# MHHS Webinar: DIP Simulator Demo

---

01 December 2022

## Introduction

*Helen Richardson  
5 minutes*

## MHHS Test Stubs & DIP Simulator Demo

*Rebecca Farooq & Georgi Rabotov  
20 minutes*

## 2023 Timeline

*Rebecca Farooq  
5 minutes*

## Q&A

*Facilitated by Pete Edwards  
15 minutes*

**MHHS  
PROGRAMME**  
Industry-led, Elexon facilitated

---

**Please ask questions throughout the webinar.**

**You can join at [Slido.com](https://www.slido.com)**

***#MHHS***

---

## ? Why are we holding this webinar?

- Bring to life the scope of the test tools “stubs” we are planning to provide and introduce you to the team
- Showcase current progress along with our future delivery plans
- Provide early visibility of the Data Integration Platform (DIP) simulator tool and our plans for data generators

## What are Simulator, Data Generator & Emulator tools?

- **Simulators:** replace a ‘missing’ system in integration and replicate the behaviour of that missing system
- **Data generators:** produce quantities of realistic data, to aid testing
- **Emulators:** replicate functions of a target system, enabling automated checks of correctness in systems under test

## What is the programme rationale for providing test tools?

- Driving efficiency
- Introducing and promoting early standardisation
- De-risk entry into testing cycles

## What do we need from Programme participants?

### Collaboration

- **Get involved** - meet the team and find out what we are delivering.

### Sharing ideas

- **We welcome your ideas** for new features that might make everyone's life easier!

### Feedback

- **We need to know** if the tools are not going to meet your requirements
- All feedback can help inform options to iterate our tooling

### Clarifications

- **It's important we interpret the design in the same way**, so please reach out to ask for clarifications, or to understand our development process further

### Challenge

- **If you think we could improve** the ordering or priorities, please let us know!

### Ask for support

- **Ask for help** if you are unsure or blocked.
- The more users, the better; we will always try to unblock you where possible

# MHHS Test stubs and DIP Simulator Demo

Rebecca Farooq & Georgi Rabatov

## Test Stubs for Pre-Integration Testing (PIT)

### Data Integration Platform (DIP) Simulator

- For participants running tests independently on their own infrastructure
- Accessible to all participants
- Simulates DIP behaviour - consumes and publishes information in the same manner as the DIP (carrying out Level 1 and Level 2 validation but without all DIP functionality)
- Accompanied by a library of correct interface messages

### Consumption Data Generator

- For participants running tests independently on their own infrastructure
- Generates realistic test consumption data - suitable for consumption by Smart Data Services (SDS), Advanced Data Service (ADS) & Elexon Central Systems (ECS) which the participants can use in conjunction with their own existing simulators

