Minutes and Actions

DECISION: Approve minutes of previous meeting and review outstanding actions

Chair & Secretariat

5 mins

Minutes and Actions

- Approval of Headline Report from CCAG meeting held [27 August 2025](#).
- Review of outstanding actions:

Ref	Date Raised	Action	Owner	Due Date	Update
eCCAG46-01	12/09/25	Programme to recommend to PSG that MCAG confirms readiness for M8.	Programme/ PMO	24/09/25	RECOMMEND CLOSED: This was announced at PSG on 12 September 2025 and the approval has been formally provided to the PSG SRO.
eCCAG46-02	12/09/25	Programme to request the additional slide from REC and republish version 3 of the papers with the additional slide on DTC/DTN missing Scenario Variants	Programme/ PMO	24/09/25	RECCOMENDED CLOSED: REC has shared the slide with the Programme, and the papers have been republished as version 3 with it included.
eCCAG46-03	12/09/25	REC committed to exploring whether the Go-Live date for the DTC revision could be brought forward and to confirm publication timelines	REC	24/09/25	ONGOING: REC to provide a verbal update in the meeting on 24/09.
CCAG45-01	27/08/25	CDWG meeting to be cancelled for September	Programme/ PMO	27/08/25	RECOMMEND CLOSED: CDWG was cancelled. There will be no more CDWGs.

M8 Reporting

INFORMATION:

- Programme Reporting
- Code Body Reporting

Programme & Code Bodies

15 mins

MHHS Programme – Code Workstream Summary

Overall Status

- All code changes have been approved by Ofgem and Code Bodies have a plan to deliver M8 Code changes completing on 22/09

Monthly Summary

- The MHHS Programme workstream is closing down
- The MHHS Programme collaboration base and website have been updated to reflect the final code artefacts for BSC, REC, DCUSA and EMRS.
- All code queries will be directed to individual Code Bodies

Next Month Deliverables

- No actions or activities planned – the workstream should have been finalised

Ref	Drafting Milestones	Baseline date	Forecast date	Status
T3-RE-1100	Ofgem Decision	Fri 05/09/25	Fri 05/09/25	Complete
T2-RE-0650	M8 Code Change Delivered	Mon 22/09/25	Mon 22/09/25	Green

MHHS Code Workstream – DIP Manager Milestone Reporting

Overall Status

- DIP Rules implemented Oct 2024
- On track for DIP Rules to be updated in line with MHHS design by M8

Month Summary

- DCR0003 – Onboarding and requirements clarification has implemented.
- DCR0004 – Defining DIP Manager Data and its use is currently being consulted on.
- DCR0005, 6 – have been raised, and the DIP Manager is assessing each request.
- Review of the DIN log ongoing – changes to the DIP Supplement and DIP Rules will be made before M8 to enable DIP Manager Data to be shared with Code Bodies

Next Month Deliverables

- Continue to engage with MHHS and stakeholders on subsequent changes to the DIP Rules

Ref	Drafting Milestones	Baseline date	Forecast date	Status
T2-RE-0650	M8 Code Change Delivered	Wed 22/09/25	Mon 22/09/25	Green

MHHS Code Workstream – REC Milestone Reporting

Overall Status

- REC Release on track for 22 Sept 2025.
- M8 scope includes REC changes covered by the SCR (R0209 and R0241), REC consequential CPs* progressed outside of the SCR and REC CAT 3 changes**.

Month Summary

- All REC documents prepared and loaded in Digital Navigator for release at M8.
- Updated REC will be effective from 00:01 on 22 Sept 2025.
- REC Code Manager raised and approved all CAT 3 changes required for M8.
- Issue identified with a missing scenario variant from each of the D0354, D0355 and D0356 in the DTC developed by REC Code Manager and provided to ElectraLink to uplift the DTN. Confirmed that the scenario variants are included in the EMDS so this is a manual error in production of the DTC rather than a Code Drafting issue. These are BSC owned DTN flows and Elexon confirmed not critical for M10. Plan agreed with Elexon and ElectraLink to resolve through a DTC/DTN update by M11.

Next Month Deliverables

- Update DTC and EMDS (DCUSA change only) to add missing scenario variants identified for D0354, D0355 and D0356 (BSC owned flows) and D0164, D0394 and D0395 (DCUSA owned flows). Updated DTC will be provided to ElectraLink in early October for a DTN release by M11. Updated DTC will be published ahead of the DTN release.

MHHS Programme – BSC M8 Milestones

Overall Status

- On track to deliver BSC Code artifacts by M8

Month Summary

- Collaborating internally to manage conflicts in the redlining for changes allocated to the M8 Milestone Release
- Horizon scanning changes approved by Panel on 11 September for M8 Release: [CP1608](#), [CP1609](#) and [CP1610](#).

