Log: DCUSA provided updates on DCP428. REC provided updates on R0062, R0093, R0098, R0108, R0121 & R0144. No new updates from BSC.

CCAG Reporting & Risks: CCAG is on track for M6 delivery in August 2024. M6 success criteria will be amended and brought back to May's CCAG.

M7/M8 Planning: The approach has been agreed for M7/M8 planning, and activities are ongoing. Further updates to be brought to May CCAG.

Mop-up 2 Consultation Update:

Code Drafting Working Group (CDWG): Presented mop-up 2 consultation update, and consistency check approach.

CCAG papers available [here](#).

Migration & Cutover Advisory Group (MCAG)*

MCAG 26 March 2024

Migration Control Centre Framework: Provided an update on the Migration Control Centre Framework.

Programme Milestones: No changes to milestones.

MCAG papers available [here](#).

Wider Programme Updates

Participant Checklist:

- 1.REMINDER: Pre-Qualification Submission – due this week! The deadline is **Friday 26 April 2024**
- 2.REMINDER: Pre-Integration Testing (PIT) Approach & Plan – due this week! The deadline is **Friday 26 April 2024**
- 3.REMINDER: Population of Connection Type for Traditional and Advanced Meters within Measurement Class 'A' Self-Declaration – the deadline is **Monday 29 April 2024**
- 4.Qualification Approach & Plan: Annex 1 Consultation - the deadline is **Friday 3 May 2024**
- 5.Non-Systems Integration Testing (SIT) Licensed Distribution System Operator (LDSO) Migration Test Scenarios and Test Cases Consultation - the deadline is **Friday 3 May 2024**
- 6.M10/M11 Cutover Plan Consultation - the deadline is **Tuesday 7 May 2024**

You can view the **Participant Checklist** on the respective **Planning pages** of the [Collaboration Base](#) and the [MHHS website](#).

We've created the **Interim Release and Swagger version alignment document** for Systems Integration Testing (SIT) participants. You can view this document on the respective **SIT pages** on the [Collaboration Base](#) and [MHHS website](#).

Upcoming Governance Meetings:

- Thursday 25 April 2024:** Data Cleanse Working Group (DCWG)
- Wednesday 1 May 2024:** [Programme Steering Group \(PSG\)](#)

Upcoming Events:

- CANCELLED: MHHS Change Request Webinar: CR049 on 30 April 2024

Elexon is seeking P471 & P472 Workgroup members:

The BSCCo is urgently looking for Workgroup members for the following BSC Modifications, which are being run together for efficiency:

- [P471: Amendment to BSC Section E to allow more flexibility in procurement of BSC Agents](#)
- [P472: Amendment to provisions for Parties to bring claims against BSC Agents in BSC Section E](#)

You can sign-up to these Workgroups on the [Modification and Issue workgroup sign-up page of the Elexon website](#).

Testing

- The PPC Team continues to support the Testing team with SIT Functional execution, including the communication of known defects and the dissemination of the daily reports for each Cohort, the Central Parties and the Programme. Participants are showing that they understand the DITL processes and operating in line with Programme expectations.
- The PPC Team is supporting with the coordination and facilitation of the SIT Non-Functional and SIT Operational Test Scenarios & Cases Review Workshops and subsequent industry review windows.
- The PPC Team has coordinated the consultations for the SIT Non-Functional and SIT Operational Test and Test Data Approaches and Plans, which are being taken to SITAG on 15 May for approval.
- **Next Steps:** Continue to support with the industry review periods for SIT Non-Functional and SIT Operational Test Scenarios and Cases, and with Settlement activities.

Qualification

- The Non-SIT LDSO Functional Test Cases and Test Scenarios have been approved at the QAG following participant review and engagement and the Programme have published Non-SIT LDSO Migration Test Cases and Test Scenarios for consultation.
- The Programme have released an updated version of Annex 1 (Non-SIT LDSO Qualification Testing) of the Qualification Approach & Plan for consultation which includes updates to Non-Functional and Operational Qualification Testing.
- Participant engagement has ramped up in the closing weeks of the Pre-Qualification Submission which is due from participants on 26th April. The Code Bodies and the Programme collaborated on additional engagement opportunities with participants to support them with completing their submissions.
- **Next Steps:** facilitate and support Qualification Approach & Plan Annex 1 and Qualification Testing Test Scenarios consultations. Kick-off analysis of Pre-Qualification Submissions to support the Programme with assessing participant readiness for Qualification.

Targeted and Tailored Communications

- The PPC facilitated the 2024 MHHS Open Day on 23 April 2024 focussed on Qualification, Transition and Migration. There were over 200 Programme participants in attendance in-person and virtually.
- Phase 3 of the communication channel improvements is underway with updates to the Collaboration Base and website navigation panes to support participant engagement with SIT, Migration and Transition content.
- **Next steps:** Continue to develop the Open Day agenda for April. Continue the Phase 3 improvements on the Communication Channels.

