Horizon Scanning Code Body Change Update DCUSA

Change Title DCP444		Additional settlement runs					
Change Summary:		To describe how settlement runs, that will cause Supercustomer DUoS Reports (REP-002/A/B) to be created and sent under MHHS, that were not previously created as D0030/D0314 flows, will be handled.					
Stakeholder positions:		The Sponsor has withdrawn the change proposal					
Date raised:	03/09/2024	Status:	New	Decision date:	December 2024	MHHS Impact:	Depends on the solution
Change Title DCP445		Implementation of Market-wide Half Hourly Settlement (MHHS) Arrangements					
Change Summary:		This Change Proposal will ensure that the appropriate obligations, processes and provisions for the new MHHS arrangements, which have been developed and consulted on as part of the MHHS Programme, are introduced into the DCUSA.					
Stakeholder positions:		<p>The change proposal was supported by stakeholders. Only one comment received:</p> <p>“There is a reference to “REP002” in Schedule 16, para 128, which we think should be to “REP-002B” to reference the correct message and align with the definition of Supercustomer DUoS Report”.</p> <p>This comment is correct. It is a minor error and was omitted when the message was split. Awaiting feedback from the Authority.</p>					
Date raised:	04/09/2024	Status:	Awaiting Authority approval	Decision date:	11 December 2024	MHHS Impact:	Yes, this is the change proposal to support MHHS

Horizon Scanning REC Change Updates: Existing

Change Title		R0201 - Creation of a Tool to Manually Correct ERDS/CSS Discrepancies					
Change Summary:		<p>There is currently a tool utilised by DNOs to manually correct registration data to align the Registered Supplier in ERDS with the data held in CSS. The MHHS Design does not allow for retrospective amendment of Supplier Registration - there is no equivalent tool for manual correction post MHHS go live (M10). Therefore, post MHHS implementation, any issues which prevent CSS data being reflected in ERDS cannot be corrected.</p> <p>Update 20/11 – Party impact assessment has been published, closing on 29/11. Solution documentation can be found on the REC Portal CP page.</p>					
Stakeholder positions:		Supportive					
Date raised	02/08/2024	Status	Under Development	Decision date	TBC	MHHS Impact	Design impact being delivered by BAU

Change Title		R0202 – Performance Assurance Reporting Catalogue Updates (MHHS)					
Change Summary:		<p>The Performance Assurance Report Catalogue (PARC) requires updating following an impact assessment that identifies the requirements to support changes being introduced by MHHS.</p> <p>Update 20/11 – A re-baselined Change Proposal Plan has been approved which pushes back the impact assessment period to Q1 2025 as the DIP reporting arrangements are still being developed preventing the DIP Manager from completing its assessment.</p>					
Stakeholder positions:		TBC					
Date raised:	08/08/2024	Status:	Under Development	Decision date:	TBC	MHHS Impact	Supports MHHS implementation

Horizon Scanning REC Change Updates: Existing

Change Title		I0204 – Sequence Order of CSS00200 Message					
Change Summary:		<p>As each CSS00200 message is a refresh of all the current & future dated Metering Service (MEM) and Smart Meter Data Retriever (SMDR) appointments the ordering that the messages are loaded into CSS must be correct. If loaded out of order, the wrong active MEM/MDR appointment can be recorded. Currently there is no mechanism to control the correct ordering of the messages. This issue will explore the options to resolve this.</p> <p>Update 20/11 – This issue has been withdrawn following Programme CR-056 approval. Updates to the REC will be progressed alongside other impacting MHHS design updates required for M8/M10 implementation.</p>					
Stakeholder positions:		TBC					
Date raised:	15/08/2024	Status:	Withdrawn	Decision date:	TBC	MHHS Impact	Supports MHHS implementation
Change Title		R0209 - Implementation of MHHS Arrangements					
Change Summary:		<p>This change is the main Significant Code Review CP for the REC to implement the MHHS arrangements.</p> <p>Update 20/11 – The Change Report (Final Recommendation) was sent to the Authority for decision on 06/11/2024.</p>					
Stakeholder positions:		Supportive					
Date raised	02/08/2024	Status	Awaiting Authority decision	Decision date	11/12/2024	MHHS Impact	Direct impact