Next Month Deliverables

- Engagement with MHHS and industry via the MHHS Expert Group to determine and define the changes to be implemented for post M8

Horizon Scanning

INFORMATION: Review and ongoing arrangements

Programme (Matthew McKeon)

15 mins

**MHHS
PROGRAMME**

Industry-led, Elexon facilitated

DCUSA

Horizon Scanning Code Body Change Update DCUSA

Change Title DCP462		Impact of MHHS on certain DCUSA owned flows					
Change Summary:		The intent of the Change Proposal is to facilitate change to DCUSA owned Market Messages and to make updates to specific Market Messages, which have Scenario Variants that are solely owned by DCUSA, to align the requirements for MHHS, including any appropriate additional Scenario Variants that might need to be added for newly created for MHHS entities					
Stakeholder positions:		Panel accepted the change proposal and moved it straight to the Change Report stage to discuss on 17 th September.					
Date raised:		Status:	New change proposal	Decision date:	Implementation is planned for M11	MHHS Impact:	Addresses an omission to earlier change proposals
Change Title DCP456		MHHS Incremental Changes for Go Live					
Change Summary:		MHHS Programme changes affecting DCUSA that have been identified post M6 (catered for by DCP445) and required by M8 (code implementation date).					
Stakeholder positions:		All parties who voted accepted the change Proposal					
Date raised:	04/06/2025	Status:	Awaiting Implementation	Decision date:	29 th of August 2025	MHHS Impact:	Yes, raised post Programme involvement

**MHHS
PROGRAMME**
Industry-led, Elexon facilitated

DIP

Horizon Scanning DIP Change Updates

Change Title		DCR0004 – Defining DIP Manager Data and its access					
Change Summary:		This DIP CR will clarify in the DIP Rules that due to the transactional nature of data in Common Blocks, this data shall be defined as DIP Manager Data for service management and issue resolution. Establish a mechanism for sharing DIP Manager Data, including from Messages' Common Blocks, with relevant stakeholders like Code Bodies, ensuring a clear legal basis for sharing personal information, such as MPAN data, when necessary.					
Stakeholder positions:		TBC					
Date raised:	7 August 2025	Status:	Consultation	Decision date:	22 October 2025	MHHS Impact	No MHHS impacts. This change reflects the MHHS design
Change Title		DCR0005 – Extending SIT A testing environment					
Change Summary:		This DIP CR proposes to extend the SIT A testing environment in order to reduce the risk profile for M11/12 entry and support participants in meeting their individual risk assessments.					
Stakeholder positions:		TBC					
Date raised:	8 August 2025	Status:	Pre-raised	Decision date:	22 October 2025	MHHS Impact	This will extend the testing environments used by MHHS Participants

Horizon Scanning DIP Change Updates

Change Title		DCR0006 – Management of Major DIP Incidents					
Change Summary:		This DIP CR will clarify in the DIP Rules the roles, responsibilities and obligations of DIP Users when there is a major incident which has/is affecting the DIP. This is part of ensuring the service management of what happens when there is a major incident affecting the DIP is clear to DIP Users.					
Stakeholder positions:		TBC					
Date raised:	11 August 2025	Status:	Pre-raised	Decision date:	22 October 2025	MHHS Impact	This will impact DIP Users as it will place obligations on them when there is a major incident affecting the DIP

**MHHS
PROGRAMME**
Industry-led, Elexon facilitated

REC

Horizon Scanning REC Change Updates

Change Title		R0205 - Provision of HH consumption data for Advanced Meter Erroneous Switches					
Change Summary:		This change issue has been raised to look at how a Supplier can reliably source HH consumption data, from the Losing Supplier, to support accurate billing of an Advanced Meter site, following an Erroneous Switch being raised / agreed. The Supplier needs to have access to HH consumption data for the ES period when they were not the registered supplier. Update 17/09 – Solution progressed: New obligation (Schedule 30) on Gaining Supplier to provide data within 5WD of ES, via template in the SDEP case PT0047 (General ET query). Reverse migration provision included for where HH data not available. On 16/09 Change Panel voted to Approve R0205 for implementation in the Nov 2025 release.					
Stakeholder positions:		Supportive					
Date raised	02/08/2024	Status:	Awaiting implementation	Decision date:	16/09/2025	MHHS Impact	Interest
Change Title		R0232 - Non-Domestic Change of Occupier SDEP Screens (R0155 Solution)					
Change Summary:		This Issue has been raised to develop the dedicated Non-Domestic Change of Occupier SDEP screens that were not possible as part of R0155 – Change of Occupier: Evidentiary Standards and Timescales. New dedicated Non-Domestic Change of Occupier screens would replace the temporary workaround provided in the R0155 solution. On Horizon Scanning log for visibility of consequential impact of MHHS change freeze. On 16/09 Change Panel voted to Approve R0232 for implementation in the Nov 2025 release.					
Stakeholder positions:		Supportive					
Date raised:	09/01/2025	Status:	Awaiting implementation	Decision date:	16/09/2025	MHHS Impact	Of interest

Horizon Scanning REC Change Updates

Change Title		R0243 - Transfer of Standard Settlement Configuration and Time Pattern Regime Data Item Ownership					
Change Summary:		From MHHS Go-Live (M8), responsibility for maintaining the SSC and TPR valid set will transfer to the REC Code Manager. Without an associated change to ownership of the specific data items, cross governance issues will arise delaying the resolution of future changes to the use of SSC and TPR data in enduring retail processes. Update 17/09 – The Change Report (Final Recommendation) was published on 12/09. It will be taken to Technical Expert Panel for decision on 24/09.					
Stakeholder positions:		Supportive					
Date raised:	12/02/2025	Status:	Decision	Decision date:	24/10/2025	MHHS Impact	Of interest

