Q1. Can we confirm which entities we are expecting this Change Request to cover? And that we would be looking for this frequency to remain for enduring?

The CR specifically relates to entities 1, 45, 61 and M16. The frequency will be in place until the conclusion of transition.

Q2. Will there be a subsequent Change Request to move back to monthly frequency, and if so, what is the expected timescale for that?

This is a transitional requirement which will end at on transition completion. The Change Request is only to change the transitional requirement.

Q3. If it works for transition, would we not look for the frequency to remain?

If parties do not find the production and consumption if ISD problematic at an increased frequency it would feel a retrograde step to decrease the frequency. This concern should be noted with a presumption that if no problems arise during the transition period a subsequent change will be raised to retain the frequency.

Q4. What time frame is the fortnightly publication of ISD going to take place over?

Work will be undertaken to align publication dates with more frequent governance cadence required in transition. This will be published at a later date.

Q5. Will it be a partial ISD publish once a fortnight with only the entities 1, 45, 61, M16? And a full publish of both ISD and MDD once a month with all entities?

We would expect a full ISD release to remain on a monthly basis with the interim released constrained to the addition of qualified parties.