Horizon Scanning REC Change Updates: New

Change Title		I0190 - Related Meter Point RMP status rules					
Change Summary:		<p>The issue is to look at how MPAN relationship validation is managed within the registration systems, which is inconsistent with the current code drafting in Schedule 28. Note that initial analysis suggests this issue is limited in the current market, with c. 20 MPAN relationships currently impacted. It has also been identified that allowing MPANs with different RMP statuses to be related may cause issues with the auto registration processes that will operate under MHHS.</p> <p>Update 20/11: Added to Horizon scanning log. Initial assessment being progressed.</p>					
Stakeholder positions:		TBC					
Date raised	02/08/2024	Status	Initial Assessment	Decision date	TBC	MHHS Impact	Of interest

Change Title		R0193 - Add Enumeration Values to the DI51035 - Communications Provider Data Item					
Change Summary:		<p>This change is a supporting change to P442 ' Reporting to EMRS of chargeable volumes for SVA Metering Systems that record both exempt and licensed supply" for the industry to maintain an ongoing list of valid Communications Providers after it is removed from MDD, Enumeration Values will be added to the Communication Provider Data Item (DI51035/J1709) which is a REC-owned data item.</p> <p>Update 20/11 – Added to Horizon Scanning log. The Change Report (Final Recommendation) was published on 19/11 for decision by the Technical Expert Panel on 27/11.</p>					
Stakeholder positions:		Supportive					
Date raised:	08/08/2024	Status:	Voting	Decision date:	27/11/2024	MHHS Impact	Of interest

Horizon Scanning REC Change Updates: New

Change Title		I0222 – ESME ID Update Rejections					
Change Summary:		Issue raised to address the inability to update ESME IDs as part of Data Cleanse and Metering Activities due to the MPRS Validation Rules currently in place. Update 20/11: Added to Horizon scanning log.					
Stakeholder positions:		TBC					
Date raised:	15/08/2024	Status:	New	Decision date:	TBC	MHHS Impact	Of interest

REC Releases with Horizon Scanning log changes included

08 November 2024 –

- R0150 - On-site Aggregation as a method to facilitate Third Party Access - BSC P455
- R0098 - Optional fuzzy searching in EES
- R0108 - Enabling EES searches using a Unique Property Reference Number

MHHS Programme – Code Workstream Summary

Overall Status

- All SCR Modifications have been sent for Ofgem decision
- M8 activities are on track, and the M8 Milestone has moved in line with the M10 delivery date of 24/09/25
- Post-M6/PreM8 Code change process agreed in principle

Monthly Summary

- Supporting and monitoring of M7 activities – all on track
- Supporting and monitoring M8 BSC/REC/DCUSA implementation activities
- Progressed 'incremental' Code change post-M6/pre-M8 plan

Next Month Deliverables

- Support and monitor M7 SCR Modifications Ofgem decision
- Support M8 BSC/REC/DCUSA implementation activities

Mstn Ref	Drafting Milestones	Baseline date	Forecast date	Status
T2-RE-0600	Ofgem decisions on M6 baselined code modification proposals (M7)	11/12/24	11/12/24	Green
T2-RE-0650	Code changes delivered (M8)	24/09/25	24/09/25	Green