## Automated Test Result Generators (Emulators)

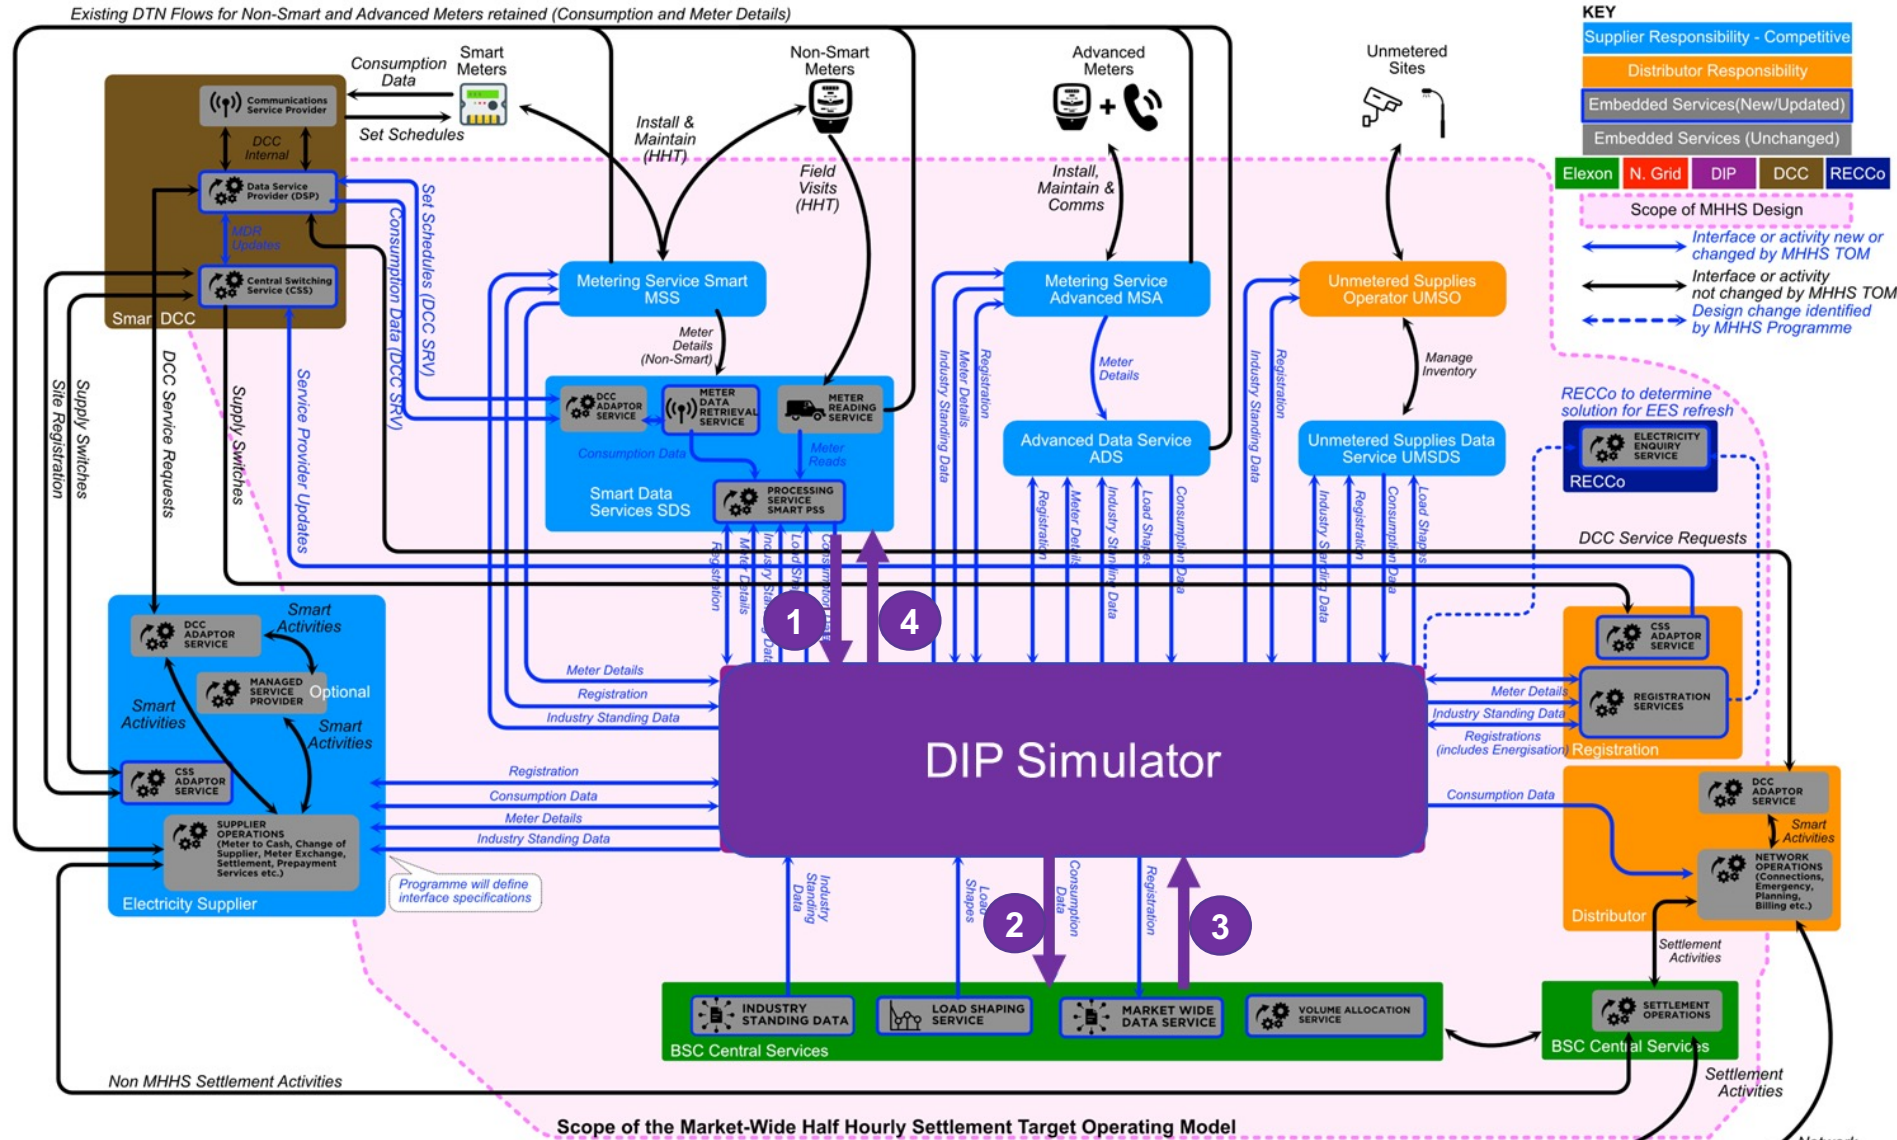

Prepared for **System Integration Testing (SIT)** / **User Integration Testing (UIT)**