HS19	<u>CP1611</u> Updating the BSCP 700 Series to align with the MHHS design and requirements	CP	Consultation	6 Nov 25
HS20	<u>CP1613</u> Transfer of ownership of 4 Data Items in the EMDS from BSCCo to RECCo [R0243]	CP	Consultation	6 Nov 25
HS21	<u>P496</u> Defining DIP Manager Data and how it can be shared	Mod	Awaiting decision	M11 (22 Oct 25) or 6 Nov 25

Horizon Scanning Code Body Change Update BSC [HS1]

Change Title		CP1608 Amend BSCP65 for BSC Party Name to have a maximum of 160 characters					
Change Summary:		This proposal updates BSCP65 to increase the ‘Party Name’ character limit from 30 to 160, aligning the BSC with upcoming Market-wide Half Hourly Settlement (MHHS) reforms and new Industry Standing Data (ISD) standards. The 160-character limit reflects the approved maximum length for Registered Company Names and is already supported by Elexon’s Kinnect platform. To ensure compatibility with legacy BSC systems—such as CDCA and ECVA— which still operate on a 30-character limit, truncation will occur at the Party Management layer within the CRA system. This allows full names to be stored in modern systems while maintaining stability in older ones, avoiding costly upgrades.					
Stakeholder positions:		MHHS Expert group: not an impact for parties, more of an impact for Elexon’s current/legacy systems during the transition period.					
Date raised:	3 June 25	Status:	Awaiting implementation	Decision date:	5 August 25 (SVG approved, Panel approved 11 September 25.	MHHS Impact: No impact. BSC Alignment to design.	Implementation date: M8

Horizon Scanning Code Body Change Update BSC [HS2]

Change Title		P486 Aligning BSC Terminology with the Terminology Introduced by P478					
Change Summary:		This Modification aims to clarify the term <i>Half-Hourly Metering System(s)</i> introduced in P478, to ensure consistent interpretation across the BSC and related codes. It will define where the new term aligns with the existing definition and where it diverges, to avoid ambiguity or unintended cross-code impacts. P478 introduced the term to support MHHS legal drafting, using it in a pre-MHHS context. However, its meaning post-MHHS is unclear—particularly regarding the eligibility of MHHS Metering Systems for participation in the Balancing Mechanism and Wholesale Market. This clarification is essential to maintain coherence across industry codes during MHHS implementation.					
Stakeholder positions:		MHHS Expert group: showed interest in reviewing the redlining documents – as per standard Mod procedure Elexon will send out the redlined documents for consultation. Expert group overall supportive of the change.					
Date raised:	10 April 25	Status:	Awaiting implementation	Decision date:	24 July 2025	MHHS Impact:	Implementation date: M8
						No impact, updating terminology only.	
Document Classification: Public							

Horizon Scanning Code Body Change Update BSC [HS3]

Change Title		CP1607 Implementation of Data refresh message to ensure alignment of MHHS design					
Change Summary:		This CP proposes a new BSC-owned ‘<i>Data Refresh</i>’ message to enable bulk data correction between DIP, EES, and MDS following major incidents. It addresses the current lack of a formal process for resolving significant data misalignments across central systems. The mechanism would be used only in exceptional cases, with SMRS agreement, and would not replace routine discrepancy handling already defined in the MHHS design. SMRAs will need to update their systems to send the new DIP flow. Changes to the REC’s EES and EMDS are required, along with a change to the DIP to incorporate the new DIP message					
Stakeholder positions:		MHHS Expert group: emphasised urgency of progressing this change to mitigate the risk of data misalignment.					
Date raised:	29 May 25	Status:	Awaiting Committee Decision	Decision date:	7 October 25	MHHS Impact: Low/Medium impact (as to be implemented post-M10)	Implementation date: 26 March 2026
Document Classification: Public							

Horizon Scanning Code Body Change Update BSC [HS4]

Change Title		[Pre-raise] Inclusion of DI-086 Supplier Effective From data item in the IF/PUB-036					
Change Summary:		IF/PUB-036 confirms Metering Service appointments but currently lacks data item DI-086, which prevents downstream population of J0049 in D0303 (used by MAPs to determine supplier start dates). This gap impacts MAPs’ ability to bill suppliers accurately, causing disputes and increased resource use. Adding DI-086 to IF/PUB-036 will enable J0049 to be populated in D0303, supporting accurate billing. J0049 is currently optional; a separate REC change will be raised to make it mandatory once DI-086 is included.					
Stakeholder positions:		MHHS Expert group: Expert Group and Elexon agreed that post M8 would be a more suitable timeframe for delivering the solution, providing ample lead time for all parties. The change should be implemented before the M15.					
Date raised:	TBC	Status:	Pre-raise	Decision date:	TBC	MHHS Impact: Impact on IF-036 message.	Implementation date: no later than M15 (TBC)

Change Title		P490 Introduction of three new BSC Agents to provide the SVAA Service					
Change Summary:		Using the powers granted under approved Modification P482, BSCCo proposes to introduce three new BSC Agents to deliver the SVAA service. This requires updates to the BSC to reflect the new agent structure, revise service names and definitions, and clearly separate obligations. New Service Descriptions have been developed for each Agent, replacing existing SVAA documentation, including that introduced by P478. This change ensures the BSC accurately reflects the restructured delivery model enabled by P482.					
Stakeholder positions:		The one respondent to the consultation showed support for P490.					
Date raised:	12 June 2025	Status:	Awaiting implementation	Decision date:	10 July 2025	MHHS Impact:	Implementation date: M8