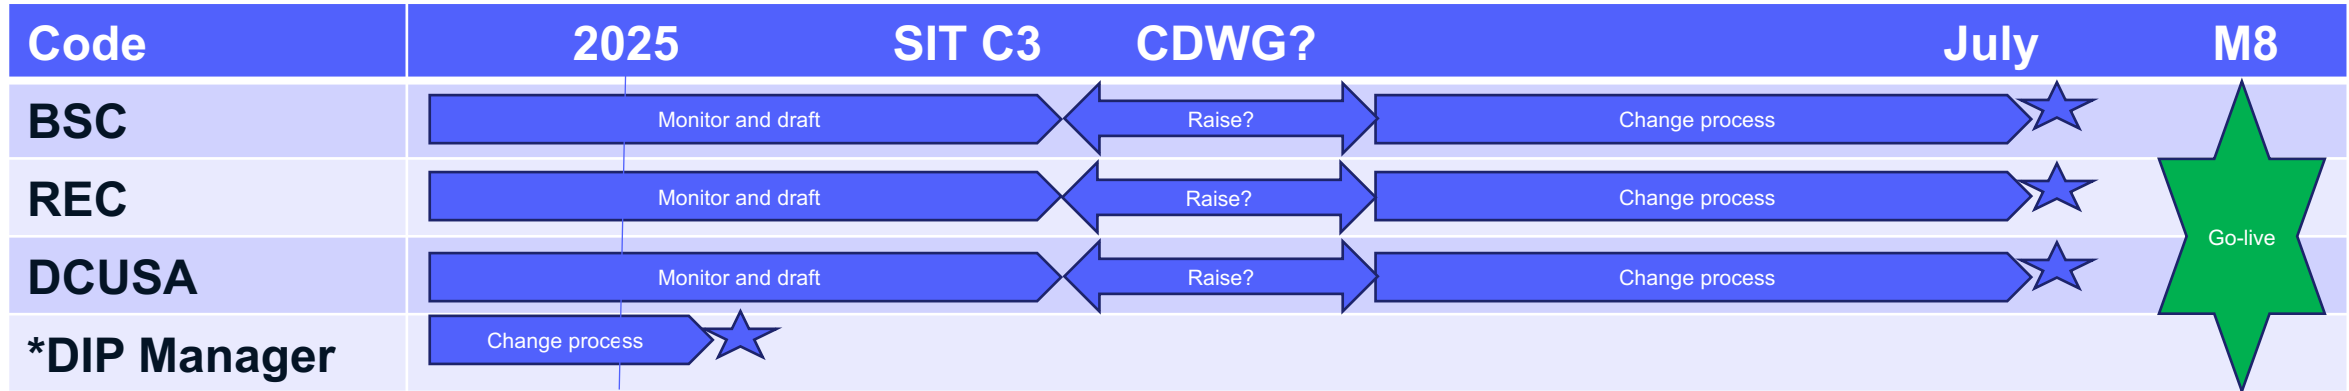

Top Programme Risks related to CCAG

Theme	Summary	Mitigation Approach Overview
Top risks to the Code Workstream	The main risk to Code delivery is late changes, which Code needs to reflect, e.g. through PCRs and/or testing or issues during the SCR process	<ul style="list-style-type: none"> Monitoring triggers to Design and Code change and ensuring there are mechanisms to make changes within the Programme timescales Front load SCR processes, so that issues are identified earlier and within timescales that don't delay the milestone timescales

		Key Risks																				Current score movement since last CCAG	Mitigation Plan										
Risk ID	Risk Description	Risk Score Assessment																															
		Critical					High					Medium					Low																
		30	29	28	27	26	25	24	23	22	21	20	19	18	17	16	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1		
R966	There is a risk that Code Drafting over and above the M6 baseline will be required for Service Management to ensure industry parties are appropriately obligated to take action																															New item	1) Plan for analysis of Helix Service Management deliverables and likely Code drafting activity
R202	There is a risk that Programme testing (CIT/SIT) may identify changes to baselined code and require code updates and further code releases after initial code changes have been approved																															No change	1) Monthly meeting in place between Test and Code to monitor likely volume of changes to Design and by association Code 2) To ensure the change control process is followed correctly and test item volume known by Code team 3) Ongoing engagement on how code change will be managed
R485	There is a risk that the Design or queries related to Design are not completed or provided in time and as a result do not provide the information required to enable Code drafting delivery																															No change	1) Design process (DIN Process) set up to resolve Design queries 2) Amend Code Drafting Plan to accommodate outstanding Design areas 3) Monitor DIN Volumes 4) Code is baselined against a point in time and after this time, changes are picked up by a CR or post M6 agreed process.
R920	There is a risk that Code Drafting (specifically the Energy Market Data Specification) does not reflect the intended MHHS design. This risk is specific to Swagger's alignment with for example DES138.																															Score reduced from 20 to 10	The Programme recognises the risk in the context of Code drafting, It has always been the intention of the Programme to keep both documents aligned where appropriate, PP have been told to develop against Swagger where inconsistencies are identified. the DIN process has worked effectively to address any misalignment and this will continue going forward.