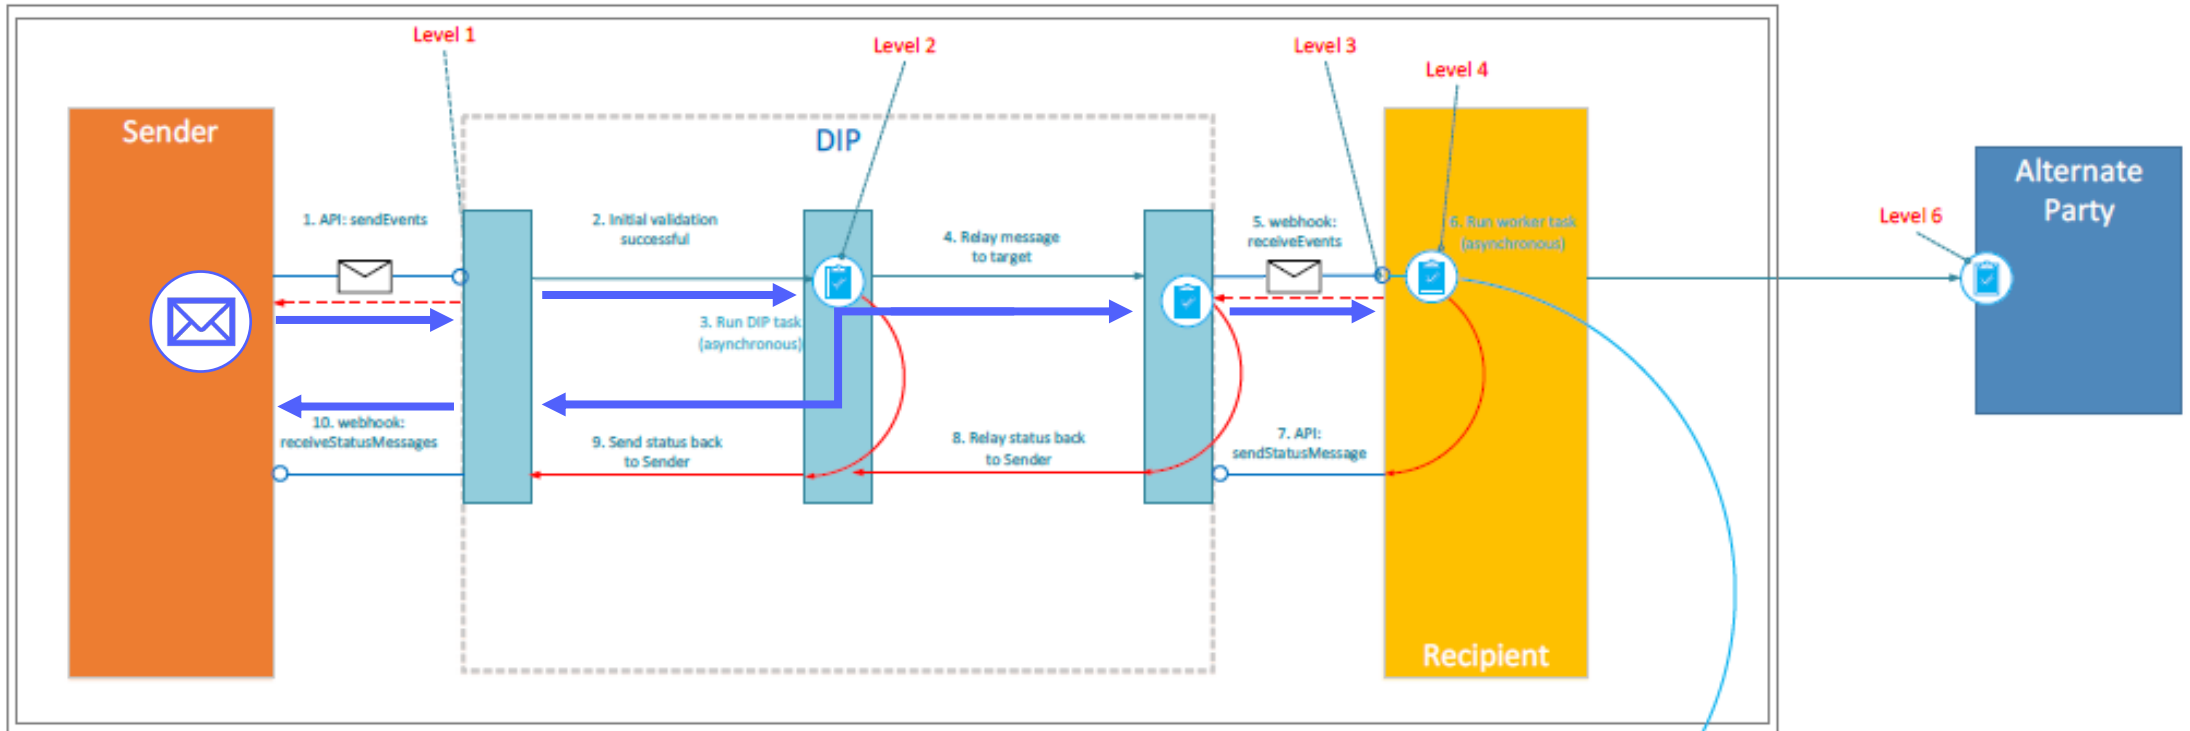

- **SDS Emulator** - takes as input the test data which enters SDS and produces the result expected from SDS; then compares the actual SDS result with the result the emulator has calculated itself and reports on test success or failure
- **ADS Emulator** – as with SDS, but for ADS

# DIP Simulator interactions

- 1 Simulator receives a message on an Interface
- 2 Pushes that message out to the relevant receiver as a Publication
- 3 Allows the receiver to submit a Status response
- 4 Response then returned to the original sender