Horizon Scanning Code Body Change Update BSC [HS6]

Change Title		CP1606 Enabling mismatches in data between CSS and MPRS to be corrected					
Change Summary:		CP1606 proposes changes to BSCP706 to support retrospective Supply Start Dates in SMRS, enabling better alignment with MDS and CSS systems. This will be achieved by allowing retrospective ‘Effective From’ dates in IF-001 and IF-037 messages, helping Suppliers trigger the correct appointment flows after date corrections. Under MHHS, manual correction processes are no longer available for migrated Metering Points, unlike those still using existing arrangements. As both SMRS and ERDS rely on MPRS, updates are needed in both the REC (via CP R0201) and BSC to ensure full alignment. This change builds on discussions from MHHS Programme CR045, which was closed with the expectation that code bodies would progress the necessary changes.					
Stakeholder positions:		MHHS Expert group: note it is smaller in scope than the ‘Implementation of Data Refresh Message’ but warned that implementation by February depends on migration progress.					
Date raised:	29 May 25	Status:	Awaiting Committee decision	Decision date:	7 October 25	MHHS Impact: Low impact, to be implemented post M10.	Implementation date: 26 March 26

Horizon Scanning Code Body Change Update BSC [HS7]

Change Title		Issue 118 ADS Readings and Meter Configuration for Domestic CT metered customers					
Change Summary:		The current MHHS design does not support advanced market segment MPANs where customers have opted out of Half-Hourly billing or Settlement. This limits the ability to exchange multi-rate meter register readings and meter configuration details among MHHS participants. As a result, Suppliers may face challenges in ensuring billing accuracy, as readings obtained bilaterally cannot be reliably matched to the appropriate registers without configuration data, which may impact compliance with Supplier Licence Conditions 21B.1–21B.2. In addition, incomplete visibility of meter configurations may lead to the use of incorrect registers (such as non-cumulative ones) for Settlement purposes. The baseline MHHS design also does not incorporate Standard Settlement Configuration (SSC) or Time Pattern Regime (TPR) mappings, meaning key meter configuration information will be absent from Industry Standing Data.					
Stakeholder positions:		MHHS Expert group: highlighted concerns about opt-outs, CT meters, and traditional system compatibility. Stressed the need for a time-bound change, debated MOA qualifications, and agreed to escalate the issue to CCAG. Widely agreed that existing solutions require further consideration before implementation.					
Date raised:	2 June 25	Status:	Workgroups (first Workgroup held 25 July 25)	Decision date:	N/A	MHHS Impact:	Implementation date:
						N/A	N/A

Horizon Scanning Code Body Change Update BSC [HS8]

Change Title		CP1603 Updating the SVA Data Catalogue to reference new and amended interfaces					
Change Summary:		This CP proposes adding missing business context cross-reference information for new and amended MHHS market messages from Modification P478 to the SVA Data Catalogue (DC) Volume 1, Appendices A and B. During MHHS Code Drafting, the SVA DC wasn't updated as the necessary BSCP and interface details were unavailable until late in the process. Now that P478 is approved, this update will link MHHS messages to their relevant BSCPs. The update covers four message types in Appendix A: IF/PUB, REP, D-flow, and P-flow messages. Appendix B will include cross-references for P-flow messages only. No structural changes to P-flows are needed, but new MHHS use cases are reflected.					
Stakeholder positions:		Consultation had two responses, both in favour of CP1603.					
Date raised	4 March 25	Status:	Awaiting Implementation	Decision date:	3 June 25	MHHS Impact: No impact. Supports readiness for MHHS.	Implementation date: M8
Document Classification: Public							

Horizon Scanning Code Body Change Update BSC [HS9]

Change Title		[Pre-raise] Codify Service Management [SCR]					
Change Summary:		New Service Management capabilities are needed to support the operation of central systems launching at Milestone 10 (M10). *Related DIP Change “DCR0006 – Management of Major DIP Incidents” aims to clarify the DIP Rules the roles, responsibilities and obligations of DIP Users when there is a major incident which has/is affecting the DIP.					
Stakeholder positions:		-					
Date raised:	TBC	Status:	Pre-raise	Decision date:	TBC	MHHS Impact:	Implementation date: TBC
						TBC	

Horizon Scanning Code Body Change Update BSC [HS10]

Change Title		P487 Incentive of BSC Supplier Parties to meet the M15 MHHS Milestone					
Change Summary:		This Modification proposes extending the existing incentive for Suppliers to qualify for MHHS participation from Milestone 14 (28 October 2026) to Milestone 15 (7 May 2027). It would restrict Suppliers who miss Milestone 15 from registering new Metering Systems until migration is complete, encouraging timely compliance with the MHHS Migration Plan. MHHS requires all MPANs to be settled half-hourly, with an 18-month migration window ending at Milestone 15. After this, legacy Settlement systems will be retired. Currently, Suppliers not qualified by Milestone 14 face registration restrictions under BSC Section C 12.12.6, creating a financial incentive to meet that deadline. This Modification aims to replicate that mechanism for Milestone 15.					
Stakeholder positions:		MHHS Expert Group highlighted the need for a clear process to notify the registration service if a party's registrations need to be suspended. Elexon confirmed this would follow the existing M14 process via the assurance function.					
Date raised:	10 April 25	Status:	Awaiting Authority Decision	Decision date:	Ofgem sent back FMR on 22 August 25	MHHS Impact: Impacts participants to ensure qualification of MPANs.	Implementation date: TBC