Industry horizon scanning: Summarise items monitored via the Cross-Code Advisory Group (CCAG) horizon scanning process

Horizon scanning metrics

The following graph summarises items being monitored via the Programme's horizon scanning process

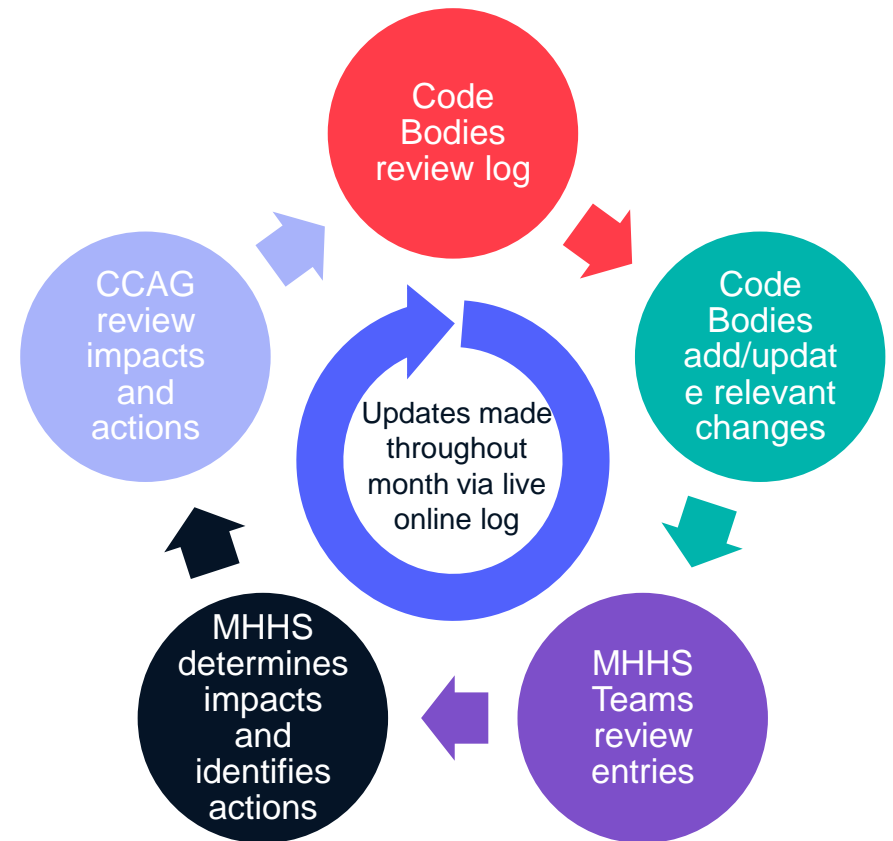

More information can be found via the [CCAG meeting papers](#)

Direct link: [MHHS-DEL387 CCAG Code Change Horizon Scanning Log v1.0](#)

- Industry code changes: 68** – REC: 34, BSC: 15, DCUSA: 11, SEC: 5, CUSC: 3
- Wider industry changes: 5** – HH opt-out, DUoS SCR, code review, microbusiness definition, licence change
- Criticality of horizon scanning items** – High: 11, Medium to High: 3, Medium: 3, Low/No impact: 48
- Top RAID linked items:**
 - **SEC MP162** (R0011, R0083, R0113, R0115, R0116, R051, R0182, R0191, D0076, D0077)
 - **REC R0032** (D0068, D0069) • **REC R0044** (D0055)

Horizon Scanning Process

The CCAG collaborate to populate the Horizon Scanning Log and the Programme undertakes impact assessment of each change. Where a change requires actions by the Programme beyond simple monitoring or initial definition, this is entered into the Programme RAID framework with an appropriate action plan and owner put in place.

Dashboard Objective: To provide PSG with a progress update on in-flight and future planned assurance activities.

Assurance Activities in Progress / Completed during month

Theme-Based Assurance

- **Ongoing Embedded Assurance Activities (WP1) - In Progress** - Monthly cadence of regular interactions with MHHSP. Updated change control process is under review. Current focus is the review of plans to achieve operational readiness for M10.
- **Design Documentation (WP4) - In Progress** - Continued monitoring of design updates/change requests through attendance at DAG and DRG, and review of supporting documentation.
- **Management of Separation Plan (WP5) - In Progress** - A review has been conducted to assess the Separation Plan’s operating effectiveness and whether it remains fit-for-purpose for future phases. The draft report is currently being finalised.
- **Consequential Change Risk Assessment (WP14) - In Progress** - Review of consequential change scope/risks to inform any additional assurance activities has been completed and an update is provided as part of the PSG agenda.

Stage-Based Assurance

- **Test Assurance (WP9) - “Period 6 (P6)” - In Progress** - Assurance period running to mid July, covering SIT F progress, SIT Migration readiness, and Plan Congestion
- **Qualification (WP12) - In Progress** - Continued monitoring over preparation activities for Qualification Testing.

Upcoming Assurance Activities

- Continued performance of “In Progress” theme-based and stage-based assurance activities

Assurance Action Status

Overall, 150 actions are agreed with the Programme team or Participants to date.

- 140 are **completed**
- 1 is **expired**
- 9 are **in progress**, out of which :

| | |
|---------------------------|-----------------------------|
| 5 are overdue by <1 month | 4 are within their due date |
|---------------------------|-----------------------------|

Below is the trend of actions opened and completed within the last period.

| | | |
|------------------------------|---|---|
| New actions opened and trend | 0 | → |
| Actions completed and trend | 5 | ↓ |

**Symbols represents trends compared to previous month*

Summary and Next Steps

INFORMATION: Summarise actions and decisions.
Look ahead to next meeting

Chair and Secretariat

5 mins

Summary and Next Steps

1. Confirm actions and decisions from meeting
2. Next PSG meeting: **05 June 2024 10:00 – 12:30 (F2F – Elexon, 350 Euston Rd, NW1 3AW)**

05 June 2024 agenda items

- Core Capability Providers Deliver Dashboards Deep Dive
- Programme Change Requests

Standing items

- Minutes and Actions
- Qualification Testing
- Migration Updates
- Programme Reporting
- Delivery Dashboards
- Summary and Next Steps

If you would like to propose an agenda item for the PSG, please contact the PMO at PMO@mhhsprogramme.co.uk

Thank you