Post M6/Pre M8 incremental code change proposed timelines

Principles

- Code Bodies will align when they raise 'incremental' code changes, where relevant
- Changes will be after SIT Cycle 3 (and no inflight PCRs)
- BAU change process to be used
- Materiality (aka Ofgem required to make decision or not) to be decided when raising changes next year
- Changes delivered/approval before Summer holidays
- *DIP Manager will progress MHHS changes earlier

Assumptions

- Code Bodies will progress their changes, except MHHP will draft/raise BSC changes
- Changes will follow a BAU route – SCR not required, (but this position will be under constant review)
- Changes will be logged on a central change control log and reported to CCAG
- CDWG will be stood-up to present cross-code changes, before formally raising changes via Code Body governance
- Post M10 activities will be progressed under TORWG
- Codes not listed above don't have identified changes

M7 Delivery Update

MHHS Programme – Ofgem M7 Delivery Summary November 2024

Overall Status

- M7 remains on track: Ofgem has received Final Reports from the code bodies on all the SCR modifications and is preparing decisions

Month Summary

- Following discussions on 5 and 6 November respectively, the REC and BSC Panels agreed to recommend approval of the SCR mods
- The DCUSA Voting Period ended on 7 November and all voters supported the modification
- All three code bodies submitted Final Modification/Change Reports on or before the deadline in the Programme Plan

Next Month Deliverable

- Ofgem to publish decisions on or before the M7 milestone of 11 December

MHHS Code Workstream – REC Milestone Reporting

Overall Status

- M8 on track for Sept 2025 (based on proposed CR55 dates).
- M8 scope includes REC changes covered by the SCR, implementation of REC consequential CPs* that are progressed outside of the SCR and REC CAT 3 changes**

Month Summary

- REC CP R0209 - [Implementation of Market-wide Half Hourly Settlement \(MHHS\) Arrangements - REC Portal](#) recommended by REC Change Board and sent to Authority for approval.
- REC CP R0202 - [Performance Assurance Report Catalogue Updates \(MHHS\)](#) issued for IA (required for M8) and ongoing engagement with required data providers.
- Reviewed CR55 extended Change Freeze impacts on delivery of other REC CPs during 2025.
- Assessed IR8.2 to IR8.5 to identify four required REC changes for M8 (three to EMDS and one to ERDS Service Definition). To be added to central Programme log for visibility in early 2025.

Next Month Deliverables

- Publish Authority decision on R0209.
- Review and update CAT 3 Plan to account for CR55.
- Continue to work with Programme on M6 Work Off plan and post M10 change process.

Programme Updates

INFORMATION: Updates from MHHS Programme governance groups and the wider Programme

Programme (Secretariat)

0 mins – to be taken as read

Governance group updates

Programme Steering Group (PSG)

PSG 06 November 2024

Testing Update: Programme provided an update on Cycle 3, Settlement Testing, Domain Expiry and IR8.4.

Change/Design Management post-M10:

Programme provided an update on principles for Change Management post-M10.

Risks and Issues: Programme outlined the key strategic themes from the Programme RAID log post CR055.

Programme Change Requests: CR057 was rejected by SRO following a recommendation to reject by Change Board based on CR057 not meeting the Change Freeze criteria.

PSG papers available [here](#).

Design Advisory Group (DAG)

DAG 13 November 2024

Meeting held by correspondence owing to diminishing content.

Interim Release Update:

Interim Release 8.4 was published on 16 October 2024. IR8.5 was published 06 November 2024

Change Request Updates: Programme provided updates on CR055, CR057, CR058 and CR059.

DAG papers available [here](#).

Cross Code Advisory Group (CCAG)

CCAG 23 October 2024

In the meeting, the CCAG provided updates on:
Programme Updates: Including an update on the progress of CR055.