Horizon Scanning Code Body Change Update BSC [HS11]

Change Title		P489 Update approved P478 for alignment with the latest MHHS Design [SCR]					
Change Summary:		BSC Modification P478, ‘Implementation of MHHS Arrangements,’ outlines the operation of the new Market-wide Half-Hourly Settlement (MHHS) Arrangements. The related BSC Sections and Configurable Items were originally based on an earlier MHHS Design version (Interim Release 8.1). Since then, further interim releases have introduced design changes not yet reflected in the BSC. This modification will update the BSC to align with the latest MHHS Design (Interim Release 8.11), ensuring BSC obligations and associated messaging are correctly applied to BSC Parties and Party Agents.					
Stakeholder positions:		CCAG and BSC Panel endorse changes to the BSC. Broad support from consultation respondents.					
Date raised:	4 June 25	Status:	Awaiting implementation	Decision date:	7 August 2025	MHHS Impact: No impact on Design. Ensure code reflects latest design (IR8.11)	Implementation date: M8

Change Title		P483 Enabling Asset Metering for Non-Half Hourly Boundary Metering Systems					
Change Summary:		This Modification proposes removing the Half-Hourly settlement requirement for Boundary Point Metering Systems to increase domestic consumer access to flexibility markets, promote equitable participation, and reduce reliance on Market-wide Half-Hourly Settlement (MHHS). The change aims to support flexible asset participation and broader energy system goals like Clean Power 2030.					
Stakeholder positions:		Most respondents to the consultations are in favour of P483, however, some expressed concerns around September 25 go-live overlapping with MHHS and early life-support.					
Date raised:	7 November 24	Status:	Awaiting implementation	Decision date:	21 August 25	MHHS Impact: No design impact but delivery date could be around M8.	Implementation date: 10 Working days after Elexon’s notice to the industry.

Change Title		[Pre-raise] Validation of Service Provider CoS Appointment (OHCR005)					
Change Summary:		The current use of a generic Change of Service Provider (CSP) code for retrospective appointments obscures the original event context. This results in complications for reporting and tracking migration activity, particularly affecting the integrity of historical data. This CP proposes a change that would allow preservation of the original event context in retrospective appointment scenarios. This would improve accuracy in reporting and tracking during the migration process.					
Stakeholder positions:		MHHS EG: Earliest feasible implementation date would be 26 March 2026. This timeline ensures a well-evaluated and minimally disruptive implementation.					
Date raised:	[Pre-raise]	Status:	Pre-raise	Decision date:	[Pre-raise]	MHHS Impact: Potential impact on MHHS parties' systems	Implementation date: 26 March 26

Horizon Scanning Code Body Change Update BSC [HS15]

Change Title		CP1609 New BSCP128 Appendix 11 for Seasonal Time of Day					
Change Summary:		Currently, BSCP128 Appendix 5 ‘CSAD 2.1 and 2.2 tables for all Host and Embedded Submissions’ contains the template for the Seasonal Time of Day (STOD) table. However, the version of BSCP128 Appendix 5 effective for Market-wide Half Hourly (MHHS) at Milestone M8 will not have this template, leaving no STOD template in BSCP128 or its Appendices. Furthermore, the required format for STOD delivery is changing for MHHS. To address this, a new BSCP128 Appendix 11 will be introduced to provide the updated STOD template, and BSCP128 will be amended to reference this new Appendix.					
Stakeholder positions:		Currently out for consultation to gather stakeholder views.					
Date raised:	1 July 2025	Status:	Awaiting implementation	Decision date:	5 August 25 (SVG approved), 11 September 25 (Panel approved)	MHHS Impact: Low - ensures participants have a standardised format to submit STOD data under MHHS	Implementation date: M8
Document Classification: Public							

Horizon Scanning Code Body Change Update BSC [HS16]

Change Title		CP1612 Extend Customer Direct Contract requirements from 1130 to 1827 days in BSCP706					
Change Summary:		The current three-year update requirement for the Registration Service does not align with standard five-year customer contracts, creating unnecessary administrative burden. Extend the update requirement from 1130 to 1827 days to better align with typical contract durations and reduce administrative workload.					
Stakeholder positions:		MHHS EG: Broad support the proposal, noting minimal system impact and clear benefits in terms of efficiency and reduced admin.					
Date raised:	8 August 25	Status:	Awaiting decision	Decision date:	7 October 25	MHHS Impact: No MHHS impacts. Implementation date needs to consider MHHS Qualification	Implementation date: 26 March 26 (TBC)

Horizon Scanning Code Body Change Update BSC [HS17]

Change Title		[Pre-raise] Extend ESNA HH data provisions to ADS					
Change Summary:		BSCP706 lacks provisions for using HHDC-provided data post-migration for exempt supply arrangements, as ESNAs are not serviced by HHDCs under MHHS. This creates a gap in data provision for migrated MPANs (MHHS MSIDs). Option 1: Update BSCPs to continue using DTN flows (short-term fix). Option 2: Enable ESNAs to subscribe to DIP for direct data access (long-term solution). Elxon proceeding with Option 1 and continue exploring Option 2 for future deployment.					
Stakeholder positions:		MHHS EG: The group preferred Option 1 as an interim solution due to minimal system changes and process disruption. Option 2 was supported for future implementation near milestone M15, as it offers a more robust long-term fix.					
Date raised:	Pre-raise	Status:	Pre-raise	Decision date:	Pre-raise	MHHS Impact:	Implementation date: TBC