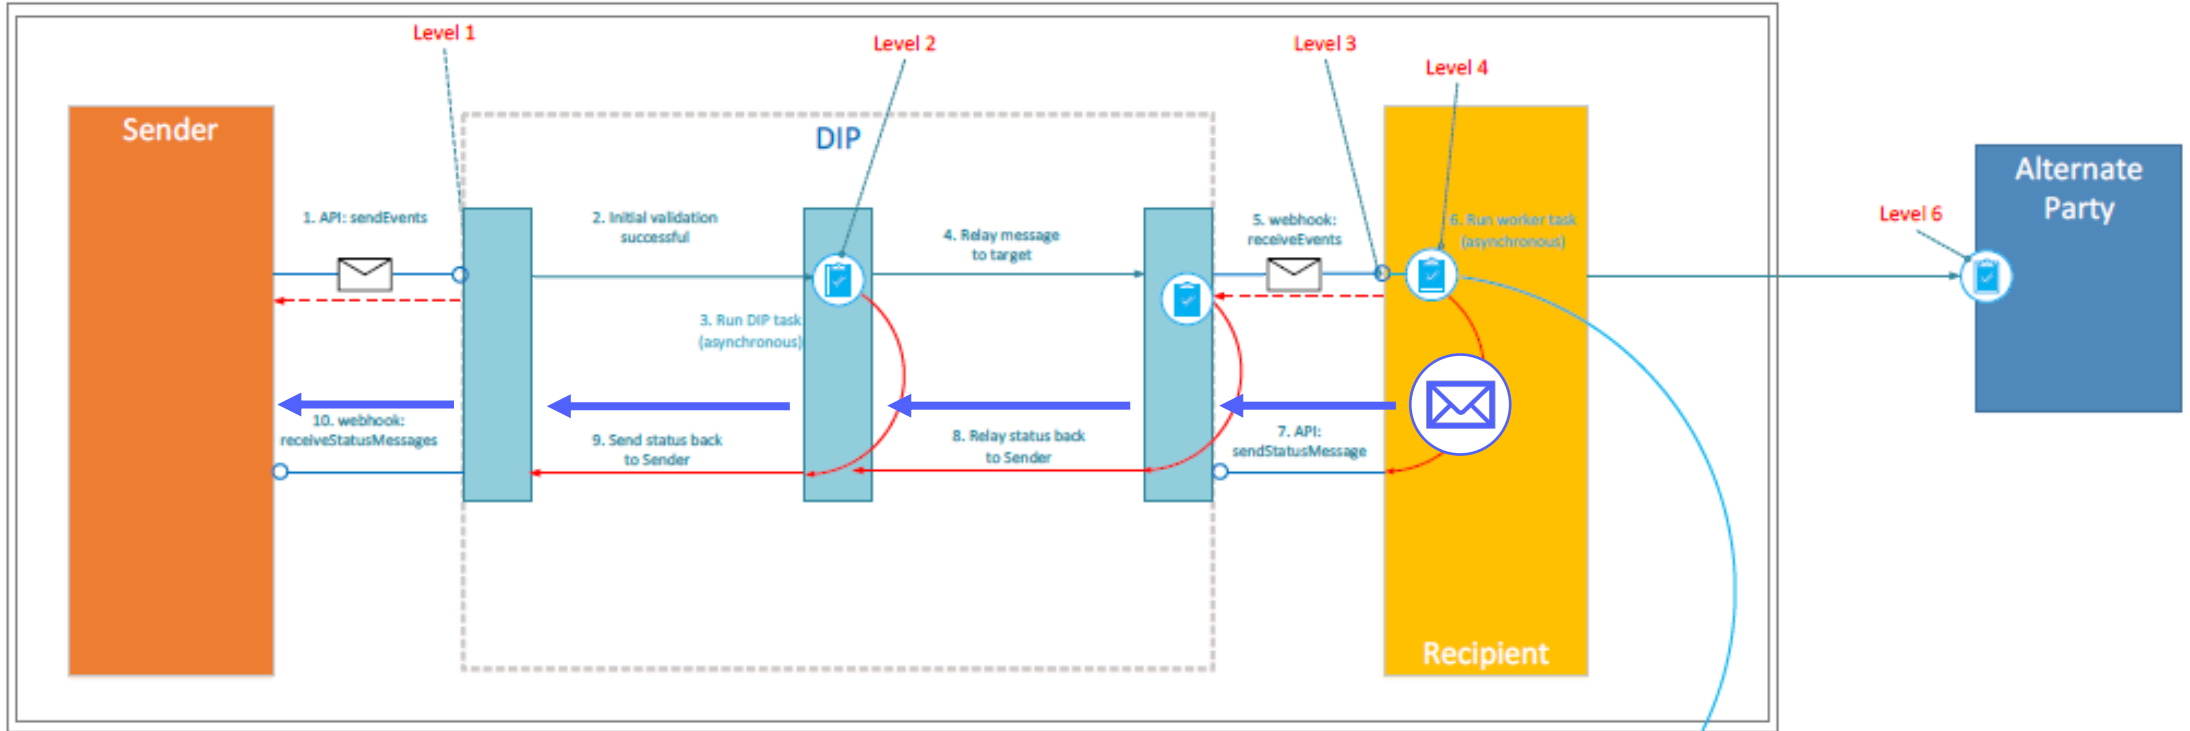

A testing participant can send a message (Sender above) which will result in an **error message being returned** by the DIP Simulator if it **fails format validation**

