3 – I/E MPANs & Exception Handling	MHHS-DEL2403-SIT-M-FM-CoA - Correcting Incorrect FwdMig CoA Readings - v0.2 - Clean.xlsx	V0.3	All references to current DS or MS in Forward Migration scenarios are incorrect since there will be no current Service. Reference could be made to outgoing DC or outgoing MO if appropriate	Changes made
3 – I/E MPANs & Exception Handling	MHHS-DEL2397-SIT-M-FM-CoA - Missing Reads Deemed Reads - v0.2 - Clean.xlsx	V0.3	This test is described as 'Under this scenario a MHHS Qualified Supplier chooses to migrate a Advanced Meter (NHH) MPAN from Legacy NHH settlements to MHHS arrangements. Correcting incorrect Forward Migration COA Readings.' yet I can see no steps relating to correcting forward migration COA readings	Changes made
3 – I/E MPANs & Exception Handling	MHHS-DEL2404-SIT-M-FM-CoA - Rejected Appointment - v0.2 - Clean.xlsx	V0.3	These test steps must instruct the DS and MS to reject the appointment else the following steps do not deliver the intend of this test thread of "Under this scenario a MHHS Qualified Supplier chooses to migrate MPAN for all meter types MPAN from Legacy NHH settlements to MHHS arrangements but the appointment is rejected." Also the test thread is described as "This document lists both DS and MS changes for each meter segment type" yet only lists steps for the SMSI and SDSI so please clarify	Changes made
3 – I/E MPANs & Exception Handling	MHHS-DEL2390-SIT-M-FM-CoA-IE-MPAN Test Scenarios And Test Cases - v0.2 - Clean.xlsx	V0.3	For added clarity it should be noted that D268/383/384 flows will be sent for both MPANs. Same for flows going to Supplier and LDSO	Changes made

3 – I/E MPANs & Exception Handling	MHHS-DEL2390-SIT-M-FM-CoA-IE-MPAN Test Scenarios And Test Cases - v0.2 - Clean.xlsx	V0.3	The test description appears wrong - "Under this scenario a MHHS Qualified Supplier chooses to migrate Advanced HH Import/Export MPANs from Legacy NHH settlements to MHHS arrangements." should be "Under this scenario a MHHS Qualified Supplier chooses to migrate Advanced HH Import/Export MPANs from Legacy **HH** settlements to MHHS arrangements."?	Changes made
3 – I/E MPANs & Exception Handling	MHHS-DEL2401-SIT-M-FM-CoA-Lapsed - v0.2 - Clean.xlsx	V0.3	The test description appears wrong - "Under this scenario a MHHS Qualified Supplier chooses to migrate Advanced HH Import/Export MPANs from Legacy NHH settlements to MHHS arrangements." should be "Under this scenario a MHHS Qualified Supplier chooses to migrate Advanced HH Import/Export MPANs from Legacy **HH** settlements to MHHS arrangements."? I guess this error may be repeated elsewhere	Import/Export MPANs does not apply to the Lapsed Appointment test. But, I get your point - Changes made.

3 – I/E MPANs & Exception Handling	MHHS-DEL2403-SIT-M-FM-CoA - Correcting Incorrect FwdMig CoA Readings - v0.2 - Redlined.cleaned	V0.3	D0384 should be added to Interface ID column as per Key Validation and Test Evidence Column. D0384 is sent to Supplier as well as D0268.	Changes made