Horizon Scanning Code Body Change Update BSC [HS18]

Change Title		CP1610 BSCP128 Updates to Align with ISD System Capabilities					
Change Summary:		This CP proposes to update BSCP128 and its and its Appendices 3, 4 and 7 to clarify the processes that Licensed Distribution System Operators (LDSOs) should follow for migrated metering systems and for non- migrated metering systems during the MHHS Transition Period. This would primarily involve amending BSCP128 to clarify that the existing processes involving Line Loss Factor Class IDs maintained in Market Domain Data (MDD) should be maintained for non-migrated and reverse-migrated metering systems and that the new processes involving Line Loss Factor IDs and Distribution Use of System (DUoS) Tariff IDs maintained in Industry Standing Data (ISD) should be used for migrated metering systems.					
Stakeholder positions:		Out for consultation					
Date raised:	28 July 25	Status:	Awaiting implementation	Decision date:	11 September 25, approved by Panel	MHHS Impact: Change should reduce ambiguity and provide clear guidance during the MHHS Transition Period	Implementation date: M8

Horizon Scanning Code Body Change Update BSC [HS19]

Change Title		CP1611 Updating the BSCP 700 Series to align with the MHHS design and requirements					
Change Summary:		CP1611 aims to align the BSCP 700 series with MHHS design requirements and Business Processes. It will correct inaccurate references, clarify untimetabled processes to ensure standardisation, and improve readability by addressing spelling, formatting, and language issues. These updates follow a review conducted as part of the BSC Audit transformation for MHHS, which identified gaps in alignment and consistency.					
Stakeholder positions:		Out for consultation					
Date raised:	28 July 25	Status:	Awaiting decision	Decision date:	7 October 2025	MHHS Impact: Change should reduce ambiguity and provide clear guidance during the MHHS Transition Period	Implementation date: 6 November 25

Horizon Scanning Code Body Change Update BSC [HS20]

Change Title		CP1613 Transfer of ownership of 4 Data Items in the EMDS from BSCCo to RECCo [R0243]					
Change Summary:		CP1613 seeks to amend the ownership of four data items (Standard Settlement Configuration (SSC) Description (J0075), Standard Settlement Configuration Id (J0076), Time Pattern Regime (TPR) Id (J1214), and Time Pattern Regime (J0078)) held within the Energy Market Data Specification (EMDS) from BSCCo ownership to Retail Energy Code Company (RECCo) ownership.					
Stakeholder positions:		Out for consultation					
Date raised:	5 August 25	Status:	Awaiting decision	Decision date:	7 October 2025	MHHS Impact: No impact, the four data items will not be used under MHHS and not included in ISD.	Implementation date: 6 November 25

Change Title		P496 Defining DIP Manager Data and how it can be shared					
Change Summary:		This Modification will clarify in the DIP Rules that due to the transactional nature of data in Common Blocks, this data shall be defined as DIP Manager Data for service management and issue resolution. Establish a mechanism for sharing DIP Manager Data, including from Messages' Common Blocks, with relevant stakeholders like Code Bodies, ensuring a clear legal basis for sharing personal information, such as MPAN data, when necessary.					
Stakeholder positions:		Respondents to consultation agreed with P496.					
Date raised:	7 August 2025	Status:	Awaiting decision	Decision date:	FMR sent to Ofgem on 16 Sept 25	MHHS Impact: No design impact.	Implementation date: M11 (22 Oct 25) or November Release (6 Nov 25) – dependent on decision date

Future of Horizon Scanning

Horizon Scanning

The Horizon Scanning (HS) process was established to monitor and manage external change to ensure Programme deliverables were not negatively impacted.

The process was that Code Bodies presented changes, which may impact the Programme and these were recorded on the Horizon Scanning Log and assured via CCAG. If a change impacted the Programme, a Programme Change Request (CR) was raised to impact assess the CR. Via Programme governance the CR was then approved or rejected.

If approved the MHHS Design and Code were updated to reflect the change. Impacted Participants built to the new Design.

What is the future of the Horizon Scanning process?

The Programme are still accountable for protecting Programme deliverables until M15, which include Early Life Support, Qualification and Migration deliverables. Therefore, the Horizon Scanning process will continue in a new Code Forum attended by the Programme, Code Bodies and Ofgem.

Unlike the HS process above, if a change is identified as impacting Programme deliverables, a Programme CR will not be required. Instead, the change will be progressed under Code Body governance only. The Programme will engage with the Code Body change control process, and if required influence the solution and/or solution implementation date.

Therefore, it is critical, the Programme monitors and engages with external change processes (pre-raised and formally raised change). If following Programme advice, the change proposer does not amend the change solution or implementation date, the Programme can escalate to Ofgem.