If the message passes validation, the DIP Simulator will send the message on to the Recipient (if the testing participant has configured a Recipient)

If the testing participant has **configured a Recipient**, the participant can construct a **response message** and send it from the Recipient back to the Sender via the DIP Simulator.

This simulates the **Level 3** and **Level 4** validation responses to the original message

*To view the DIP simulator demo on this slide, please watch the overall webinar recording, which can be found on the MHHS website.*

# Webinar

2022-11-28 13:14 UTC

Recorded by

Georgi Rabotov  
(MHHSProgramme)

Organised by

**Any questions?**  
**Please join at [Slido.com](https://www.slido.com)**  
**#MHHS**

---

### PPC Bilaterals

- The PPC Team is available for **monthly bilateral sessions** with all Programme Participants
- The sessions are used to enable a two-way conversation between the participants and the Programme
- Contact [PPC@mhhsprogramme.co.uk](mailto:PPC@mhhsprogramme.co.uk) to schedule

### Design Work-off Plan

- On **31 October**, the Design Advisory Group (DAG) **approved the Physical Design Baseline**
- This approval is subject to the Programme delivering the **Design Work-Off Plan**. Sub-working group sessions are held twice a week to discuss these Work-Off Plan items
- If you would like to join these discussions, please contact [PMO@mhhsprogramme.co.uk](mailto:PMO@mhhsprogramme.co.uk) to sign up

### SITWG launch

- Today is the kick-off for the **Systems Integration Testing Working Group (SITWG)** at **14:00**.
- This is a Level 4 working group and reports in to the Testing and Migration Working Group (TMAG).
- To sign up please contact the PMO team [PMO@mhhsprogramme.co.uk](mailto:PMO@mhhsprogramme.co.uk)

### The Collaboration Base

- The Collaboration Base is the master source of Programme information, allowing you to access and engage with Design, Testing and Code Change documentation
- This includes the schedule and outputs of all Programme events, including Governance meetings, Webinars, Open Days & Playback sessions
- The dPMO tool provides Participants with a set of interactive and user-friendly dashboarding that display core Programme information

### Newsletters

- The Clock is the Programme's weekly newsletter, and the Design newsletter is fortnightly
- They provide you with updates and key information to support delivery of the Programme
- They signposts events, plans, reporting, and documents to assist in planning, design, development, testing and delivery

<b>Interface</b>	<b>Name</b>	<b>Notes</b>
MHHSP-IF-009	Notification of LDSO Disconnection / CSS De-Registration	Registration
MHHSP-IF-013	MDS Exceptions Applied	Consumption
MHHSP-IF-014	Rejected Consumption Data Submission	Consumption
MHHSP-IF-018	Notification of Registration Data Item Changes	Registration
MHHSP-IF-021	UTC Settlement Period Consumption Data	Consumption
MHHSP-IF-022	LSS Period Data	LSS
MHHSP-IF-023	LSS Totals Data	LSS
MHHSP-IF-024	Supplier to Advisory Notification to DS	Consumption
MHHSP-IF-026	Registration Service Notification of Supplier Data Chg	Registration
MHHSP-IF-036	Registration Service Notification of Service Appointment & Supporting Info	Registration
MHHSP-IF-040	Notification of Annual Consumption	Consumption
MHHSP-IF-041	Cumulative Meter Reading	Consumption
MHHSP-IF-043	Registration Service Notification of Change of Connection Type	Registration
MHHSP-IF-044	Registration Service Notification of Change of Segment	Registration
MHHSP-IF-047	Notification of the Publication of a Downloadable Asset	ISD

Please note, these have been developed to Interface Catalogue v4.0 and Swagger v0.2