Horizon Scanning Log: National Grid ESO, DCUSA, REC and BSC provided updates.

M6 Reporting: Post M6 Code Change Process and top Programme risks relating to CCAG.

M7 Delivery: Ofgem M7 delivery.

M8 Code implementation: Code Bodies and DIP Manager update on the M8 Code Implementation/go-live.

November CDWG1 was cancelled.

CCAG papers available [here](#).

System Integration Testing Advisory Group (SITAG)*

SITAG 20 November 2024

SIT Operational Test Scenarios and Test Cases Theme 3: Programme provided an update on Theme 3 and addressed the initial assessment feedback from Participants.

Service Management & SIT Operational Dependencies: Programme provided an update on the early release of the Service Operating Manual.

SIT Test Progress Update: The Programme provided an update on SIT Test Progress, highlighting the progress of Settlement Testing.

Regression Approach: The Chair approved the date changes of two T3 milestones and assignment of two T2 milestone IDs.

SIT Functional Rationalisation: The Programme ran through the rationalisation process

SITAG papers available [here](#).

Qualification Advisory Group (QAG)*

QAG 17 October 2024

Wave Allocation: The Code Bodies provided an update on whether Wave Reallocation can be supported with the outcome of CR55 and the potential next steps.

IPA Update: The IPA provided an update on the Period 8 Test Assurance.

Qualification Documents: The Chair, acting with delegated authority of the MHHS Senior Responsible Owner (SRO), approved the Self-Qualification Assessment Document (SQAD) to go to BSC PAB on 31 October 2024.

The Programme also provided an update on CR055.

QAG papers available [here](#).

Migration & Cutover Advisory Group (MCAG)*

MCAG 22 October 2024

Service Design Consultation: MCAG endorsed the Service Design Document v2.4 and the Low Level Service Design v2.2, noting that the interaction between service desks would need to be detailed in the Service User Operating manual to be produced in December.

The Programme also provided an update on MWG, DCWG, TORWG and CR055.

MCAG papers available [here](#).

Wider Programme Updates

Participant Checklist:

There are a few updates this week, so this week's Participant Checklist includes the following items for Programme participant review, feedback and awareness:

1. REMINDER: Qualification Assessment Document (QAD) Consultation – the deadline is **today, Wednesday 20 November 2024**
2. REMINDER: Systems Integration Testing (SIT) Operational Test Scenarios & Test Cases for Theme 3 Batch 2 Consultation – the deadline is **Friday 22 November 2024**
3. REMINDER: Final Pre-Integration Testing (PIT) Approach & Plan – the deadline is **Friday 29 November 2024**
4. REMINDER: Submitting test evidence for PIT Functional and redacted Meter Point Administration Numbers (MPANs) – the deadline is **Friday 29 November 2024**
5. NEW! Small and Medium Supplier representatives required for Governance Group Meetings - the deadline for nominations is **Wednesday 4 December 2024**
6. REMINDER: Non-Systems Integration Testing (SIT) Licensed Distribution System Operator (LDSO) Qualification Testing Readiness Report Template – the deadline is **Friday 13 December 2024**
7. Updated Requirements to Test Traceability Matrices (RTTMs)

You can view the **Participant Checklist** on the respective **Planning pages** of the [Collaboration Base](#) and the [MHHS website](#). In the Participant Checklist you can view upcoming consultations and key deliverables, as well as the latest status of Change Requests in the **Master Change Request Dashboard** tab.

We've created the **Interim Release and Swagger version alignment document** for SIT participants. You can view this document on the respective **SIT pages** of the [Collaboration Base](#) and [MHHS website](#).

Upcoming Governance Meetings:

- **Thursday 21 November 2024:** Qualification Advisory Group (QAG)
- **Tuesday 26 November 2024:** Migration & Cutover Advisory Group (MCAG)
- **Wednesday 27 November 2024:** Cross-Code Advisory Group (CCAG)

*SITAG, MCAG, QAG replaced the Testing and Migration Advisory Group (TMAG) in Q1 2024.