CCAG Closure

DECISION: Workstream closure and update if any outstanding cutover actions

Programme (Matthew McKeon)

10 mins

The MHHS Programme believes the Code Workstream has completed -

- Workstream criteria has been met
- Code Artefact delivery is complete
- No outstanding action remain

DECISION: SRO to close the Cross Code Advisory Group, at the final meeting on 24 September 2025

Programme Updates

INFORMATION: Updates from MHHS Programme governance groups and the wider Programme

Programme (Secretariat)

0 mins – to be taken as read and discussed by exception

Governance group updates

Programme Steering Group (PSG)

ePSG 12 September 2025

M10 Decision Making Choreography: Update provided on M10 Decision Making Choreography

Programme view of current M10 status: There are no known blockers to M10 that would prevent the Programme from continuing with planned M10 cutover activities.

IPA view of current M10 status: IPA agreed with the Programme view and outlined 4 key recommendations.

M10 Contingency Planning: Programme outlined M10 contingency plans

Open Discussion on M10 Status: There were no objections to the Programme continuing with cutover activities.

PSG papers available [here](#).

Design Advisory Group (DAG)

DAG has been formally closed, following recommendation from DAG and in line with CR064.

DAG papers available [here](#).

Cross Code Advisory Group (CCAG)

CCAG 27 August 2025

In the meeting, the CCAG provided updates on:

Horizon Scanning Log: Updates from all Code Bodies on changes which may impact MHHS Programme.

eCCAG Code M8 Cutover Meeting:

Confirmation of upcoming Extraordinary meetings which relate to M8 Code publication.

M8 Code implementation: Code Bodies and DIP Manager update on the M8 Code Implementation/go-live. CCAG papers available [here](#).

Programme Updates

Updates from MHHS Programme governance groups and the wider Programme.

Wider Programme Updates

Participant Checklist:

This week’s Participant Checklist includes the following items for Programme participant review, feedback and awareness:

- NEW! Key Qualification timelines – Wave 2 spotlight – if you haven’t yet completed required activities, the deadline for completion is as soon as possible
- NEW! Timelines for upcoming Qualification activities by Wave – **please note the various deadlines for the Wave you’re in**
- NEW! Systems Integration Testing (SIT) Retrospectives Summary Report published

You can view the **Participant Checklist** on the respective **Planning pages** of the [Collaboration Base](#) and the [MHHS website](#). In the Participant Checklist you can view upcoming consultations and key deliverables, as well as the latest status of Change Requests in the **Master Change Request Dashboard** tab.

System Integration Testing Advisory Group (SITAG)*

SITAG 20 August 2025

SIT Wrap-up: Recap on approval of SIT Completion and highlighted additional items to note

SIT Governance: SRO approved SITWG and SITAG to move to an ad-hoc schedule, which will be reviewed on a monthly basis

Scheduling MHHS SIT Lessons Learned sessions: Update on MHHS SIT lessons learned sessions, scheduled for 26 and 27 August 2025

IPA Updates: Concluding update on Test Assurance

Programme Milestones related to SITAG: SRO approved the removal of the milestones: T3-TE-0052, T3-TE-0055, T3-TE-0051, T3-TE-0056 and T3-TE-0059

Top Programme Risks related to SITAG: The Programme RAID Manager provided an update on the residual SIT related risks

SITAG papers available [here](#).

Qualification Advisory Group (QAG)*

QAG 21 August 2025

Qualification Governance Update: SRO approved the monthly review of QAG for required decisions and cancelled if not deemed necessary

QT Test Cases Batch 3 v2.1: SRO approved the Non-SIT S&A QT Test Scenarios Batch 3 v2.1

Wave 1 QT Readiness: SRO approved:

- T2-QU-1100 (Qualification Testing Wave Readiness Confirmed)
- T3-QU-0028 (Qualification Wave 1 QT Execution Start)

Programme Milestones related to QAG: SRO approved T3-QU-0094 (Qualification Wave 1 Participants have submitted their initial QAD).

QAG papers available [here](#)

Migration & Cutover Advisory Group (MCAG)*

MCAG 11 September 2025

Programme milestones related to MCAG: The MCAG ratified the ex-committee decision by the MCAG Chair to approve the completion of milestones (5 Sept. 2025): T3-MI-0045 (MCC Dress Rehearsal 2 (To test the 'Monitor and Control processes')) and T2-MI-0500 (MCC Mobilisation Complete).

Outcome of Helix GO/NG: Helix confirmed approval to proceed with working towards M10 on 22/09/25.

Recap of M10 Acceptance Criteria and associated risks: Programme provided an update the outstanding M10 Acceptance Criteria that were relevant to MCAG.

M10 Contingency Planning: Programme provided an update on the Contingency Planning exercise.

MCAG update to PSG: Programme invited MCAG members to state if they had any objections to the Programme continuing with the M10 Cutover activities, to which none were received.

MCAG papers available [here](#).

Upcoming Governance Meetings:

- Thursday 18 September 2025:** Qualification Advisory Group (QAG) at **10:00**
- Friday 19 September 2025:** Extraordinary Migration & Cutover Advisory Group (eMCAG) at **10:00**
- Friday 19 September 2025:** Extraordinary Programme Steering Group (ePSG) at **15:00**
- Tuesday 23 September 2025:** Extraordinary Transition and Operational Readiness Working Group (eTORWG) at **14:00**
- Wednesday 24 September 2025:** Cross-Code Advisory Group (CCAG) at **10:00**
- Wednesday 24 September 2025:** ePSG at **14:00**

*SITAG, MCAG, QAG replaced the Testing and Migration Advisory Group (TMAG) in Q1 2024.

Working Group Progress Report

Systems Integration and Testing Advisory Group (SITAG)*	
	Systems Integration Test Working Group (SITWG)
Upcoming deliverables	- SIT Operational Readiness Reports - SIT Regression Test Approach and Plan
Latest meeting's agenda items	02 October 2025 Cancelled for October
Agenda items from last meeting	04 September 2025 Cancelled for September
L3 escalations	None

Qualification Advisory Group (QAG)*	
	Qualification and E2E Sandbox Working Group (QWG)
Upcoming deliverables	N/A
Latest meeting's agenda items	07 October 2025 TBC
Agenda items from last meeting	03 September 2025 - Qualification Progress Update - Qualification Wave RAG reporting - DIP Onboarding Update - Top Programme Risks Related to QWG - QT Lessons Learned Update (excluding DIP) – SAQTSG update - QT Artefacts - SAQTSG update
L3 escalations	None

Working Group Progress Report

Migration and Cutover Advisory Group (MCAG)*			
	Migration Working Group (MWG)	Data Cleanse Working Group (DCWG)	Transition & Operational Readiness Working Group (TORWG)
Upcoming deliverables	N/A	N/A	N/A
Latest meeting's agenda items	9 October 2025 TBC	25 September 2025 - Population of Domestic Premises Indicator Wash Up - Population of Market Segment Wash Up - Data Cleanse Closure Report	17 September 2025 - Headline Report and Actions - Cutover Declarations - Recommendation to MCAG - Service Management Update
Agenda items from last meeting	11 September 2025 - MWG Update - MWG Backlog	28 August 2025 - Data Inconsistencies - Domestic Premises Indicator - Population of Market Segment - Data Cleanse Closure Report - Data Cleanse Reporting	10 September 2025 - Headline Report and Actions - M10/M11 Cutover Update - Decision Choreography - Cutover Comms - Cutover Reporting Dashboard - M10 Day 1 Choreography - IRG Update - Service Management Update
L3 escalations	None	None	None

Summary and Next Steps

INFORMATION: Summarise meeting actions and next steps

Chair & Secretariat

5 mins

Next steps

Secretariat to confirm actions and decisions from meeting.

No further CCAG meeting subject to CCAG's approval and in line PSG's approval of CR064. (Cancel remaining CCAG meeting series)

Appendices

- *Appendix 1 – M7 Delivery and M8 Implementation POAP*
- *Appendix 2 – MHHS related REC Category 3 POAP*

M8 Plan on a Page

MHHS RELATED REC CATEGORY 3 M8 POAP V1.12 (16/09/2025)

CAT 3 updates	Jul 24	Aug	Sep	Oct	Nov	Dec	Jan 25	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept
Performance Assurance Operating Plan*	Consult		PAB Approval Implemented (01/09)									Development	Consult		PAB Approval 03/09 Implemented (09/09)
REC Entry Assessm't Forms*	Development		CM Approval	Implemented (11/10)											
	Agreed and implemented														
REC Entry Assessm't Pack*	Development		PAB Approval	v5 Implemented (11/10)											
	Agreed and implemented														
REC Service User Categorisation															
	Agreed and implemented 09/04/24														
REC & BSC Joint Storyboards and CSS External Testing Scenarios**	Development			PAB Approval											
TPI Code of Practice											Development	Consult		Implemented (01/09)	
	Agreed														
EES User Guides ***	Development								EES Service Provider Approval						Implemented M8
	Agreed														
Sharing Meter Asset Guidance	New					Development					Consult		MEP Approval		Implemented M8
	Agreed														
Market Segment Guidance	New					Development					Consult		MEP Approval		Implemented M8
	Agreed														
MOA Appointment Guidance	New										Development	Consult		MEP Approval	Implemented M8
	Agreed														
Meter Config Table Update Process	New	Development		Consult			MEP Approval								Implemented M8
	Agreed														
Guidance on Elec Metering Points	Consult		MEP Approval												Implemented M8
	Agreed														
Electricity DAM & EES Users (App 1)	Development						Consult		PAB Approval confirmed post consultation (no change)						Implemented M8
	Agreed					PAB Approval									
Technical Expert Panel ToR		Development			Change Panel Approval										
	Agreed and implemented				Implemented (11/10)										

Notes
1) Once agreed, all CAT 3 documents updated for MHHS will be published on a dedicated REC Portal MHHS Hub[here](#)
2) REC Code Manager raised CAT 3 CPs on 11 Sept for changes to be implemented at M8 (including update to the REC Baseline Statement).
3) * Initial update completed for MHHS. Further update as necessary as part of annual review cycle but no dependency for M8.

4) ** Documents approved by PAB and will be further reviewed once ending Qualification approach finalised, ahead of reapproval if needed and publication.
5) *** Separate EES User Guides for Distributors, Suppliers, MEM & Supplier Agents, 3rd Parties, Non-Domestic Customers & TPIs.
6) Meter Update (IF005) User Guide split into separate Sharing Meter Asset Guidance and Meter Segment Guidance. New MOA Appointment Guidance agreed.
7) Update to TPI Code of Practice approved and implemented on 1 Sept 2025 following Authority rejection of R0137/A
